Abstract

$$f(x) = \frac{1}{x^2} = x^{-2} \Rightarrow f'(x) = -2x^{-3} = -\frac{2}{x^3}$$

[illegible]

g to be admitted as Associates shall
be recommended by the Royal Institute
of Architects and be persons
of high standing in the profession who
are distinguished by their attainments in art and
science and are desirous of rendering
service to the Institution by the able co-
operation of their talents and efforts.

HONORARY FELLOWS shall be Royal Family persons who hold or have held Government of the United Kingdom or of any Colony or Dependency of the United Kingdom or distinguished persons to whom the Royal Institute may from time to time desire to add.

HONORARY CORRESPONDING MEMBERS shall be persons not being British Subjects and not residing in the United Kingdom nor practising as Architects in any Colony or Dependency of the United Kingdom, who by reason of their eminence as Archaeologists or for artistic scientific or humanitarian may appear to the Council able to render aid in promoting the objects of the Royal Institute.

8. **THE** Council shall have power to decide respecting the admission as a Candidate for the person proposed as a Member of the Royal Institute.

9. **EVERY** Fellow and every Associate and every subscribing Members of the Royal Institute as determined shall be entitled to obtain a Fellowship subject to such conditions and on such terms as may be prescribed by the Bye-laws from time to time prescribe and any such person ceasing to be a Fellow shall on demand deliver back to the Council his Certificate of Membership.

10. **A FELLOW** may use after his name the initials F.R.I.B.A. and an Associate the initials A.R.I.B.A.

III. President, Vice-Presidents, &c.

11. **THERE** shall be a President and Vice-Presidents and one or more Honorary Secretaries of the Royal Institute.

12. **The** President shall be elected from the class of Fellows or from the class of Honorary Fellows.

13. **THE** Vice-Presidents and the one or more Honorary Secretaries shall be elected from the class of Fellows.

IV. Council.

14. **THERE** shall always be a Council of the Royal Institute which Council shall consist of the President and Vice-Presidents the one or more Honorary Secretaries and such other Members to be elected at a General Meeting of the Royal Institute in such manner and at such times as the Bye-laws may from time to time prescribe.

15. **THE** Council may regulate their own proceedings by Standing Order or otherwise as they may see fit and an act or proceeding of the Council shall not be invalidated

of Council be not less than one-half of the
prescribed by the Bye-laws.

Council shall subject to such limitations
as Bye-laws may from time to time prescribe
the management of the income of the B
the entire management and super
other affairs and concerns thereof and
of appointing such Officers and servants
necessary or useful to the Royal Institute
them if they shall think fit and shall
pay such duties salaries or remuneration.

and if the same be not paid within that time, shall be suspended or expelled by Resolution in pursuance provided by By-law 23. Should a member be suspended for non-payment of his subscription, the Council shall have power, upon the defendant giving satisfaction an explanation of the non-payment, to reinstate him in his former position as a member, and to require the payment of all arrears which would be due had he continued a member. In case of such reinstatement, and any other business which may have been pending in consequence of such suspension, the Council shall have power to deal with the same as it may think fit.

21. In the case of any Fellow or Associate who, through ill-health, advanced age, or any other sufficient cause, is unable to continue to practice, the Council may remit his annual subscription due from him, and may further, if satisfied that there is a good reason for so doing, remit the same in whole or in part.

22. Any member convicted of a crime, or of a crime which, in the opinion of the Council, is of a serious professional character, or who is guilty of any other act which, in the opinion of the Council, is of a serious professional character, shall be liable to suspension or expulsion in manner hereinafter provided. Any member who may be convicted of felony shall cease to be a member of the Royal Institute.

23. Any charge under the preceding By-law 2 against a member must be in writing, duly signed and forwarded to the Secretary, who shall lay it before the Council at their next Meeting. Such charge shall be only considered, and determined by the Council only. The Council shall have power to appoint a Committee of not less than three of their own body to investigate the charge and report to them thereon. Should the Committee find sufficient grounds for further proceedings, they shall send, in a registered letter to the member against whom the charge is preferred, a copy of the same, calling him to answer such charge in writing within fourteen days of the date of such letter, and, at their discretion, to appear in person before a Meeting of the Council or of a Committee of the Council. In default of the member's compliance with the request in such letter, or if his explanation be, in the judgment of the Council, unsatisfactory, the Council may proceed to suspend or expel him.

It have power to decess the suspension of
for a period not exceeding twelve months.

No member shall be suspended or
Council to decide by a majority of at
those present, and in any case by the vote
of those present. If they so decide, the

either case a Special General Meeting shall be convened in the manner prescribed in By-law 67 in connection with the proposal.

69. A Resolution respecting the adoption of a new By-law, or the alteration, amendment, or repeal of an existing one, or on any proposal affecting the property or management of the Royal Institution, or any professional question, shall only be carried at a General Meeting in which there shall be present and voting at least twenty subscription members, of whom not less than eleven shall be Fellows; and if the same be supported by a majority of at least two-thirds of those present having a right to vote and vote thereon. Provided always that when any such Resolution shall have been carried as aforesaid, it shall be submitted on a demand being made in writing, at or previous to the Meeting, by any six Fellows that a poll thereon shall be taken by voting papers. The Secretary shall then declare the majority shall be Fellows, and if the Resolution is carried at the Meeting, and the Meeting is adjourned, the Secretary shall send to each member of not less than ten days before the adjourned Meeting.

A voting paper shall be sent to each member of the Institution with an official receipt of the same, and shall be written and sent to all members having a right to vote thereon. Each voting paper shall be filled up, signed by the member, and returned to the Secretary at least three days before the said adjourned Meeting. The voting papers shall be handed by the Secretary to the Scrutineers, who shall be a quorum, and whose duties shall be that they shall then count the votes and announce the result at said adjourned Meeting. The said Resolution shall be declared to be carried if supported by a majority of voting papers so returned; otherwise it shall be declared to be negative.

A Resolution declared to be carried shall be subject to the provisions of the Charter in relation to the next subsequent General Meeting, shall be subject to the Charter, provided it be by a majority of those present having a right to vote and voting thereon at the said subsequent General Meeting, or if a poll be demanded, then as is herein provided.

The demand of a poll at a General Meeting shall not prevent the continuance of the Meeting for the transaction of business other than that on which such poll has been demanded.

In all cases, except as otherwise provided, the voting shall be by show of hands; and a Resolution of the Royal

Resolutions so voted shall be declared to be carried if supported by a majority of those present having a right to vote and signing thereon.

E. GENERAL CONFERENCES

13. The Council shall make arrangements for the representation of the Council in the various organs of the United Nations and in the various organs of the United Nations system.

79. The Royal Institute shall not be responsible for any acts, expenses or other liabilities which may be incurred by any Allied Society.

80. If any Society in alliance with the Royal Institute desires to withdraw therefrom, such Allied Society shall at liberty to do so after three months' notice, and the Institute may in like manner determine the alliance.

81. The Royal Institute shall in each year contribute any Allied Society not more than one fourth of the subscription paid to the Royal Institute by each member thereof who is also a member of such Allied Society in respect of and for his subscription thereto: but it shall not contribute any subscription in the case of more than one Allied Society.

XVIII. INTERPRETATION

82. "The Royal Institute" shall mean the Institute of British Architects, as defined in the Original Charter of the Institute, and the Supplemental Charter, and the Council of the Royal Institute of British Architects. "Honorary Secretary" shall mean the Secretary of the Royal Institute as he may be designated at any annual election, there being more than one, and the Honorary Secretary shall be elected if one of them. "The Secretary" shall mean "of the Royal Institute" as defined in the "Metropolitan Architect" shall mean any no office or place of residence within a radius of twelve of Charing Cross in the City of Westminster. "Metropolitan Architectural Society" shall mean a having no place of meeting within the said radius of miles.

XIX. THE FORMS OF THE CHARTER

83. A. Form of the Charter of the Institute.
I, the undersigned, having been elected a Fellow of The Royal Institute of British Architects, do hereby declare that I have attained the age of thirty years, and have been engaged as principal for at least seven successive years in the practice of Architecture, and in consideration of my having been so elected, I promise and agree that I will not accept any trade or other discounts or illicit or surreptitious commissions or allowances in connection with any works the execution of which I may be engaged to superintend, or

REGULATIONS (BY-LAWS 3, 7, AND 9)

As regards By-law 3 * [p. 34]—

Every person desiring to be admitted a Fellow shall in all cases submit for examination by the Council, as evidence of his abilities as a practising Architect, working drawings, and, if practicable, photographs of his executed work, with such further evidence, if any, as the Council may require. Such drawings and photographs shall be accompanied by a declaration, signed by the applicant, that the buildings to which they relate have been designed by himself.

As regards By-law 7 * [p. 36]—

1. Any objection to an applicant for candidature whose name and address are published in the *Journal* of the Royal Institute, or other communication respecting him, must be sent to the Secretary for submission to Council within ten clear days from the date of issue of that number of *Journal*.

2. No nomination of any applicant for candidate of the Council until after the lapse of at least four publications of his name and address in the *Journal*.

3. The day of election shall be the first day expiration of twenty-one days from the day nomination was read.

As regards By-law 9 * [p. 37]—

The voting papers, which shall be sent to the candidates for the election of the Council, shall be sent to the candidates, with the names of the candidates, and the names of the candidates, and the names of the candidates, which shall be sent to the candidates.

APPENDICES

THE FORM OF PRELIMINARY STATEMENT

A. B. & C. FELLOW, ASSOCIATE, AND HON. ASSOCIATE.

FELLOWS RETIRED FROM PAY TWO

[NOT SUBSCRIBING MEMBER]

Any Fellow who has been a member for two years from the date of his retirement from the service may, upon application, be re-elected to the Fellowship, provided he has been a member for two years from the date of his retirement from the service.

ASSOCIATES (A.T.A.)

Amendments shall be passed at the next meeting of the Association of Architects, who, I have estimated the cost of twenty-one years. From the records of the Association (25 March 1887) every member, according to his position in the Association, shall be required to pass or to have passed with the Association of Architects, or any of the other Institutes.—*Extract from the Minutes.*

1. The first part of the document is a list of names and addresses, which appears to be a directory or a list of contacts. The names are written in a cursive script, and the addresses are listed below them. The list includes names such as "John Smith", "Mary Jones", and "Robert Brown", among others. The addresses are also written in cursive and include street names and city names.

2. The second part of the document is a list of names and addresses, which appears to be a directory or a list of contacts. The names are written in a cursive script, and the addresses are listed below them. The list includes names such as "John Smith", "Mary Jones", and "Robert Brown", among others. The addresses are also written in cursive and include street names and city names.

3. The third part of the document is a list of names and addresses, which appears to be a directory or a list of contacts. The names are written in a cursive script, and the addresses are listed below them. The list includes names such as "John Smith", "Mary Jones", and "Robert Brown", among others. The addresses are also written in cursive and include street names and city names.

BOARD OF ARCHITECTURAL EDUCATION

[For Constitution, Officers, and Members of the Board, see page 5.]

The Board was constituted in May 1904, and was empowered to draw up a scheme of architectural education, and to negotiate with recognised institutions of architectural training throughout the country regarding the adoption of the syllabus.

The following is the scheme drawn up by the Board and approved by the Council of the RLBA. —

In order to maximize education it is recommended that secondary schools be given latitude and authority to develop and deliver a curriculum that is relevant to the needs of the students.

In regard to the character of the work, it is recommended that the total course should consist of two years of preliminary work in the schools followed by two years in an architect's office, either as pupil, improver or assistant, that the training in the schools should continue during the first in an architect's office, and that the student's training should be kept under supervision by the Board or its delegates during the whole term; that certificates be granted to students at the end of the course in consideration of their satisfactory progress and capacity as proved by their work in the schools attested by their teachers, and by a study embodying some architectural project, to include working drawings and specifications, and also an analytical account of the nature and intention of the architecture chosen. This study should be analogous to the thesis

ated for degrees in certain university courses. The opportunity to be admitted to the Second Architectural Degree is the highest honor conferred by the Board.

It is the conviction of the Board that the curriculum should be designed to enable the student, when he has served his term, to be able to take up the practice of architecture. It is recommended that the entire program be organized for the student's entrance into one of the schools that construction is the basis of return, and its correlative principle that architecture is the relation of construction into forms of aesthetic value. The student should therefore be trained primarily in construction—that is, in the composition of form and the use of materials best adapted to meet a given problem without regard to distinctive styles. The problems should, in the first instance, be elementary, becoming more intricate as the student advances, and should be handled from the standpoint of the constructor, the object being to familiarize the student with the actual facts of building, and to train him to use his brains in dealing with building. As supplementary to this, and in order to furnish the student with material on which his mind can work by analogy, he should also be introduced to forms of proved efficiency—that is, to examples of architectural form which illustrate the solution of

building problems in the past in any form of architecture, classical, medieval, or other. The genius of these famous constructional and social conditions should be explained to him and he should be taught to understand that architecture is the result of actual and specific problems. The history of architecture is a preliminary course from the point of view of architecture.

As the object of teaching facilities, it will be necessary to lay the theoretical basis of constructional problems. The science should therefore be the course in these subjects suitable for practical purposes.

Drawing, as the vehicle of dealing with the problems of freehand, perspective, and problems. It is necessary to teach in the course the student to put his ideas out regard to the problems.

Generally the student should be taught to put his ideas out regard to the problems. The student should be taught to put his ideas out regard to the problems.

III. Architecture of the past

IV. The study of architecture in the past should be evolved in the construction of the past and of constructional conditions and conditions in the study of construction in most studies of the past.

V. The study of the history of architecture in so far as it illustrates and explains the evolution of architecture through historical and material and social conditions.

architectural drawings. The student should from the first be encouraged to supplement his studies by rough freehand sketches in the nature of marginal notes, in order that he may realise for himself the actual shape and form of his constructional details, and be trained in imagination to see all round a building.

Students should also be taught to measure and draw standard examples of architecture. Some training should be given in freehand drawing, but too much time should not be devoted to this.

IV. The teaching of design should deal with the solution of easy constructional problems in specified subjects, progressing to more advanced but simple exercises, such as the design of the various methods of covering a given space for a given purpose. In such exercises the student should be taught to use at the best practical use of material and to produce designs without attempting the introduction of ornament. A large series of known examples and designs of buildings of various historical phases of historical style should be used to illustrate the principles of design.

V. The teaching of the history of architecture should be planned with the object of showing the student the evolution of the methods of construction and the development of the various schools of architecture. The student should be taught to follow the development of the various schools of architecture and the evolution of the various methods of construction. The introductory lectures should include lectures showing the general architecture through constructional and actual specimens, the use of the line, the column, the arch, the dome and vaulting, the modifications due to conditions of place and materials, the rise and development of historical schools of building, together with studies of individual buildings considered as examples of actual methods of dealing with difficulties of construction. In lectures on the history of architecture the attention of the student should be directed to the historical development of style and construction in the successive periods of architecture, rather than to subjects of style, which at this stage are too general and abstract. It should be so far as the student is able to understand the constructional details of buildings, which are recommended as a means of showing the student the evolution of thought and design in architecture.

The study of materials, construction and applied mechanics should form the first practical study in the schools and in the laboratory or workshop, where practical demonstrations would be given of the subjects studied in the schools, and the student would be familiarised with the materials of construction and the various processes of the building trades.

Each architectural school should be provided with specimen materials and models of details of construction and of buildings. These are regarded as indispensable to the proper equipment of architectural training schools.

The advanced course would follow on the completion of the two years' introductory course, and would be taken during the term of training in an architect's office. The studies would be in continuation of those undertaken in the introductory course, but the student's attention should now be drawn to more complex problems of construction and design. The following subjects are recommended for the advanced course:

I. The further study of materials, including iron and steel, their properties and application, strength, weight, and preservation. The further study of construction to include foundations in bed rock, retaining walls, inverted siphons, subsoil drainage, drains and sewers, brickwork and masonry of all kinds, stone arches, stone dams, and their cutting out, vaults and domes. Fire-proofing, concrete, shoring and underpinning, and methods of dealing with dangerous structures, battering, concrete construction, including concrete dams and vaulting, methods of forming built-up girders and columns, riveted and bolted, welded steel and iron construction, methods of constructing wooden spars, domes, cupolas and lanterns, lanterned lanterns of lanterns and the like. Internal plumbing, hot and cold water supply, heating and ventilation, sanitary plumbing, and methods of ventilating drains and sewers, elementary instruction in electric light installations.

II. (a) Designs to specified programmes, e.g. cottages, farm buildings, houses of a given cost, schools, churches, hospitals, municipal buildings. (b) designs in civil architecture, that is, schemes for the layout of streets, squares, public spaces, parks and gardens.

It is recommended that designs of these (a) should be carried through as complete schemes in accordance with building specifications and report.

The student's attention should be particularly directed to the study of scale and proportion, the critical selection of methods, and the spacing and disposition of buildings and parts of buildings, rather than to the elaboration of details of ornament.

III. More advanced studies in the history of architecture. It is recommended that these should deal with such subjects as the development of specific schools of building, the analysis of various uses of materials and methods of construction as exemplified in historical buildings, the critical study of proportion and composition. The student should be trained in the preparation of short written studies as recommended above.

IV. Architectural drawing of a more advanced kind. Where facilities exist for drawing from the antique and the life it is recommended that the student should avail himself of the instruction given under fully competent teachers. Such studies should not interfere with the time allotted to the subjects already enumerated.

Ve. It is recommended that students should have a much training in reasoning as will enable them to handle the general mass, nature, and proportion of knowledge and to handle the

subjects as professors and have conveniently for them given in the course of training in the group.

In putting forward the point that the student should be able to handle the mass, nature, and proportion of knowledge and to handle the subjects as professors and have conveniently for them given in the course of training in the group.

Recommendations

1. The student should be able to handle the mass, nature, and proportion of knowledge and to handle the subjects as professors and have conveniently for them given in the course of training in the group.

THE ARCHITECTURAL ASSOCIATION

15, TULLOCH STREET, WESTMINSTER, S.W. (Opp. St. Victoria.)

COUNCIL

Walter Gropius [F.] President.

[F.] and Henry Chamberlain [F.] Vice-Presidents.

W. Curtis Green [A.]

Sir A. Brindley Thomas [F.]

A. Norman Kinnaird [A.]

J. W. R. Woodcock [A.]

Walter Gropius [A.]

Architectural Association, Treasurer

Walter Gropius [A.]

15, TULLOCH STREET, S.W.

Members are carried on the list of the Institute of Architects, and are entitled to the same privileges and to the same membership. The Association is open to all who are interested in the study of architecture, and the membership is open to all who are interested in the study of architecture.

At the time of the Architectural Association, any member of the Association is entitled to be a member of the Royal Institute of British Architects, provided he is a Fellow or an Associate of the Institute.

The office of the Association is situated at 15, TULLOCH STREET, WESTMINSTER, S.W., where the General Meetings are held. The office of the Association is open for inquiries from 10 a.m. to 7 p.m., and the Loan Library is open for the exchange of books between 10 a.m. and 7 p.m.

Satisfactory proof. Members under the age of twenty-three years are allowed the use of the Library of the Institute, and are furnished with passes for that purpose.

A complete course of instruction is given by means of a School of Architecture under the supervision of Mr. H. P. G. Maule [F.], assisted by qualified masters and staff.

The Day School (Mr. H. P. G. Maule [F.], Master) provides for two years of study, and the pupils are then expected to enter Architects' offices as articled pupils for a short period, and attend the Evening School (Mr. Chas. H. Marshall [A.], Master) which provides for more advanced and continuous study. A four years' continuous evening course is also available. Students in the Evening School may, if desired, prepare for the Institute Intermediate or Final Examination, and qualify for candidature as Associates R.I.B.A.

The drawings prepared in the Architectural Association Day School during the first and second years may be submitted to the R.I.B.A. Board of Examiners by candidates for admission to the Intermediate Examination, in lieu of the Testimonies of Study as required by the conditions laid down in the programme of the Examination, and if these are satisfactory the candidate may be admitted to the Examination.

Students having passed through two years in the Day School and two years in the Evening School will be entitled to complete exemption from the Intermediate Examination if their work is approved by the Masters and the Board of Examiners.

Mr. Basil Champneys and Mr. Leonard Stokes [F.], who have been appointed by the Board of Architectural Education to act as Special Visitors, will keep themselves in touch with the work of the Schools and confer with the Master from time to time as to the progress and the methods adopted.

THE DAY SCHOOL CURRICULUM

Master: H. P. G. MAULE [F.].

Assistant Masters:—First Year: H. L. SAMPSON, T. O. POTTER, and ALAN POTTER. Second Year: H. A. DOWGLASS [A.], L. M. GORON [A.], and ALAN SNOW.

First Year's Course:

The Studio:—

The use of instruments and scales.

Freehand drawing.

Elementary Perspective.

Orders of Classic Architecture.

Elements of the various styles of Architecture.

Elementary Construction.

Sketching and measuring details and portions of existing Buildings.

Lectures:—

History of Architecture, 36 Lectures

(*illustrated by visits to Buildings and Museums*).

Elementary Construction and Materials, 36 Lectures

(*illustrated by visits to Workshops and Buildings in progress*).

SECOND YEAR'S COURSE:

Students are not admitted to this course unless they have given satisfactory proof of study, work, and progress throughout the First Year.

The work of the second year mainly consists in working out simple problems in design. These problems may be divided under two heads:—

Historical and Practical, and take the form of amplifying the ground covered during the first year in architectural evolution, and the study of modern construction and materials.

The nature of the first the constructional development of historic architecture can be better understood, and the full significance of the various unit-forms of construction, such as lintel, column, arch and dome, better grasped.

The working out of these problems is accompanied by visits to museums and historic buildings, by systematic reading and the study of illustrations and photographs bearing on the work in hand. By means of the second the Student is kept in touch with modern building materials and actualities. In all cases the subjects given are of a simple character, relying entirely for effect upon proportion and disposition and the rightful use of the materials selected.

In all cases the Student is taught to think out his design by the aid of perspective.

In addition to the visits to works in progress, the Students will attend Classes in which competent mechanics will demonstrate the processes of the more important of the building trades.

These classes will include Masonry, Carpentry and Plastering demonstrations, the two former courses being given on the premises, while the Plastering demonstrations take place in the workshops of a well-known Plastering Company.

Consequent visits are also made to buildings bearing upon the subject in hand.

For instance, the Second Year Student has open to him, gratis, all the subjects in the First and Second Years of the Evening School.

Work in the Day School is carried on daily from 9.45 a.m. to 5 p.m., and is varied by visits to buildings, galleries, and works in progress.

The School is visited by the Master, whose assistants are in constant attendance during the working hours of the School.

The lectures are delivered by the Master on two afternoons in the week. There are 72 lectures, 36 on the History of Architecture, and 36 on Elementary Construction and Materials: twelve lectures on each subject during term.

Following is the programme of the Evening School for the first year, which run concurrently:—

THE EVENING SCHOOL OF NIGHT-TIME

Master: C. E. YARBROOK, JR.

Assistant Master: A. C. DICKIE, A.T.

(Assisted by a qualified staff)

The Evening School carries on the work of the Day School for a fourth year, covering the same material in a systematic way. It is also made for those persons who may have been out of school for a number of years. The Evening School has the same excellent teachers as the Day School, but the fee is reduced to \$1.00 per month. The Evening School has a four-year course in bookkeeping, and a two-year course in shorthand, but with such good teachers as are mentioned above, the reduced time available.

The Student, on the contrary, at the Central School, could spend four months, and at the High School, where he can pursue his studies under the direction of the Master for a further year or two more.

FIRST YEAR

STANDARD

- The use of drawing instruments and aids. The representation of buildings. Freehand drawing. Drawing styles. Elementary perspective drawing.

FOURTH YEAR

Lectures

It has been arranged that the first part of the fourth year should be devoted to a course of lectures and practical work on the subject of the construction of buildings. The second part of the year will be devoted to a course of lectures and practical work on the subject of the construction of buildings.

The first part of the year will be devoted to a course of lectures and practical work on the subject of the construction of buildings. The second part of the year will be devoted to a course of lectures and practical work on the subject of the construction of buildings.

DISCUSSION SECTION

Members: K. Gammell (A.), Vice-Chairman: M. G. Penhall
Hon. Secretaries: A. B. Bolton and Stanley Hays (A.)

The object of this Section is to afford opportunities for the study of the subjects and questions which arise in actual engineering practice, meeting with difficulties in the course of his work, and to bring the matter before the Section, with a view to a discussion. A Chairman of special experience in the subject should attend each meeting and sum up the discussion. Meetings are held on alternate Wednesday evenings.

SCHOOL OF DESIGN, ELEMENTARY AND ADVANCED

The Classes meet on the dates stated below, under the direction of an Architect-Inspector.

ELEMENTARY CLASS

1907	List of Subjects	Teacher
Oct. 22	A Flèche for a medium-sized Church	Cl. H. Bellhouse (L.R.I.B.A.)
Nov. 10	Details	
Dec. 17	Small Garden House	
1908		
Jan. 7	Details	
Feb. 4	Additions to an Existing House	Harriet Field (L.R.I.B.A.)
Feb. 25	Details	
Mar. 17	Church Fane	W. A. P. (L.R.I.B.A.)
April 7	Details	

ADVANCED CLASS

April 28	Details	

Full particulars as to subjects, dates, and fees, may be obtained from the Secretary, 10, Abchurch Lane, London, E.C. 4.

All designs to be sent to the Secretary, 10, Abchurch Lane, London, E.C. 4, before the closing date.

In all the above subjects, which design has to be submitted at one meeting for criticism. The design must then be completed for final criticism at the ensuing meeting.

PRIZES—OPEN TO ALL MEMBERS OF THE ASSOCIATION

The Association Travelling Studentship, value £25 per annum with silver medal.—Candidates must be members of the Association under the age of twenty-five years and have passed satisfactorily through the Advanced Class of Design. The drawings to be submitted comprise two sketches from existing buildings; three sheets of measured drawings from buildings, to include one drawn to 1-inch scale, and one drawn to half-inch scale; one sheet of full-size details, and three designs worked out in the Advanced Class of Design in any location. (If the measured drawings are not those made upon the spot the original sketches must be submitted in addition.) A cash prize, value £5, is awarded should the drawings be deemed of sufficient merit.

The Association Medal, together with Prize value Ten Guineas.—Subject: "A Small Club for a Country Town."

The Essay Prize, value Ten Guineas with Silver Medal.—Subject: "Development of House Planning, 1500 to 1800 A.D."

The Andrew Oliver Prize, value Five Guineas.—This prize is offered annually by Mr. Andrew Oliver in connection with the class for Sketching and Measuring, with a view to encourage the measuring of old work among the younger members.

School of Architecture Prizes, consisting of medals, travelling studentships value £15, and books.

The **Hamister Fletcher Bursary**, value Twenty-five Guineas, and a Medal, is given by Mrs. Hamister Fletcher for the promotion of the study of London architecture since the Great Fire and for the preservation of records of buildings likely to be destroyed. It will be awarded to any member of the profession (including non-members of the Architectural Association), without limit of age, who shall submit his first selection of measured drawings, not necessarily prepared for the purpose of this Bursary, together with a short descriptive report of the buildings to which they refer, and accompanied by three testimonials. The successful candidate will be required to prepare a set of accurate measured drawings of one of the buildings of the prescribed period in his selected category.

The Bursary is open to candidates of any profession. (Next Competition begins 1904, March 1st.)

THE ROYAL ARCHITECTURAL MUSEUM

The Royal Architectural Museum, located in the same building as the Architectural Association, is under the patron and control of the Association, and is open to the public daily between the hours of 10 a.m. and 4 p.m.

Special

Subjects [1] and [2] and [3] and [4]

Courses: One E. P. [1] and [2]

There are two main courses: (a) The Degree course (three years); (b) the Certificate course (two years). The Degree course leads to the degree of B.A. (Honours in Architecture) which has recently been instituted by the University of London. It provides an opportunity for architectural students to continue their general studies at the same time that they are commencing their professional training, and also brings them into touch with students in other departments who are

different from the other persons in
the same line of work. The school of Fine Arts
and the school of Music are also valuable aids to
the study of the history of the world.

There is a great deal of work to be done in the
history of the world. The study of the history of the world
is a very important part of the education of every
person. The study of the history of the world is a

(b) Elementary Design Class

First and second terms only. Lecturer, Mr. C. H. Foxe. Thursday from 6.20 to 8.20. Fee—10s. 6d. for the two terms.

Candidates for the Degree are required to pass the Matriculation Examination of the University before commencing the course. Examinations are held in January, February and September. For full particulars of the Degree and Certificate Courses and the Evening Classes, see notice to the University, University College.

KING'S COLLEGE, LONDON.—Division of Architecture

Division of Architecture, King's College, London. The Division of Architecture is a part of the University of London, and is situated in the Strand, London, W.C.2.

Day Session.—The Division of Architecture is intended to give Students who are preparing for the degree of Bachelor of Architecture a thorough and systematic course of instruction for the practice of the profession. It is an integral part of the education of the student, and the Division of Architecture and the Division of Building have been united, and the curriculum is governed by the Senate. Education has been given to the student, and should be able to pass the B.A. Examination in his second year, and the B.Sc. Examination in his third year or even earlier.

Matriculated Students are those admitted to the full prescribed course of study and are eligible for the College Certificate in Architecture and the Associateship of the College. This course must be taken by students proceeding to the B.A. degree of Honours in Architecture recently instituted by the Senate of London University.

Non-Matriculated Students are those who do not desire to take up the full course; they may join the Architectural Division for any period not shorter than one term, and can arrange with the Professor to pursue any course of study they desire, and such students need not necessarily devote all their time to work at the College. They may take up work in the Studio only, or one or more courses of lectures.

Students attending a two-year course and who obtain the first-class certificate are considered for the B.Sc. Intermediate Examination.

A Special Class has been arranged with a view to meeting the requirements of students who have already had training in an architect's office and desire to devote a season to prepare themselves for examination, enabling them to take all the necessary lectures in a single year, but to use the Studio for the preparation of their dissertations of study. This course will be found of special value by students coming to London from the country or the colonies with a view to passing the

and Final Examinations of the R.I.B.A. Students
in regular course are at liberty to extend their
study to the full term of three years. Matriculated
students who have passed to the Archi-
tects and

ment, Decorative Painting, and

THE UNIVERSITY OF CHICAGO

LONDON COUNTY COUNCIL SCHOOL OF BUILDING

Ferndale Road, Brixton, S.W.

Director of Architecture and Lecturer, Postgraduate Diploma (P.D.)
(Assisted by J. B. FULFORD [A.], Drawing Lecturer, A. B. H. JAMES,
A.R.C.A. Lond. (Architectural).

This school has been established by the London County Council to enable architects and others engaged in the building and allied trades to acquire an intimate knowledge of the principles underlying the processes they have to carry out in their daily work. Workshops have been provided and equipped for the practical teaching of the several building trades in connection with their work with or buildings and in building shops.

A school of architecture with course of instruction in the history of buildings and for the study of architectural design and planning, together with the preparation of architectural drawings, has been added as part of the complete scheme of the work of the school.

Lecture rooms, drawing offices and laboratories have been arranged in connection with the workshops for the practical work of the school may be combined with that of in building construction, designing architecture and the construction and progress of a building. Every facility is given for the work and the various trades and in connection.

Great importance is attached by the Council to the practical combination of the studies in the several trades and branches as required by a master builder, foreman or architect, and the Architectural Director of the School has been appointed for this purpose. Facilities are therefore given for combining architectural studies in practical and theoretical work in the work-shops, lecture rooms and drawing offices.

Courses of special lectures open to all students are held each session upon architectural and scientific subjects in connection with the work of the school.

Classes are held from 7 to 9.30 every evening except on Friday. The following is the Architectural Course.

Architectural Design (Intermediate Design). This course is given for instruction in practical modern design and the drawing of such buildings for various purposes. Lectures are given by Professor Harrison F. J. as follows:—Sept. 25—A small Village Church; Oct. 25—A Villa Residence; Nov. 27—An Artistic Building; Jan. 2, 1926—A Ballroom Room; Jan. 23—A small Public Library; Feb. 25—An Entrance Lodge and Gates; Mar. 25—An Art School; April 30—A Church Extension. Sketch designs are prepared during the month, under the superintendence of Mr. J. B. Fulford [A.]. The subject for the sketch design is set at each lecture with the examples and references necessary for the study and preparation.

Architectural Design (Advanced Design). Students in this course prepare designs for submission for the following examinations and awards: Board of Education in Architectural Design, the National Competition, London County Council Art Scholarship, the R.I.B.A. Examinations. The course includes instruction in the design of modern buildings of public,

... and ecclesiastical character. As an instruction is also given in the preparation of working details and the design of full-size mouldings. The work of the class is under the general superintendence of Mr. J. B. Fulton. Lectures upon examples, and criticisms of the students' work, are given by Professor Herford Pitt.

ARCHITECTURAL DRAWING, INCLUDING PERSPECTIVE.—Instruction will be given in Architectural drawing, by copying good examples; setting up elevations and sections from plans to the usual scales; preparing details from small-scale drawings and full sizes; drawing in pencil, ink, in colouring and lettering plans. Experience is attached to the cultivation of a clear style of drawing. The course also consists of the drawing of historical examples of Architecture, and of sketch plans and elevations of ancient buildings. The orders, the setting out of arcades, methods of drawing the joints and the projection of working, among other subjects, are demonstrated, and the construction of architectural perspectives from elevations and plans is taught. The students of this course are under the instruction of Mr. A. R. H. Jackson, and the general direction of Professor Herford Pitt. Students are recommended to continue a course in the elementary freehand drawing class with the object, so that the freehand portions of architectural geometrical drawings may be speedily executed in. A sketching and modelling class is to be formed to work at the Victoria and Albert Museum.

ARCHITECTURAL HISTORY. This course consists of lectures by Professor Pitt upon the history of building, illustrated by diagrams and lantern photographs. The following is the Syllabus:—

(A) GREEK.—1. Origins and Divisions; 2. The Doric Order; 3. The Parthenon—Theophrastus Propylaea; 4. The Ionic Order—Erechtheum—Maison Ionia—Epheum; 5. The Corinthian Capital—Choragic Monument—Tower of the Winds and Jupiter Olympus at Athens.

(B) ROMAN.—1. The Roman Orders—Superimposition—Colosseum; 2. The Pantheon; 3. Baths of Galerius—Galla Placidia Tomb; 4. Basilicas—Early Christian Churches.

(C) BYZANTINE.—1. St. Sophia, Constantinople; 2. Byzantium and Ravenna; 3. St. Mark's Venice.

(D) GERMAN ENGLISH.—1. Saxon; 2. Norman; 3. Early English; 4. Decorated; 5. Perpendicular; 6. Middle and Late Gothic.

(E) RENAISSANCE.—1. The Palazzo Medici—Brancaccio; 2. St. Peter's, Rome—Basilica di Michelangelo; 3. Palazzo Medici—Elizabeth in Italy; 4. St. Charles Borromeo—St. Paul's London; 5. Later Renaissance.

A course of six lectures, illustrated by lantern photographs, is to be given upon a special subject at the end of the above course, after the Board of Education Examination.

STUDIES AND MODEL DRAWING AND BUILDING TACON SYSTEMS (EXPERIMENTAL).—This class is intended to furnish instruction and practice in freehand drawing of architectural forms and details as will be useful to all engaged in setting out and working to a larger scale from small-scale sketches.

In the ADVANCED STAGE instruction is given in freehand drawing of architectural features in relief and perspective, such as a capital—simple methods of shading in pencil, charcoal, and water colour.

LETTERING AND INSCRIPTIONS FOR DRAWING.—The Syllabus includes the application of lettering for use on architectural and other drawings in titles, inscriptions, &c.

PERSPECTIVE SKETCHING OF BUILDING CONSTRUCTION DETAILS.

VENUE

...as heads of Arts and Intermediate, the various departments of Fine Arts, including (b) from the Faculty of Architecture, Modeling, and Industrial Design, and (c) from the Faculty of Ornamental Design, is under the general supervision of the Dean, F.B.A., of the Central Mechanical side of the College.

Building Construction, Engineering, Surveying, and Drawing and Quantitative Surveying, under the direction of Mr. Henry Holt [A.] of London. Mr. Holt also gives classes in Architectural Drawing and the History of Architecture. Evening classes are held in connection with all the subjects mentioned. The Calendar of the College can be obtained on application to the Registrar, Mr. F. H. Wright.

The Bristol Society of Architects has Bristol for its centre (11), and Gloucestershire, Wiltshire, Somerset, and Dorset for its province [p. 257].

The Cardiff, South Wales, and Monmouthshire Architects' Society has Cardiff for its centre (12), and Glamorgan, Brecknock, Radnor, Hereford, Monmouth, Carmarthen, and Monmouth for its province [p. 258].

The Devon and Cornwall Architects' Society has Exeter for its centre (13), and Devonshire and Cornwall for its province [p. 259].

In Scotland the Glasgow Architects' Society has Glasgow for its centre (14), with the shires of Argyll, Inverclyde, Lanark, and Renfrew, Argyll and the Isles for its province [p. 260].

The Edinburgh Institute of Architects has Edinburgh for its centre (15), and the shires of Perth, Fife, Kinross, and Clackmannan for its province [p. 261].

The Aberdeen Architects' Society has Aberdeen for its centre (16), and the shires of Aberdeen, Inverness, and the Orkney Islands for its province [p. 262].

The Dundee Architects' Society has Dundee for its centre (17), and the shires of Dundee, Perth, Fife, and Angus for its province [p. 263].

The Glasgow Architects' Society has Glasgow for its centre (18), and the shires of Glasgow, Renfrew, Lanark, and Argyll and the Isles for its province [p. 264].

The Edinburgh Institute of Architects has Edinburgh for its centre (19), and the shires of Edinburgh, Perth, Fife, and Kinross for its province [p. 265].

The Glasgow Architects' Society has Glasgow for its centre (20), and the shires of Glasgow, Renfrew, Lanark, and Argyll and the Isles for its province [p. 266].

The Edinburgh Institute of Architects has Edinburgh for its centre (21), and the shires of Edinburgh, Perth, Fife, and Kinross for its province [p. 267].

The Glasgow Architects' Society has Glasgow for its centre (22), and the shires of Glasgow, Renfrew, Lanark, and Argyll and the Isles for its province [p. 268].

The Edinburgh Institute of Architects has Edinburgh for its centre (23), and the shires of Edinburgh, Perth, Fife, and Kinross for its province [p. 269].

The Glasgow Architects' Society has Glasgow for its centre (24), and the shires of Glasgow, Renfrew, Lanark, and Argyll and the Isles for its province [p. 270].

In Australia the Architects' Society of New South Wales, located in Sydney, is the accredited representative and agent of that colony in its relations with the Institute [p. 317].

EDUCATIONAL FACILITIES IN BIRMINGHAM.

Municipal School of Art.—An Architectural Curriculum, approved by the Museum and School of Art Committee and the Birmingham Association, is in operation as below. The course extends over four years, the yearly session being set into two terms of about five months each. For first, second, third, and fourth years, the course includes work which occupies the morning, afternoon, and evening in year three lessons a week. Mr. Herbert E. Davidson is special lecturer on architectural design and construction. Mr. W. H. Bidlake and Mr. A. J. B. Smith [1935] architectural history. Mr. Thomas W. Hornsley also gives instruction in architectural model construction, and Mr. Francis B. Andrews [2] is assisted by Mr. Ralph Kerrill [4] in building construction. The following is the syllabus:—

FIRST YEAR.—1. Elementary architectural design (model drawing, plan drawing in outline, and perspective). 2. Elementary light and shade in perspective. 3. Elementary architectural history (elementary stages). 4. Building construction (elementary).

SECOND YEAR.—1. Architectural design (model drawing and architectural history). 2. Building construction (intermediate). 3. Building construction (advanced). 4. Building construction (special design of ornament in line, light and shade, and water, or working out the designs of the special designs).

THIRD YEAR.—1. Ornamental design (modelled). 2. Antique life. 3. Architectural history and architectural design. 4. Building construction. 5. Colour.

FOURTH YEAR.—1. Antique or life. 2. Architectural design (architectural design, by Mr. Bidlake and Mr. Davidson respectively).

There is also a course of evening classes, which include most of the above named studies, for attendances on evenings a week, 5s. per term of twenty weeks for students under eighteen years of age, and 7s. 6d. per term for students. Morning, afternoon, and evening classes are held on five days a week. (Class lectures are delivered throughout the session on geometrical drawing, perspective, practical plane and solid geometry (Stages 1 and 2), building construction and drawing (Stages 1, 2, and 3, and honours), architecture, architectural history, architectural design (elementary and advanced stages), history of art, and anatomy. The school has a good library, and a large collection of casts and other examples. There is a special room for drawing from living animals and birds. Valuable prizes are offered for architectural work. Secretary:

[Public: H.
Gardens and]

Edward C. Davis [M] Hon. Secretary.
J. A. Hon. Assistant Secretary.
The Garden Society, Warrington and Macclesfield
The Society was founded in 1890. The objects of

To attain this mission of high-
order questions of professional practice, to
afford facilities for the study of architecture
as a medium of human communication
and as a means of advancing the progress of
the human community, the Institute of Architecture,
which, with the American Institute of Architects,
has been the dominant force in the development of
the architectural profession in this country, is
now being reorganized to meet the needs of the
future.

The Institute of Architecture is a non-profit
organization which has been in existence since
1911. It is a national organization with
branches in all the major cities of the United
States. The Institute has been the leading
force in the development of the architectural
profession in this country. It has been the
leading force in the development of the
architectural profession in this country.
It has been the leading force in the
development of the architectural profession
in this country. It has been the leading
force in the development of the architectural
profession in this country. It has been the
leading force in the development of the
architectural profession in this country.

architectural casts, the numerous and carefully selected works on architecture in the technical library, together with the teaching of the staff, are of valuable assistance to candidates preparing the studies required for admission to the Examinations.

THE DEVON AND EXETER SOCIETY

[Province: Devon and Cornwall. Cities: Exeter.]

Hon. Secretary

John J. Hunt, 5, Bedford Circus, Exeter.

The Devon and Exeter Architectural Society was founded in 1851. The objects of the Society are—

a. The promotion of union and professional integrity among its several classes of members, the establishment as far as possible of uniformity of practice, and the general advancement of Architecture and the Arts and Sciences connected therewith. b. To secure an entrance to the profession of the Architectural profession. c. To maintain its acknowledged code of professional observance and rules of practice. d. To obtain and render information respecting Competitions and other matters affecting the profession, and where practicable, to advise Committees or others desiring practical aid, and to endeavour to ensure equitable terms and awards. e. To enforce the Regulations for Competitions issued by the Royal Institute. f. To afford mutual assistance by advice or mediation, in cases of misunderstanding. g. A Library for the use of the members.

The Society consists of three classes of members, viz. Members, Associate Members, and Associates, wholly engaged as architects and surveyors, and not connected with any of the building trades. Members are architects in practice on their own account or in partnership. Associate Members must have qualified as Associates R.I.B.A., or have served as assistants for not less than five years in the office of an architect eligible as a Member; except at the election of the Council, they have full voting powers, but are not eligible for election on the Council. Associates include assistants who have duly served articles, and promoted pupils in articles. Associates enjoy all the privileges of membership except that of voting. The Council have the entire management and direction of all the affairs of the Society. The Meetings of the Society are held at various dates. Special Meetings may be convened by the President on the requisition of four Members of the Society; or by the wish of the Council. Prizes are offered to the pupil Associates for measured drawings. Arrangements have been

made for members to join the Architectural Association Class of Design. The Society possesses a Library for the use of members.

in practice for at least two years prior to election, and architects assistants who have served in that capacity for a period of seven years; members must be at least twenty-five years of age. Associates: architects and assistants who are not qualified for membership and pupils. Honorary Members: those who are interested in the sphere of the Institute's work; they may only be elected by the Council. Members only are eligible to vote and to sit on the Council. The Annual General Meeting is held in June. Ordinary Meetings may be called when required. Meetings at which papers are read are held during the winter; prizes are given to students for fresh and sketches, and drawings and designs.

... Gothic ... The great Monastic ... The characteristics of styles during the late Norman, Early English Decorated, and Perpendicular periods.

Comparison of Continental and English Gothic. The Renaissance in architecture in Italy, France, Germany, Belgium, England, and Spain. Later Renaissance. The revival of Gothic. Renaissance architecture.

The work of the classes in Architectural Design consists in the preparation of designs for buildings, and a part of these by the teacher, with a group lecture and review. The lectures deal with the materials used in building, the advantages of studying and practicing the use of a knowledge in historical architecture, and application to modern designs. The principles of planning, fitness, stability, beauty, the grouping of buildings, contrast, dignity, and effectiveness, the selection and choice of a site for a building, drawing, and construction, heating, and lighting. Special experiments in building construction in connection with the study of the history of architecture.

The subjects for design this year will be:
Junior Students: (1) A plan of a house for a family of four.
A Renaissance Drawing of a house.
Motor House and Garage.
urban Residence; (2) A plan of a house for a family of four.

How I Became

Colin R. Cowan, 17, Fork Place, New York

The Edinburgh Architectural Association was founded in 1858, its object being to promote and extend the study of Architecture and to serve as a centre for friendly communication between the architects and those interested in Architecture. It comprises 1,200 members, and four classes of membership, namely: 1. *Ordinary*, who are practising architects or persons who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture; 2. *Associate*, who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture; 3. *Associate*, who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture; 4. *Associate*, who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture, or who are persons engaged in the study of Architecture.

practical work in the drawing-office. There is a two years' course in Engineering Drawing recommended for students proposing to become architects or surveyors. The courses of lectures are in Engineering and Building Construction.

West College, Edinburgh.—This College has a course in Architecture and Building Construction. The course has been organized on a complete basis, and has been approved with honours by the University of Edinburgh. The course is divided into three parts, in which a student is required to study the principles of Architecture, Building Construction, and Drawing. The course is taught by the Principal, Mr. James Clerk Maxwell, and by other members of the staff. The course is open to students of the University of Edinburgh, and to students of other universities who have obtained a first-class honours in the Natural Sciences.

Formulate drawings of buildings from plans and elevations, exterior and interior, showing the methods of setting up, finding vanishing points, horizon, and the rendering of structure in pencil, ink and color.

Edinburgh School of Art, Royal Institution.—The curriculum of the Architectural Section of the School of Art extends over five years and the basis of the teaching is an education in confidence in the study of Renaissance and Modern Art. Colour, Decorative Modelling, Figure Drawing, Perspective and Design and their application, with a view to enabling a student to pass the examinations of the Royal Institute of Architects, a course of about twenty lectures on technical subjects is given during the first few months. Various awards are made to students who merit encouragement, the money to be spent in visiting and making studies or work in Scotland illustrating the Art the student follows. Two Scholarships for the study of Scottish National Art, of the value of £52 each per annum, are open for competition to students of the school. Travelling Bursaries are awarded to meritorious stu-

[Provinces: Counties of Dumfriesshire, Galloway, Kirkcubright, Wigtown, Argyll and the Isles.]

The Glasgow Institute of Architects was the 18th September 1900, under the Companies Act 1867. The object of the Institute is to promote the interests of the members and to advance the art of architecture.

(1) The advancement of the art and science of photography and cinematography by direct or indirect aid, either financial or otherwise; (2) The advancement of the art and science of photography and cinematography by direct or indirect aid, either financial or otherwise; (3) The advancement of the art and science of photography and cinematography by direct or indirect aid, either financial or otherwise.

the interests of the architects of Glasgow:—(4) The establishment of a uniform rate of charges by the members for professional business, in which no special agreement as to remuneration is made by the fee. (5) The doing all such other things as are incidental or conducive to the attainment of the above objects.

In May 1907 the membership of the Institute was considerably altered. Under an arrangement the late members of the Glasgow Architectural Association, which had been dissolved, were admitted to the Institute as Associate Members and Lay Members. The Institute now consists of the Council, the Fellows—who must be architects in practice and at least twenty-four years of age, and have been at least five years in practice or assistance in architectural offices recommended as such by the Council, or must be engaged in prosecuting the study of architecture, and a considerable number recommended by the Council or Fellows of the R.I.B.A. *Honorary Members*—persons who are distinguished for their attainments, or who have been or are likely to be useful to the Institute and recommended by the Council. *Associate Members*—who must have been at least three years as pupils in an architectural office recognised as such by the Council, or who have had such other training as the Council shall recognise as

Student Members—persons who are engaged in the study of architecture. Student Members have no place among the Council and Library of the Institute, and although the members of the Associate and Lay Members are expected to attend the transactions of the R.I.B.A. and must submit to the same as Associate Members before they can become Student Members for five years. Lay Members are elected by a ballot Committee, consisting of two Associate Members, and the President of the Institute. Lay Members are entitled to attend and vote at all meetings of the Associate Members, but have a restricted voting power in the election of the Associate Members Committee and in the election of three representatives to the Council. The Council of the Institute manages the whole affairs of the Institute, and is composed of not more than twenty nor less than ten Fellows, in addition three Associate Members or Fellows, and three Lay Members. The separate affairs of Associate Members are managed, subject to the approval of the Council, by a Committee elected by them, of seven Associate Members or Fellows, the Associate Members being in the majority, and three Lay

F.A. Department of Architecture

55-1451-1-10

1. **Background:** The company is a leading provider of software solutions for the financial services industry. It has a long history of innovation and growth, and is currently looking for a new leader to guide the company through a period of rapid expansion.

2. **Position:** The position is a full-time, executive-level role. The ideal candidate will have a proven track record of leading large-scale organizations, with a focus on strategic planning, financial management, and operational excellence.

3. **Qualifications:** The candidate must have a minimum of 15 years of experience in a senior leadership role, with a minimum of 5 years in the financial services industry. A Master's degree in Business Administration or a related field is preferred.

4. **Responsibilities:** The primary responsibilities of the role include:

- Developing and implementing the company's strategic vision and goals.
- Managing the company's financial performance, including budgeting, forecasting, and financial reporting.
- Overseeing the company's operations, ensuring efficiency and effectiveness.
- Building and maintaining strong relationships with key stakeholders, including investors, customers, and industry partners.
- Leading and motivating the company's executive team and senior management.

5. **Compensation:** The compensation package is highly competitive and includes a base salary, bonus, and equity. The exact details will be discussed during the interview process.

6. **Application Process:** Interested candidates should submit their resume and cover letter to hr@company.com. The company will review applications and may request an interview.

The Diploma Office chooses the best international candidates and strongly recommends that they be given priority in admission to all four forms. A second group of candidates may be placed in a good secondary school, if possible, and a third in a University examination. The Diploma Office also is asked to take the following alternatives, which are placed in brackets, into consideration:

- (2) Full Day Classes for boys four years with attendance in an office during the vacation; then Boys' Department of the populace, which will be reduced to a minimum, in consideration of the time spent in the School.
- (3) Full Day Classes for boys four years with office attendance during the vacation; then Evening Classes for boys three years, with attendance in the office, which will be reduced to a minimum, as above.

THE ROYAL INSTITUTE OF THE ARCHITECTS OF IRELAND

[Founded in 1839, and re-incorporated in 1899. Dublin.]

Non-Resident:

James H. Webb, 21, Clare Street, Dublin.

The Royal Institute of the Architects of Ireland was founded in 1839. The objects of the Institute are—(1) The general advancement of Architecture; (2) The maintenance of the interests, status, and uniformity of practice of the profession; and (3) The maintenance of communication and friendly relations with other bodies associated in similar purposes. The Institute consists of four classes: members viz. Fellows and Ordinary Members, an Honorary Member, and Honorary and Corresponding Members. Fellows must be architects of good repute, being Members of the Royal Institute of the Architects of Ireland, and engaged in the practice of Architecture for at least seven years; they must be elected to the rank of Fellows by general vote of the Members on the recommendation of the Council. Members must be architects of good repute who have attained the age of twenty-three years, and (a) who have been engaged for at least seven years in practice as principals; or (b) seven years in the study of Architecture with a view to practice, including apprenticeship of not less than three years to a Member of the Institute, or of the Royal Institute of British Architects, or of the Societies allied to it; or (c) who shall have passed the Associate Examination of the R.I.B.A. for the time being; Honorary Members; and Honorary Corresponding Members—persons eminent for their works or scientific acquirements, not being British architects. Meetings of the Council are held the first Monday in the month, at 11 a.m., except during July, August, and September. The Ordinary General Meetings are held on the first Thursday in February, May, October, and November. The Annual General Meeting is held in December, at which Meeting the Council for the ensuing year is elected.

Mr. M. Mitchell [F], R.H., President [Member R.I.B.A. Council].

EDUCATIONAL FACILITIES IN LEEDS

School of Architecture in connection with the Leeds and Yorkshire Architectural Society.—The classes are conducted by arrangement with the University of Leeds and the Leeds Institute at their respective institutions. A curriculum has been arranged to cover nearly the whole of the subjects required for the Institute Preliminary, Intermediate, and Final Examinations, as follows:—

Preliminary.—Elements of plane geometry; geometrical drawing; elements of perspective; elementary mechanics and physics; freehand drawing from the mind.

Intermediate.—History of Mediæval and Renaissance architecture; theoretical construction; descriptive geometry; elementary applied construction.

Final.—Design (subjects quarterly adjudicated upon by the Council of the Society). The nature and properties of building materials (this class is held at the Society's rooms and conducted by its own lecturer). The arrangement and construction of buildings in relation to health; specifications and estimating.

In addition to the above courses the University of Leeds gives instruction in mathematics, mechanics, civil engineering, sanitary law, drainage and engineering problems, and the Leeds Institute in drawing, painting, designing, modelling, and carving. The Society arranges visits of inspection to old and new buildings, particularly during the summer months, and a course of evening lectures is given during the winter season.

The Society's library, comprising 254 volumes, is located at the reference department of the Leeds Central Public Library, and members of the Society may obtain the loan of books on production of certificate of membership.

The following prizes are offered annually by the Leeds and Yorkshire Society: the Society's Silver Medal and Five Guineas (given by the President) for measured

awards of old work; Three Guineas for drawings illustrating construction; Three Guineas for sketches of old work; Three Guineas for original design for a building; Two Guineas second prize; Two Guineas for an essay; One Guinea for best classwork at the Leeds Institute; Half-a-guinea second prize.

University of Leeds.—Students desirous of qualifying for the Associateship R.I.B.A. may have a special course arranged by consultation with the Art Lecturer and the Professor of Engineering at the University, such course to include facilities for executing the Testimonials of Study, preparing for the required examinations in both the Art and Science Sections of the programme. Day instruction is given in freehand drawing, sketching from natural objects, general art study, and design for the decorative arts in mathematics, mechanics, and civil engineering. Lectures on materials and building construction. There is a course of evening lectures on geology applied to sanitary and civil engineering.

The Leeds School of Art.—The work of the School is now controlled by the Education Committee of the City Council, and the Department of Architecture has recently been organised. Mr. G. J. Coombs, A.R.C.A. Lond., being appointed Head of the Department. Day classes have been formed for students who are prepared to give their full time to the course of study provided, and also for those who wish to divide their time about equally between the practical work of the office and study at the School. The course of study is arranged on a broad basis, and special opportunities are given for the study of Architectural Design as well as for study of the History of Architecture. Classes are held for preparing for the Preliminary, Intermediate, and Final Examinations of the R.I.B.A., and these classes meet with the approval and support of the Leeds and Yorkshire Architectural Society. Lectures are given on Tuesday evenings on Medieval Architecture, with the Renaissance in England; and in alternate years Greek and Roman Architecture with the Renaissance in Italy, will be the subject. At the classes in Architectural Design the subjects set are done rapidly in class and completed at home more at leisure, being afterwards criticised by visitors nominated by the Leeds and Yorkshire Architectural Society. Visits to buildings of note in the district and sketching are also included in the course.

EDUCATIONAL FACILITIES IN LEICESTER.

The Leicester Municipal Technical and Art School.—A course of instruction in Architecture has been arranged at this School in conjunction with the Leicester and Leicestershire Society of Architects, in accordance with the syllabus drawn up by the Board of Architectural Education [see

The Society consists of two classes of members—viz. Fellows and Associates. The Fellows are architects or surveyors who have attained the age of twenty-eight years, and who for not less than three years have been engaged as principals in professional practice. The Associates are persons who have attained the age of twenty-one years, and are engaged in the study or practice of Architecture or Surveying. There are also honorary classes for Honorary Fellows and Honorary Associates and a class for Students.

The Society has a Library and Reading Room which is open daily for the use of the members and students.

The Education Committee this year offer for competition to the students and members of the Society, whose age does not exceed thirty years, a Travelling Studentship, value £30, which will be awarded for the best design for an Assembly Hall in a suburban town to seat 500 people. The Committee also offer £15 in four prizes (two Firsts of £8 and two Seconds of £2) for measured work and small design.

Sessional Meetings are held from October to April inclusive. The Annual General Meeting is held in April.

requirement is the scheme propounded by the Board. The School is annually inspected by visitors representing the Board; the present inspectors being Mr. Reginald Blomfield, A.R.A. [F.], and Mr. Mervyn Macartney [F.]. Students who obtain a degree in the School or a first class certificate are exempted by the Royal Institute from its Intermediate Examination. The Royal Academy also exempts such students from probationary work before entering their School of Architecture.

As regards Preliminary Education, the Prospectus of the School says:—

It is very strongly felt, both by the University and by the Architectural Education, that intending students of architecture before entering upon a course of professional training, have first of sound and liberal general education. The best results are obtained full degree course in Arts or Science has first been taken; and are strongly urged to adopt this course wherever possible. Students propose to take a degree course in architecture, and who are graduates in Arts, Science, or Engineering of this or any other recognised University will be allowed a substantial reduction in the length of the course of required of them. Where a full degree course in Arts or Science is possible, students are strongly recommended at least to take the Matriculation examination of the University of Liverpool before entering upon a course of study. This examination must be passed by degree students before beginning their course; and though students who have not passed the Matriculation are at present admitted to non-degree courses, they stand in many ways at a disadvantage, particularly in that it is not open to them to consider freely at the beginning of their course whether they will take a degree course or not, or to pass from a diploma course to a degree course during their period of study should this seem advisable. All students, therefore, are strongly recommended to pass the Matriculation examination before entering.

The School includes a well-fitted studio, a lecture-room, a museum and cast-room. There is a large collection of architectural plates, drawings, photographs, &c., for the use of students. The Museum contains examples of building materials, models of building construction, and a representative collection of architectural casts. There is also a Departmental Library of reference books, including the chief folios of measured drawings of ancient and modern buildings.

The following particulars of the Courses of Study are quoted from the School Prospectus:—

There are two regular courses of study open to students—the Degree course and the Diploma course. A certificate is awarded to students at the completion of the first two years of the Diploma course, under conditions described below.

The Degree Course.—The degree awarded is the degree of Bachelor of Architecture (B.Arch.). Candidates preparing for any degree in the University are required before beginning their course to have passed the Matriculation examination, or to have obtained exemption therefrom and thereafter to have attended approved courses.

First Year's Course and Intermediate Examination.—The subjects of the first year's course of study and of the Intermediate examination are:—(i.) History of Architecture; (ii.) *Either* Ancient History or Modern History; (iii.) *Either* Pure Mathematics or Applied Mathematics; (iv., v.) *Two* of the following, *one* at least of which shall be a modern language:—Greek, Latin, French, German, Italian, English Literature, Logic, Pure or Applied Mathematics (if not taken under iii.), Physics, Chemistry. Before commencing a course of study for the Second examination, candidates shall be required to afford evidence, satisfactory to the Professor of Architecture, that they have attained a degree of proficiency in drawing necessary for the purposes of their architectural studies.

Second and Third Years' Courses and Second Examination.—The subjects of the second and third years' courses of study and of the Second examination are:—(i.) History of Architecture, with special study of an approved period; (ii.) Architectural Design; (iii.) Building Construction; (iv.) Mechanics of Structures; (v.) A subject in the Fine Arts other than Architecture. Candidates may also present as an additional optional subject *either* Drawing or Modelling. Candidates are required to present designs worked during the course of study and measured drawings of a building approved by the Professor of Architecture, and such work shall be taken into account by the examiners in making their award. Candidates are required to attend approved courses of instruction in all the subjects offered for examination.

Fourth and Fifth Years' Courses and Final Examination.—Candidates are required, after passing the Second examination, to spend at least two years, under conditions to be approved by the Faculty, in the office of a practising architect or in such other form of practical work as may be recognised, and to attend during that time courses of instruction approved by the Faculty of Arts either in the University or in some other recognised School of architectural training. Candidates are required to:—(i.) Submit for the approval of the examiners a complete set of working drawings, details and specifications of a projected building, produced under conditions previously approved by the Faculty. (ii.) Submit measured drawings of a building approved by the Professor of Architecture, with a dissertation on cognate work. Candidates are required to present designs and other work done by them during the two years before the final examination, and such work is taken into account by the examiners in making their award. Candidates may obtain distinction in subjects (i.) and (ii.).

The Diploma Course, designed to meet the requirements laid down by the Board of Architectural Education.—The course for a Diploma falls into two periods, each of two years. In the first period the student's time is devoted to professional studies in the School, on the lines of the course laid down for the second and third years of the degree course, but less advanced in character. The second period is spent in an architectural office, while the student continues his studies either in evening classes in the School itself or in some other Architectural School recognised by the University. Two examinations must be passed, one at the end of each period.

Certificate in Architecture.—Students who have attended the first two years of the Diploma Course and satisfied the examiners thereon will receive a Certificate which if given in the first class will exempt them from passing the R.I.B.A. Intermediate Examination.

Note.—In awarding degrees, diplomas, and certificates, the ordinary drawings and designs executed during the course will be taken into consideration by the examiners, and will largely determine the results.

Vacation Work.—During the Long Vacation, students, whether taking Degree or Diploma Courses, are expected to spend the time in measuring and drawing buildings, on which advice will be given, or to enter an architect's office, or to work in a builder's shop with tools on masons', joiners', plumbers' work, &c.

SYLLABUS OF COURSES

I. Lecture Courses.

COURSE A.—Outlines of the History of Architecture.—Tuesday, Thursday, 10.0-11.0.—Course approved for first year students (Degree or Diploma).

COURSE B.—History of Renaissance and Modern Architecture.—Wednesday, 10.0-11.0.—Course approved for second year students (Degree or Diploma).

COURSE C.—Gothic Architecture.—Monday, 11.30-12.30.—Course approved for second year students (Degree or Diploma).

COURSE D.—Building Materials and Construction (First Year).—Monday, 10.30-11.30.—Course approved for first year Diploma students and for second year Degree students.

COURSE E.—Building Materials and Construction (Second Year).—Friday, 10.30-11.30.—Course approved for second year Diploma students and for third year Degree students.

NOTE.—The lectures in Courses D and E are arranged to coincide with the design of small buildings selected by the student in the studio.

COURSE F.—Perspective and Sectioning.—Last Year, Thursday, 10.0-11.0.—Lectures followed by classes on the construction of perspective drawings relative to architectural subjects. Course approved for Diploma students (first year) and Degree students (second year).

COURSE G.—Mechanics of Structures.—Second Year, Thursday, 10.0-11.0.—Course approved for Diploma students (first year) and Degree students (second year).

COURSE H.—Statics and Dynamics of Structures.—Second Year, Thursday, 2.0-3.0.

II.—STUDIO COURSES.

COURSE A.—Architectural History.—Architectural History are followed by a class in the construction of designs.

COURSE B.—Design Class.—First, Second, and Last Years, alternate Fridays, 10.0-11.0.—These demonstrations given in the School of Architecture, Main Hall, exhibit the uses of the various tools and materials with which they are designed to give students an actual and practical acquaintance. Approved for Diploma students of the first year and Degree students of the second year.

COURSE C.—Design Class.—Designs of students prepared in the studio and elsewhere are publicly criticised by the Professor.

COURSE D.—Studio.—The studio is open every week-day, morning and afternoon, and students are expected to spend their time in the preparation of designs, measured drawings, &c.

EXAMINATIONS.

The classes held are designed to meet the needs of: (1) Degree and Diploma students during their last two years while engaged in other work. (2) Other students who, having already some knowledge of building construction, require to study the design of buildings. Students are required, therefore, before they enter these classes, either to have obtained a degree in Building Construction at the University, or obtained a Certificate in the third stage in Building Construction at a Technical School, or to furnish to the Professor of Architecture other satisfactory evidence of knowledge in this subject. Subjects for design will be set from time to time, and students will be required to prepare the greater part of their designs under instruction in the Studio. Drawing boards will be provided, but students must bring their own instruments and paper.

ENTRANCE EXAMINATIONS.

(1) **Entrance Scholarships and Grants.**—Some of the entrance scholarships of the University are open to students taking degree courses in the

given by the Society, delivering of lectures and other means. *d.* To obtain and consider information respecting competitions and all other matters affecting the profession, &c. *e.* To afford mutual assistance by advice and mediation in case of misunderstanding between members, or between members and their employers or those employed under them, and in any other way to promote honourable conduct in the profession generally. . . . *g.* To establish, form, and maintain a Library or other collection of architectural works, and to acquire, by purchase or donation, books, designs, drawings, and other articles of interest in connection with the profession.

The members consist of Fellows, who have been engaged in practice at least five years, and who are entitled to use the affix F.M.S.A.; Associates, who are at least 23 years of age, engaged in the study or practice of Architecture as a profession, and who are entitled to use the affix A.M.S.A.; Students, who are under 23 years of age and are engaged in the study of Architecture either as assistants or pupils.

The Society possesses a Loan and Reference Library, containing some six hundred volumes, which is open to students, other than members, on certain conditions.

The Students' Committee have made arrangements to hold meetings of Student members of the Society during the Session 1907-08, when Papers on various architectural subjects will be read.

The Society offers prizes in connection with the summer sketching visits, to be competed for by draughtsmen and architectural students under 25 years of age. The Society also offers two prizes to M.S.A. Students at the Manchester School of Architecture whose work is most successful and satisfactory to the Council, and eighteen prizes for Design.

The Education (in Architecture) Committee offer in the coming session to architectural students connected with the Society the Holden Prize for a Design for a Museum to contain an "Old Manchester" collection and kindred exhibits. A prize of £3 3s. is offered by Mr. J. W. Beaumont [*F.*] for measured drawings and sketches, and a prize of £3 3s. for an Architect's Note-book.

The Council meet every month; General Meetings of the Society are held every three months, and six Sessional Paper Meetings are held during the winter. The Annual General Meeting is held in April.

Officers and Council.

EDUCATIONAL FACILITIES, MANCHESTER DISTRICT.

The Manchester School of Architecture, established pursuant to arrangements made between the University, the Manchester Municipal School of Technology, the Municipal School of Art, and the Manchester Society of Architects. Professor S. H. Capper, M.A., R.C.A. [A.], Director.

UNIVERSITY COURSES IN ARCHITECTURE.

The University of Manchester offers two degrees to students of Architecture: in the Faculty of Arts, B.A. (Honours School of Architecture); in the Faculty of Technology, B.Sc.Tech.

I. Candidates are required to have passed the prescribed *Matriculation Examination* in the following subjects: (1) English (Language or Literature) and English History; (2) Mathematics; (3) Three of the following (one of which must be a language): i. Greek; ii. Latin; iii. French; iv. German; v. some other language approved by the Board; vi. Elementary Mechanics; vii. Chemistry; viii. Geography or Natural History.

II. Candidates are required to have attended the approved classes for the *Intermediate Examination* subjects, and to pass the *Intermediate Examination* for the ordinary degree in the following subjects:—

A. FOR THE DEGREE OF B.A. (HONOURS SCHOOL OF ARCHITECTURE):—
(a) One of the following:—Greek, Latin, French, German; (b) One of the following:—Ancient History, Modern History, English Literature; (c) One of the following:—Physics, Pure Mathematics, Applied Mathematics.

B. FOR THE DEGREE OF B.Sc. TECH. :—1. Mathematics; 2. Physics; 3. A Language (other than English), as in the Intermediate Examination for the Faculty of Arts.

Candidates who have passed the Intermediate in Science or Technology will be exempted from A (a) and (c).

III. Candidates are required to have attended the courses of instruction in Architecture and allied subjects, and to pass the Final University Examination in the following subjects:

(Subjects 1 to 4 are common to both Degrees in the Faculty of Arts.)

1. History:—(a) General Architecture (History); (b) The Modern Architecture.

2. Construction:—(a) Building Construction and Construction Statics; Theory of Structures; Bridges and Roofs of Steel & Design (including Drawing Architectural and Engineering) Memoir and Report. Final Examination.

A. Architecture (Special).

For the B.A. Degree:—Two of the following: (a) or (b); (a) History of Art (General); (b) (c) Drawing, Freshland (Advanced); (d) Drawing, M.

(e) Modelling; (f) Decorative Design.

For the B.Sc. Tech. Degree:—1. Applied Modern Construction (Special); 2. Surveying.

Candidates who have passed the Intermediate Examination in History of British Architecture are exempted from the course required in the second year of the B.A. Degree.

Candidates who have passed the Intermediate Examination in the Faculty of Arts are exempted from the first year of the B.A. Degree.

Exemption from the First Year of the B.A. Degree.

The University Degree requires three years' study. Candidates should pass the Intermediate Examination at the end of the "Junior" or first of these three years. Part II of the Final Examination at the end of the second, or "Senior" year. Part III of the Final Examination at the end of the third, or "Final" year. It is not, however, obligatory to take the Final Examination in two parts; the Intermediate Examination must be passed one year before the Final Examination is completed.

The classes would ordinarily be taken as follows:

Junior Year.—1. Three Intermediate classes: B. Architecture—(a) History of Architecture; (b) Elements of Architecture; (c) Freshland Drawing; (d) Building Construction; (e) One Elementary history or work on Sanitation is recommended.

Senior Year.—(a) Renaissance Architecture; (b) Elements of Architecture (continuation); (c) Architecture, Domestic, Public, Ecclesiastical; (d) (1) Art History, optional with (d) (2) History of Classic Art; (e) Sanitation; (f) Building Construction; (g) Architectural Drawing and Design.

B.A. Degree.—(A) Freshland Drawing; (B) Candidates intending to take options 5 and 6 (a) or (f) will study Modelling or Decorative Design at the School of Art.

B.Sc. Tech. Degree (to be taken either in Second or Third year).—(f) Surveying; (k) Chemistry.

Final Year.—(a) Architecture, Domestic, Public, Ecclesiastical (continuation); (b) Art History (continuation), or History of Classic Art (continuation); (c) Engineering, with (d) Testing Laboratory; (e) Architectural Design: Thesis.

Options: B.A. Degree.—(f) Freshland Drawing, or Modelling, or Decorative Design (if either of these options be taken).

B.Sc. Tech. Degree.—(g) Modern Building Construction and Steel Framing; (h) Surveying (if not already taken); (i) Chemistry (if not already taken).

The following lecture courses, recognised as qualifying

for the University degrees in Architecture, have been arranged for next Session:—

1. *History of Architecture* (Monday and Thursday, 5.15 to 6.15).—A general survey of architectural history from ancient to modern times, with special reference to the evolution of styles and to constructional forms and methods. The course includes: Ancient Egypt and Assyria; Greece; Rome; Byzantine and Early Christian Architecture; Renaissance; Gothic; Renaissance.

2. *Renaissance and Modern Architecture* (Tuesday and Wednesday, 5.15 to 6.15).—The rise of the Italian Renaissance; the architecture of the Renaissance in Italy, Spain; Plateresque and Greco-Roman; Late Gothic and Transition architecture in France; the châteaux of the sixteenth century; the early Renaissance and later styles; English Transition; the mansions of the sixteenth and early seventeenth centuries; 160 Years, Sir Christopher Wren; the eighteenth century; Modern architecture, especially in France and England.

3. *Elements of Architecture* (Thursday, 2 to 3).—Construction, Classic and Gothic; the orders; Greek and Roman, with their details, constructive and decorative; acroteria; sculpture and bas-reliefs; mouldings and details. Elements of architectural effect. [The complete course covers two sessions.]

4. *General Art History*.—Sculpture; painting; the industrial arts. The complete course covers two sessions. For Session 1907-08:—Sculpture: Classic and Renaissance.

5. *Architecture: Domestic, Public, Ecclesiastical*.—The complete course covers two sessions. For Session 1907-08:—Monastic Architecture; historical survey; modern conditions and requirements. Public Architecture.

6. *Architectural Drawing and Design*.—Studies in design, elementary and advanced.

7. *Architectural Drawing and Modelling*.

The Special Courses, held at the Municipal School of Technology and School of Art, include (in addition to a Junior Course) the R.I.B.A. course in Architecture, Building construction, under the direction of Professor Capper and W. Leicester. These courses are arranged in co-operation with the Manchester Society of Architects, and are intended especially for architects' pupils, improvers and the desirous of presenting themselves for the R.I.B.A. diploma Examination, and in preparation for the Trade of Architects, the "Testimonies of Study" required by the R.I.B.A. being prepared in this course.

These courses extend over one Session of three terms, and are as follows:—

First Year Course.—I. Building Construction and Applied Geometry. II. Elements of Architecture. III. Architectural Drawing; in this class the "Testimonies of Study" required for the R.I.B.A. Intermediate Examination will be prepared. IV. History of Architecture.

Second Year Course.—I. Architectural Drawing. II. Elements of Architecture. III. History of Renaissance and Modern Architecture.

In addition to the above courses instruction is given at the Manchester Municipal School of Art in designing, drawing, painting, and modelling, more especially in the various forms of their decorative application in association with Architecture, &c. The teaching staff includes Mr. R. Glazier

[A.], Head Master, and eight assistant masters and teachers. Two lectures weekly are given on the following subjects:—

Freehand drawing of ornament; Model drawing; Perspective; Geometrical drawing; Practical plane and solid geometry; Elementary modelling in clay; Light and shade; Preparatory antique drawing; Anatomy, Figure composition; The principles of ornament; Design in its technical applications; Plants in their relation to design; Historic ornament; History of painting.

Two lectures on Architecture are delivered weekly, of which the following is a synopsis:—

The Orders of Architecture; Early Greek temples and their proportions; Later Greek Architecture; Roman Architecture and the use of the arch; Roman temples, amphitheatres, and basilicas; Domestic Architecture of the Romans; Byzantine Architecture—St. Sophia, the churches of Ravenna and Venice; Colour in relation to Architecture; Romanesque Architecture; English Gothic Architecture; The development of vaulting, window tracery, etc., and planning; The Gothic styles in the rest of Europe; English and French cathedrals; Renaissance Architecture in Rome, Florence, Venice, France, and England; Mouldings and their enrichments.

A class for Architectural Design will be held on Monday evenings to work out the following subjects: I. An Oriel Window; II. An Art Gallery; III. A Panelled Room; IV. A Plaster Ceiling; V. A Church Tower; VI. A Chancel Screen; VII. A Ventilating Turret; VIII. A Dressing Shelter for Open-Air Baths; IX. A Lych Gate (stone or brick).

Complete arrangements exist for Drawing and Modelling from the Life. The School Museum contains a good collection of casts of French Gothic Architecture selected from the examples in the Trocadéro, Paris, and of Assyrian, Greek, and Roman Architecture, some fine examples of monumental Italian Architecture, and a large collection of decorative objects. Students may attend the School of Art every day from 9 to 12.30, and from 1.30 to 4, for an inclusive fee of £7 for the session of three terms; lower fees in proportion to the number of attendances daily or evening.

Bury Municipal Technical School.—Instruction is given at moderate fees in freehand and model drawing, shading from the cast, perspective, principles of decorative art and design, historic ornament, architecture, modelling in clay, drawing from the antique, wood-carving and painting from life, still life, and flowers. There are also classes in practical plane and solid geometry, building construction and drawing, carpentry, joinery, and woodwork, builders' quantities, plumbing. (Mr. Robert Wilkinson, B.A., *Principal*.)

Blackburn Municipal Technical School.—In addition to a full curriculum of drawing subjects, this School offers instruction in advanced perspective, principles of ornament,

historic ornament, principles of architecture, architectural design, and the history of architecture. Courses of instruction are given in elementary and advanced building construction, and students are prepared for the Board of Education Honours examination in the same subject; also in sanitation, graphic statics, builders' measurements, brickwork and masonry; carpentry and joinery; practical electricity, the best methods of lighting buildings.

Accrington Municipal Technical School.—At this School there are classes and lectures in theoretical mechanics, applied mechanics, historic ornament and principles of ornament, building construction, geometry and mathematics, and art classes (including designing and architectural draughtsmanship), all under the control of the Board of Education.

Todmorden.—The Borough Education Committee have established Science, Art, and Technological classes, where instruction is given in all branches of drawing, in mathematics, practical plane and solid geometry, electrical engineering, chemistry, mechanics, wood-carving, &c. Clerk to the Committee: Mr. James Whitehead.

THE NEW SOUTH WALES INSTITUTE (INCORPORATED).

Vickery's Chambers, 82, Pitt Street, Sydney.

Assistant Secretary.

Geo. A. Roberts, 9, Bridge Street, Sydney.

The Institute of Architects of New South Wales, which was originally founded in 1871, was reconstructed in 1890, and formed into a corporate body with limited liability under section 54 of the Companies Act 1874, with the following among other objects:—

a. To represent generally the views of the profession; to preserve and maintain its integrity and status; to suppress dishonourable and unprofessional conduct or practices. b. To afford means of adjusting professional differences, and to decide all questions of usage or courtesy in connection with the profession. c. To promote good feeling and friendly intercourse among the members. d. To watch over, protect, and promote the interests of the profession generally. e. To increase the confidence of the public. f. To acquire, form, and maintain an art and scientific library and museum. g. To encourage the study of the profession by articulated pupils, and, with a view thereto, to give prizes and rewards.

There are three classes of members, viz. (1) Fellows, who must have attained twenty-seven years of age, and been in practice as architects for at least five years;

(2) Associates, who must be engaged in the study or practice of Architecture, and not less than twenty-one years old ;
 (3) Honorary Members—persons of eminence in art, science, or literature, and others, who may be able to render assistance in promoting the objects of the Institute. A code of "Professional Practice and Charges," based upon that of the Royal Institute, but adapted to the different conditions of the colony, was adopted in General Meeting on the 12th August 1890. The Annual General Meeting is held the third Wednesday in October.

THE NORTHERN ASSOCIATION

[Province: Northumberland and Durham. Centre: Newcastle.]

Hon. Secretary:

Charles S. Errington [A.] & Co., Highgate Place, Newcastle-upon-Tyne.

J. B. Cobby, Assistant Secretary.

The Northern Architectural Association was instituted in 1858, and the rules and constitution were revised in 1885, and again in 1894. The objects of the Association, as stated in the new rules, are to promote union amongst the members; the elevation of the profession of Architecture; the establishment of uniformity of practice and professional charges; and the general advancement of the art and science of Architecture. There are 245 members in the Association, consisting of four classes, viz.: Members—architects in practice as principals, or as town or county architects, who have so practised for not less than three consecutive years immediately preceding their nomination; Associates—architects not yet eligible as Members, or assistants (over twenty-one years of age) in the offices of gentlemen eligible as Members or Associates; Students—persons engaged in the study of Architecture in the offices of gentlemen eligible as Members or Associates, and shall not exceed the age of twenty-one years, except when they are still pupils and exceed that age; and Honorary Members—gentlemen eminent for distinguished attainments recommended by the Council; Members and Associates only have the right to vote. Prizes are offered by the Association for the best set of drawings, or "Testi-

monies of Study," required from Probationers, Students, and others, preparing for the Intermediate and Final Examinations of the Royal Institute of British Architects; also for other sketches and essays, &c., and a Travelling Studentship of the value of £10 a year. There is a Students' Sketching Club and Class in connection with the Association, and a library. The session commences in November; and meetings, at which Papers are read and professional questions discussed, are held in each month up to and including March of the following year. The Annual General Meeting is held in March.

EDUCATIONAL FACILITIES IN NEWCASTLE.

Armstrong College, Newcastle.—Classes for architecture and architectural design are held in connection with the Art Department. These classes meet in the evenings, and are under the supervision of the special lecturer and teacher, Mr. R. P. S. Twizell [*A.*], with Mr. W. H. Knowles, F.S.A. [*F.*], Mr. Arthur B. Plummer [*F.*], Hon. Secretary Northern Architectural Association, and Mr. H. C. Charlewood [*F.*], as Honorary Visiting Architects.

The classes consist of elementary and advanced lectures in Architectural History, and subjects are set and worked out in elementary and advanced architectural design.

The College also provides instruction by means of lectures and classes in geometrical drawing, perspective, principles of ornament, freehand, model drawing, drawing in light and shade, historic ornament, drawing and painting from the antique, drawing and painting from the life, and all other subjects of art instruction, including the arts and crafts of stained-glass decoration of interiors, ceramic decoration, enamels, mosaics, gesso, black and white processes, metal work, wood carving, furniture, &c.

In addition to the above, instruction is given in mathematics, mechanics, surveying, practical and theoretical plumbing; while lectures on materials are given in the

Engineering Department, where there is a 100-ton testing machine for testing materials of construction.

Classes in elementary, advanced, and honours stages of building construction are held by Mr. J. P. Allen, P.A.S.I.

The classes are arranged to meet the requirements of the R.I.B.A. and of the Board of Education.

Rutherford College, Bath Lane, Newcastle-upon-Tyne.—Courses of lectures to meet the requirements of the Building Trades are provided as follows :

| | Carpentry and Joinery. | Brickwork. | Masonry. | General Building. |
|----------|--|---|--|--|
| 1ST YEAR | Freehand and Object Drawing, Geometry, stage 1
Carpentry and Joinery, preliminary | P P & S Geometry, stage 1

Elswick Works Technical School.—This School has courses of building construction, elementary and advanced; and instruction is given in freehand and model drawing, perspective, architectural drawing, the principles of ornament, &c.; practical plane and solid geometry, mechanics, and mathematics. A new Institute has just been completed, and greater accommodation and facilities for study provided for the students. Mr. Robert Wills, B.Sc., Head Master.

THE NOTTINGHAM SOCIETY.

[*Province* : Nottinghamshire, and part of Lincolnshire, including Lincoln.
Centre : Nottingham.]

Hon. Secretary and Treasurer :

W. Brandreth Savidge [A.], Queen's Chambers, King Street,
 Nottingham.

The Nottingham Architectural Society was instituted in 1862, and its rules were revised in the year 1888. The objects of the Society are the promotion of union and professional integrity amongst its several classes of members ; the establishment as far as possible of uniformity of practice ; and the general advancement of Architecture and the various arts and sciences connected therewith. The members consist of three classes, viz., Members—architects engaged as principals not less than two years ; Associates—architects not eligible as Members, architects' assistants, and articulated pupils ; and Honorary Members—gentlemen distinguished for their attainments. Three General Meetings are held during the year, viz., in the first week in November, the first week in February, and the last week in March, besides Special General Meetings which may be convened at any time. The Annual General Meeting is held in April.

Officers and Council.

EDUCATIONAL FACILITIES IN NOTTINGHAM.

Nottingham University College.—An Architectural Course has been arranged at the University in conjunction with the Nottingham Architectural Society and the School of Art. It is designed for youths of about sixteen years of age who have just left school and intend to become architects. The curriculum extends over two years, and affords a scientific and technical training intended to prepare young men to enter an architect's office. The instruction comprises work in the drawing-office, lecture-room, and workshops from October to July in the first year, and from October to April in the second year. Practical instruction is also given in the college workshops during the months of July and September. Students are recommended to make arrangements beforehand, so that they may enter an architect's office in the October following the satisfactory completion of their first year's course. The subjects dealt with cover part of the ground for the progressive Examinations of the Royal Institute of British Architects. A student who has passed the second year's course satisfactorily is recommended to present himself for the Intermediate Examination in order to be registered as a *Student R.I.B.A.* The first year's course embraces mathematics, mechanics, physics, drawing and practical geometry, building construction, and workshop practice at the College; freehand drawing, perspective, and Architecture at the School of Art. From October to April the second year students are engaged during every afternoon in an architect's office, and in the forenoon at the College and the School of Art. The subjects taken up at the College are: mathematics, solid geometry, building construction and nature of materials, strength of materials

and graphic statics, workshop practice, land surveying and levelling. At the School of Art: freehand drawing, architectural details, including ornaments and mouldings, &c., history of architecture. Time-tables are arranged for these systematic courses of instruction in the Engineering Department at University College, so that the student's time is fully occupied. Composition fee for the whole course of day and evening classes:—First year, £6 per term; second year, £4 per term; summer term, £3 3s. Examinations are held at the end of each session, on the results of which College Certificates are awarded, as well as prizes offered by the Nottingham Architectural Society. The College also provides an architectural course for evening students as follows:—*Elementary Course*: Practical plane and solid geometry, elementary building construction, elementary mechanics, carpentry and joinery. *Advanced Course*: Advanced building construction, plumbing, heating and ventilation, strength of materials and graphic statics, and workshop practice.

THE SHEFFIELD SOCIETY.

Leopold Street, Sheffield.

[*Province*: Derbyshire, Northern Lincolnshire, and part of South Yorkshire.
Centre: Sheffield.]

Hon. Secretary:

James R. Wigfull [A.], 14, Parade Chambers, East Parade, Sheffield.

The Sheffield Society of Architects and Surveyors was founded in 1886, for the advancement of the profession of architect and surveyor; for promoting and facilitating the acquisition of a knowledge of the various arts and sciences connected therewith, and the education of the junior members thereof; and for the consideration of questions of professional practice. The members consist of five classes:—Fellows, Associates, Students, Honorary Members, and Lay Members. The Fellows are practitioners who have been engaged as principals for not less than five years in their profession; the Associates are principals or assistants, over twenty-one years of age; the Students are articulated pupils; the Honorary Members are persons distinguished for their connection with Art and Science; the Lay Members are gentlemen not practising but interested in Architecture or Surveying, and not following any of the building trades. Papers are read, and professional questions discussed, on the second Thursday in each month from October

to April, both inclusive. Classes are held for the study of specific subjects under regulations framed by the members of each class, subject to the sanction of the Society's Council. The Annual General Meeting is held in April.

* * The names of members of the Royal Institute in the foregoing list are printed in small capitals; and, except when otherwise stated, all the addresses are in Sheffield.

EDUCATIONAL FACILITIES IN SHEFFIELD.

Sheffield Technical School of Art, Arundel Street.—The syllabus includes all art classes, both elementary and advanced. Students can qualify to become teachers, pictorial or decorative artists, sculptors, illustrators, &c. Art and technical classes are also held for the systematic training of pupils in various trades and crafts, silver-smithing in all its branches, enamelling on metals, embroidery, painting and decorating, wood carving, wrought-iron, metal-casting, &c. The school possesses a library containing many valuable works on art, together with a fine collection of architectural casts, electrotypes, and a loan collection from the Victoria and Albert Museum, South Kensington.

Department of Applied Science, University of Sheffield.—At the University of Sheffield lectures are given on surveying, supplemented by field practice and the use of instruments. There are also evening classes for the study of building construction and allied subjects, and separate classes are held for elementary, advanced, and honours students. The University authorities are considering proposals for the establishment of an architectural course, and the appointment of a lecturer in Architecture is contemplated at an early date.

THE YORK AND YORKSHIRE SOCIETY.

[*Province* : The greater part of the North Riding and the Parliamentary Division of York. *Centre* : York.]

Hon. Secretary :

Herbert Davis [F.], 12, Heworth Green, York.

The York and Yorkshire Architectural Society was founded in 1882, the objects being to afford facilities for the study of Architecture, sanitary engineering, and other subjects identified with the architectural profession ; and to advance the professional interests of the members. It is endeavoured to carry out these objects by means of (1) Papers and discussions upon all subjects and questions connected directly and indirectly with Architecture ; (2) A lending library of standard works on Architecture and cognate subjects ; (3) The advancement and encouragement of professional knowledge and study in the younger members of the

profession by the foundation of classes for study and the award of prizes for satisfactory work; visits to works in progress, and to buildings ancient and modern; sketching, and such other methods as may be determined from time to time. Further, by supporting and protecting the character and uniformity of practice of the profession, and promoting personal acquaintance and good feeling between the members and honourable conduct in the profession generally. The members consist of three classes, viz., Fellows—architects who have been in practice more than two years, or hold chief public appointments; Associates—students of Architecture, assistants, or others in the profession who are not eligible as Fellows; Honorary Members, those who have any direct or indirect interest in Architecture, or in some of the collateral arts and sciences. The Annual General Meeting is held in November.

Officers and Council.

EDUCATIONAL FACILITIES IN YORK.

York School of Arts and Crafts, St. Leonard's Place; York Technical Classes, Clifford Street; and York Railway Institute, Queen Street.—At the above-named schools instruction is provided, by means of lectures and classes, in geometrical drawing, perspective, principles of ornament, freehand drawing, model drawing, drawing in light and shade historic ornament, architecture, architectural design, anatomy, design, drawing and painting from the antique, drawing and painting from the life, memory drawing from common objects, memory drawing from plants, memory drawing from the antique, modelling from life, heads, and whole figures, modelling from the antique, modelling design, painters' and decorators' work; also in mathematics, applied mechanics, building construction, brick-work, masonry, carpentry, joinery, wood carving, &c.
Secretary: Mr. C. G. Rushworth, Education Offices, York.

THE EXAMINATIONS

(ARCHITECTURE).

QUALIFYING FOR REGISTRATION AS PROBATIONER AND STUDENT, AND FOR CANDIDATURE AS ASSOCIATE.*

THE Royal Institute of British Architects desires to obtain for all those entering the profession a systematic course of education tested by progressive examinations, the passing of which forms the primary qualification for admission to its class of Associates. By careful preparation on the proper lines, a youth, even before entering an office, may acquire enough of the rudiments of professional education to submit to an examination testing his capacity for the career of an architect; and if he pass it, he may then follow a continuous series of studies, in accordance with a definite programme, thereby laying a foundation of artistic and scientific knowledge upon which to cultivate any natural gifts and develop any aptitude for invention or design he may possess.

The Examinations are in three stages: I. *Preliminary* [see p. 341]; II. *Intermediate* [see p. 344]; and III. *Final* [p. 348], qualifying for the grade of Probationer, Student, and Associate respectively. They have been so arranged as to induce the gradual development of artistic and scientific powers—to secure a systematic training in the art and science of Architecture from the entry into an office until the commencement of actual practice. They afford guidance in professional studies, and opportunities for testing at well-marked intervals the progress made. A minimum standard of knowledge may be thus attained by all who enter the profession, serving as a basis for further studies essential to the fuller development of architectural ability.

I. The *Preliminary Examination* (Written and Graphic) is to test the general knowledge of candidates in ordinary subjects of school education, and subjects of a technical character, such as Elementary Mechanics and Physics, Geometrical Drawing, Perspective, and Freehand Drawing from the Round. Exemption from attending this Examination is granted to applicants who submit satisfactory drawings, and certificates from well-known educational bodies. A youth who is thus officially exempted or who passes the Preliminary Examination is registered as a *Probationer* of the Royal Institute of British Architects.

* See Sections 20 and 21 of Charter, and By-law 2.

II. The *Intermediate Examination* (Written, Graphic, and Oral) is to test the Probationer's progress in Architecture, while engaged as pupil, improver, or assistant in an office. During the period following his registration as a Probationer he has to prepare nine sheets of carefully finished drawings, with an illustrated memoir. If these "Testimonies of Study" be approved, and if he afterward pass the *Intermediate Examination*, he is registered as a *Student* of the Royal Institute of British Architects, and his name and address are published in the Register of Students in the *KALENDAR*.

III. The *Final Examination* (Written, Graphic, and Oral) is to test the Student's further progress. The work to be done by the Student, and submitted by him before entering, necessitates good draughtsmanship and an acquaintance with ancient edifices, or other well-known executed works, to be gained by actual measurement of them. It requires a knowledge of Design and of the practical details of Construction, which latter can be best obtained by personal experience of buildings in progress. The "Testimonies of Study," with the concurrent work of preparation for this Examination, should occupy the Student not less than three years; and no one can be admitted to it under the age of twenty-one years, although in most cases it will probably be found desirable that he should have attained the age of at least twenty-two before presenting himself. If the Student pass, he becomes qualified for candidature as *Associate* of the Royal Institute of British Architects, and receives notification thereof. In the event of any *Student* failing to pass the *Final Examination* within four years of having passed the *Intermediate*, his name will be removed from the Register of Students, unless the Council are satisfied that good cause exists for allowing it to remain.

The Examinations are held by the Board of Examiners (Architecture) in June and November, or at such other times as may be appointed by the Council, and due notice thereof is given in the *KALENDAR*, the *JOURNAL*, and the Professional Papers.

The Testimonies of Study are examined by the Board, who decide whether an applicant shall be admitted.

The subjects for examination are distributed among individual members of the Board, who set the questions, examine the drawings and papers, and assign the marks in each subject.

The Oral Examinations are conducted by the Board, three members of which, being Examiners, form a quorum.

Moderators to superintend the Examinations are appointed by the Board from those Associates who have been admitted after examination under By-law 2, or who have passed the old Voluntary Examination in the Class of Proficiency. Their functions are to distribute the question papers; to take care that no assistance is given by one examinee to another, and that (except themselves) no persons hold communication with the examinees during the hours of examination; to allow no books to be used (except such as may be specially permitted); to verify the work produced in the room by each examinee; to see that the proper number is affixed thereto, and generally to see that the instructions of the Board are fulfilled.

The Board report to the Council the results of the Examinations, and the names of those who pass are published in the JOURNAL.

The Testimonies of Study are returned, but no drawings or answers produced during the Examinations are given up.

[For particulars of the *Special and Colonial Examinations*, see pp. 369, 370; *Statutory Examinations*, pp. 372, 375.]

ADVICE TO CANDIDATES.

I. *The Preliminary, qualifying for PROBATIONER.*—The subjects comprised in this Examination are those in which proficiency should be attained by the applicant before entering an architect's office, and it is desirable that special attention be given to them before he leaves school.

Clear and well-formed handwriting, correct spelling, grammar, and punctuation are indispensable.

Powers of observation and of graphic description, facility of composition and lucidity in the expression of ideas, should be sedulously cultivated, as being of the utmost value in the prosecution of further studies and in the work of later years.

Arithmetic, algebra, and plane geometry should be familiar to the applicant, and a knowledge of their application in the solution of simple problems in elementary mechanics and physics should be acquired.

The geography of Europe and the history of England from the Norman Conquest to the end of the Tudor dynasty should be well studied, regard being had to the connection between the history of the country and its Architecture.

A good knowledge of Latin or of one modern language is essential and of two modern languages very desirable.

A clear understanding of the Continental metrical system will also be useful.

Geometrical drawing and the elements of perspective are indispensable subjects of study, and should receive particular attention; while freehand drawing with rapidity and precision from the cast and the antique, and sketching with accuracy, should be carefully cultivated. Reasonable proficiency in these subjects is of the first importance.

II. *The Intermediate, qualifying for STUDENT.*—The first aim of the *Probationer* should be to acquire facility and accuracy in the geometrical and perspective drawing of architectural subjects, commencing with the Orders and the several periods of Mediæval Architecture, drawn out to a large scale and from figured dimensions.

This course should be followed by careful study of the ornament appropriate to each style, the enrichments of the mouldings being drawn full size, and sketched and measured, as far as possible, from actual work. A general knowledge of mouldings and details having been thus acquired, their practical application should be matured by making fully figured drawings of them, with details full size.

The course of study necessitates the continuous use of a note-book (large quarto), in which important passages of the books under study should be written down in the *Probationer's* own words, and freely illustrated by careful sketches from all available sources (notes on one page, sketches on the opposite page); and the subjects, being systematically arranged, might be further illustrated by notes and sketches from other books and authorities. A sketch note-book—to be freely and continually used—should be the inseparable companion of the *Probationer*.

The drawing of set subjects from memory is a most useful exercise, impressing on the mind the general proportions and harmony of the several parts of the details. The art of accurately sketching plans, elevations, sections, features and details, from memory, should therefore be sedulously cultivated. Such a system of study proves of the greatest service, not only at the time of examination, but afterwards in actual practice.

The study of the scientific subjects in the programme should be followed out in a similar manner, knowledge of details of construction being acquired, as far as possible, by actual measurement of work. Formulas for calculating the strength of beams, columns, &c., should be worked out, and the results compared with actual experience. The

careful study of plane geometry as applied to actual work, and the acquisition of a thorough knowledge of the projection of solids and development of surfaces, are essential.

The admission of the *Probationer* to the Intermediate Examination will depend on the satisfactory execution of the Testimonies of Study, which are not to be considered merely as samples of drawing, although good drawing is required, but should be evidence of *study* of the subject represented. In all cases where it is possible to obtain the information, the jointing of both wood and stonework must be shown. Any additional information as to materials used and methods of construction should be given, and attention be called by notes or sketches (or both) to any peculiarities, and the reason for them explained. Different kinds of materials may be indicated by colour. Wherever possible, the subjects illustrated must be from old examples, and should be measured from the actual building; when the example is copied from any published drawings, the authorities from which the information is obtained should be stated, and it is desirable to add the date of erection of the work. An inside as well as an outside elevation of a door or window should be shown; and when, in consequence of the size of the subject chosen, space will not admit of this, half the elevation may be outside and half inside, or, if the subject be very elaborate, half of each may be in block. It is recommended that the Orders should be from an actual building, in which case a column of not less than about 18 feet in height may be shown. Some mouldings full size should be given, and they may form a separate sheet or sheets, and, if necessary, may be on a double-elephant sheet, folded. All drawings of ornament should have a section showing the projection, and, if not full size, should be figured or have a scale. Where possible, information is to be given as to its source, position in the building, and material in which it is executed, and notes as to how these have influenced its design or execution. To show that the design has been studied, a small scale sketch (perspective or elevation), with plan and, if necessary, sections, which may be in skeleton only, may be added, so that the relation of the part shown to the whole design may be seen. The written memoir must be prepared with care and neatness, and the illustrative sketches be well and accurately drawn.

III. *The Final, qualifying for candidature as Associate.*—The principles of study recommended for the Intermediate apply equally to the Final Examination.

Reading to be of permanent value should be supplemented by the taking of copious notes, fully illustrated by careful sketches, and by the collection of information under various heads from different authorities. Combined with the study of the best accessible examples of old work, the habit of accurately sketching Architecture in plan, elevation, detail, ornament, and construction, especially from memory, should be assiduously cultivated, eye, brain and hand being brought into common harmonious action.

When a knowledge of detail has been thoroughly acquired, the *Student* should take up the study of the general principles of design in both plan and elevation, and of the combination of parts to produce an effective and well-proportioned composition.

The *Student* should also master the principles and practice of the preparation of contract and working drawings and specifications, and of the control of actual work; he will thus qualify himself to deal with the ordinary and many of the difficult problems which arise in the designing and carrying out of modern buildings. He should miss no opportunity of visiting buildings in course of erection.

As in the Intermediate, the admission of the *Student* to the Final Examination will depend on the sufficiency and excellence of his Testimonies of Study; poor composition, careless or imperfect execution, lead to disqualification.*

The *Student* is urged to take every opportunity to consult standard works in the Library.

The *Student* having passed the "Final" will have shown himself to be possessed of a solid groundwork of knowledge, on which he may proceed with those more advanced studies in Design and Construction, proficiency in which will qualify him to engage in successful practice as an architect.

I. THE PRELIMINARY EXAMINATION:

To Qualify for Registration as Probationer R.I.B.A.

Examinations of persons intending to follow the profession of Architecture are held by the Royal Institute of British Architects, and some of the non-Metropolitan Societies allied to the Royal Institute, twice a year, in the months of June and November, in accordance with the particulars given on the official form.* Except for those who have passed certain Examinations (hereinafter specified), this Preliminary Examination embraces the following subjects, particulars of which are given in the Time-table: I. Short English Com-

* For a further description of what is required in the Testimonies of Study, see preceding page.

position. II. Writing from Dictation. III. Arithmetic, Algebra, and Elements of Plane Geometry. IV. Geography and History. V. Latin, Italian, French, or German : one language to be selected by the applicant. VI. Geometrical Drawing or Elements of Perspective : either subject to be selected by the applicant. VII. Elementary Mechanics and Physics. VIII. Freehand Drawing from the Round.

Persons preparing to follow the profession of Architecture who have passed any of the following Examinations :—The Matriculation Examination at any University in the British Empire, the Senior or Junior Honours Local Examinations conducted under the authority of any University in the British Empire, the School or Leaving Certificate of the Oxford and Cambridge Schools Examination Board, the Examinations held under the Central Welsh Board, the Examinations for the First Class Certificate of the College of Preceptors, or such other Examinations as may be satisfactory to the Board—are exempted from submitting themselves for examination in the first, second, third, fourth, fifth, and seventh subjects; but Certificates of having passed such Examinations only exempt applicants in the subjects covered thereby.

Certificates, as follows, from the Board of Education, S. Kensington, are accepted as exempting from Subjects VI., VII., and VIII. :—

From Subject VI.—A first class in *both* the Board of Education Examinations : Geometrical Drawing and Perspective.

From Subject VII.—A first class in the two Board of Education Examinations : Subject 6, Theoretical Mechanics, A, Div. 1, Solids ; B, Div. 2, Fluids—Stage 1.

From Subject VIII.—A first class in the Board of Education Examination : Freehand Drawing of Ornament in Outline.

An applicant claiming exemption from sitting in the first five and the seventh subjects, who submits, with his application and the evidence required in support of his claim for exemption, drawings (not exceeding four) which show his acquaintance with "Geometrical Drawing" or the "Elements of Perspective," and with "Freehand Drawing," is further exempted from examination in the sixth and eighth subjects, should his drawings be considered satisfactory by the Board of Examiners.

All drawings submitted by applicants claiming exemption must be delivered flat, in a portfolio 30 inches by 22 inches.

The carriage of the certificates, drawings, &c., to and from the office of the Royal Institute, and all expenses incidental thereto, must be defrayed by the owners. They will be delivered on demand to any person authorised by the owner to receive them, but the Royal Institute will not incur any expense in returning them. Due care will be taken of such drawings, certificates, &c., but the Royal Institute will not be responsible for any loss of or damage to them while they remain in its keeping. Partially exempted applicants are required to remove their certificates, drawings, &c., immediately after the examination; and those who are wholly exempted, on receiving notice of such exemption.

Every applicant desirous of qualifying for Registration as *Probationer R.I.B.A.*, whether he claim exemption from submitting himself for examination or not, must make an application on the official form,* to be filled up as directed thereon, and to be accompanied by an admission fee of two guineas, which will be returned should the application be refused. If approved, the Secretary of the Royal Institute communicates in due course with the applicant in reference to the

* To be obtained at the office of the Institute, and also from the Allied Societies.

place at which he is expected to attend for the Examination. In the case of applicants claiming exemption, the evidence they have to submit in support of the claim must accompany their applications.* Applicants unsuccessful at their first sitting may present themselves again within twelve months without further fee; should they then fail to pass, a fresh fee must be paid for each subsequent attempt.

Relegated candidates who fail to obtain half marks at a subsequent examination will not be allowed to sit again for their relegated subjects only, but will be required to take the whole examination.

The Time-table for the Preliminary Examination to be held in London, and at some of the non-metropolitan centres in the United Kingdom, during November 1907 and June 1908 is as follows:—

MONDAY, 4th November 1907 and 15th June 1908. *Maximum*

Hours. Division.

No. of Marks.

| | | |
|-------------|---|-----|
| 10.0–11.0. | I. SHORT ENGLISH COMPOSITION.—Simple subjects will be given to test the candidate's powers of observation and description | 40 |
| 11.0–11.30. | II. WRITING FROM DICTATION.—A short passage from some standard English author will be given. Clear and well-formed writing, with accurate spelling and correct punctuation, should be aimed at | 20 |
| 11.30–1.30. | III. ARITHMETIC, ALGEBRA, AND ELEMENTS OF PLANE GEOMETRY.—The questions in arithmetic will include the first four rules, simple and compound proportion, and vulgar and decimal fractions, and will include such as have a practical bearing on the candidate's future work. The Algebra will include the elementary rules, with simple equations, and the use of symbols and factors. In the Elements of Plane Geometry, a knowledge of the first two books of Euclid will be required, and of the subjects treated therein. For the benefit of candidates who have not studied the text of Euclid there will be set equivalent alternative questions on Practical and Theoretical Geometry. Every candidate intending to answer these must come provided with a ruler graduated in inches and tenths of an inch and in centimetres and millimetres, a small set square, a protractor, compasses furnished with a hard pencil point, and a hard pencil | 100 |
| 1.30–2.30. | INTERVAL. | |
| 2.30–4.0. | IV. GEOGRAPHY AND HISTORY.—Short questions will be set to test the candidate's knowledge of the geography of Europe, especially the British Isles, and of the prominent events in English History from the Norman Conquest to the end of the Tudor period | 60 |

* Board of Education Examination Cards, with the exception of the Certificates specified on the preceding page, and ordinary certificates below the third grade not being required, it is particularly requested that such documents be not sent.

| <i>Hours. Division.</i> | <i>Maximum
No. of Marks.</i> |
|--|----------------------------------|
| 4.0-5.30. V. LATIN, ITALIAN, FRENCH, OR GERMAN (ONE LANGUAGE ONLY).—One to be previously selected by the candidate. An easy passage for translation into English will be set, with some simple grammatical questions, and a few short sentences for translation into the foreign language | 80 |
| TUESDAY, 5th November 1907 and 16th June 1908. | |
| 10.0-1.30. VI. GEOMETRICAL DRAWING, which will include the construction of scales, and the delineation to scale of some simple plan or elevation of a building; or ELEMENTS OF PERSPECTIVE, which will include simple problems in perspective. One of these two subjects to be previously selected by the candidate..... | 80 |
| 1.30-2.30. INTERVAL. | |
| 2.30-3.30. VII. ELEMENTARY MECHANICS AND PHYSICS.—Simple questions will be set on the resolution and composition of forces, the mechanical powers, centre of gravity, &c..... | 80 |
| The questions will not be such as to involve any trigonometrical calculations. | |
| 3.30-5.30. VIII. FREEHAND DRAWING FROM THE ROUND.—Some simple subject..... | 40 |
| | <u>500</u> |

* * The Questions set in June 1907 are printed on p. 352 ff.

The results of these Examinations, whether held in London or at non-Metropolitan Centres, are reported to the Council by the Board of Examiners, who recommend as to the fitness of applicants for registration as Probationers, and return the names of those who pass in alphabetical order. On the approval by the Council of such recommendations, the name of every successful applicant is forthwith entered on the Register of Probationers of the Royal Institute of British Architects, and published in the JOURNAL; and he receives in due course a notification that he has been registered as Probationer.

Every Probationer R.I.B.A. has the privilege of using the Library and Loan Collection of Books.

II. THE INTERMEDIATE EXAMINATION:

To Qualify for Registration as Student R.I.B.A.

Examinations (Written, Graphic, and Oral) of Probationers are held by the Royal Institute, and some of the non-Metropolitan Societies allied thereto, twice a year, in the months of June and November, in accordance with the particulars given on the official form.*

A Probationer R.I.B.A. who has attained the age of at least 19 years, and who is desirous of qualifying for registration as *Student R.I.B.A.*, must make an application on the official form,* to be filled up as directed thereon; and to be accompanied by an admission fee of Three Guineas, which will be returned should the application be refused.* He must also send with his application Testimonies of Study as

* To be obtained at the office of the Institute, and also from the Allied Societies.

hereinafter set forth, accompanied by a certificate from a member of the Royal Institute, or other person of recognised position, that the Probationer is a proper person to be admitted to this Examination, and that the Testimonies of Study he submits are his own work.

The Examination, which is known as the Intermediate, embraces the following subjects :—

1. Classic Ornament.
2. The Characteristic Mouldings and Ornaments of each Period of English Architecture from A.D. 1000 to 1550, with their Application.
3. The Orders of Greek and Roman Architecture: their Origin, Development, and Application.
4. Outlines of the History of Mediæval and Renaissance Architecture in Europe.
5. Theoretical Construction: Stresses, Strains, and Strength of Materials.
6. Descriptive Geometry: the Projection of Solids.
7. Elementary Applied Construction: the Nature and Use of Ordinary Building Materials.

Probationers who have attended the full course at the School of Architecture, University College, London, and obtained the First-class Certificate; or have attended the two years' course at King's College, London, and obtained the First-class Certificate; or have attended the full course in Architecture at University College, Liverpool, and obtained a First-class Certificate at the College Final Examination; or have obtained the Degree of Bachelor of Architecture at Liverpool University; or have obtained either a first class in the Terminal Examinations of the Final year or passed a University degree Examination in Architecture at the Victoria University, Manchester; or have obtained the Diploma or Senior Certificate of Glasgow School of Architecture; or who, under certain conditions, have passed through the four years' course at the Architectural Association, London, may be exempted from sitting for the Intermediate Examination and be admitted as Students R.I.B.A. on making a formal application and paying the fee of Three Guineas, provided that the work done by them during the Session be submitted to and approved by the Board of Examiners as Testimonies of Study. [It is the desire of the Institute, as recommended by the Board of Architectural Education, that students within reach of the Universities and Schools above mentioned should avail themselves of the opportunities these institutions afford, and take up the architectural courses provided, rather than submit themselves for the examination without such recognised training.]

A First-class Certificate in the Elementary stage of the Board of Education Examination in Subject I. (Practical Plane and Solid Geometry), together with two sheets of studies illustrating the intersection of solids, will be accepted as exempting a candidate from sitting in Division VI. (Descriptive Geometry: the Projection of Solids), but he will be required to undergo an oral examination with respect to the two sheets of studies. The certificate mentioned must be forwarded to the Secretary at the time of making the application.

Applicants unsuccessful at their first sitting may present themselves again within twelve months without further fee; should they then fail to pass, a fresh fee must be paid for each subsequent attempt.

The Testimonies of Study† required from Probationers R.I.B.A. must consist of nine sheets of drawings (half double-elephant, i.e. 27 inches by 20 inches), neatly and carefully finished; and the sheets 1 to 6

* In the case of Probationers registered prior to the 31st December 1895, the admission fee is Two Guineas only.

† In order to test the Probationer's knowledge of what he has drawn and described in his "Testimonies of Study," they are brought up at the Oral Examination, when he is required to answer questions respecting them.

must be accompanied by a written description, illustrated by sketches. The subjects of the nine sheets of drawings must be as follows :—

- 1 and 2. Two sheets, giving examples (one on each sheet) of any two of the Orders of Architecture here named—the Doric, the Ionic, or the Corinthian—drawn in outline, with the ornament and enrichments filled in; each sheet to contain two columns of one Order with entablature complete, drawn to scale (the columns being not less than 10 inches high on the paper), and details to three times the scale of the columns.
3. One sheet of details of Classic Ornament from the round.
- 4 and 5. Two sheets, containing examples (one on each sheet) of any two of the Periods here named—the Early English, the Decorated, or the Perpendicular—such as a door, a window, or an arcade, in plan, elevation, and section, with details of mouldings and ornament relating to such examples.
6. One sheet of Mediæval Ornament—freehand drawing from the round.

A concise description, giving such particulars as may be accessible, of the building or buildings from which the several subjects are taken, with the dates of erection and other details, illustrated by sketches of plan, general elevation, &c., and written on foolscap paper, on one side only—the whole to be the work of the Probationer's own hand.

- * * It is desirable that some of the drawings submitted should be from actual measurement by the Probationer.

Probationers R.I.B.A. who are Architectural Students of the Royal Academy are permitted, in lieu of the Testimonies of Study Nos. 1 to 6 above specified, to submit for the approval of the Board of Examiners their work done in and for the Royal Academy School, provided that the drawings so submitted comprise studies applicable to paragraphs Nos. 4 and 5, whether prepared for the Royal Academy or otherwise.

7. One sheet containing diagram of timber-framed Roof Truss, not less than 30 feet span, with the nature of the strain on the several parts marked thereon, the ironwork and the junctions of the timbers drawn to a scale of one inch and a half to the foot, in isometrical projection and dissociated.
8. One sheet showing the construction of Floors—Framed timber, combined iron and timber, and fire-resisting materials, suitable for a room 30 feet by 20 feet, drawn to a scale of half-inch to the foot.
9. One sheet of details of Joiner's Work in doors, windows, and fittings, shown in plan, elevation, and section, to a scale of one inch to the foot; with details, to a large scale, of mouldings and framing.

- * * Each of the nine sheets must be carefully finished as a complete work. They must be delivered flat, in a portfolio 30 inches by 22 inches.

Drawings prepared in the Architectural Association Day School by *Probationers R.I.B.A.* may be submitted by such Probationers in lieu of the Testimonies of Study above set out, and if the work be approved by the Board of Examiners, the candidates will be admitted to the Examination.

A certain number of marks (not exceeding ten) will be allocated to each sheet of Testimonies of Study, and allotted at the oral examination by the examiners taking the several subjects.

If the Testimonies of Study submitted by the Probationer be

approved by the Board of Examiners, he will receive intimation from the Secretary as to the place at which he is expected to attend for the Examination. The carriage of the Testimonies of Study, Notebooks, Sketchbooks, Descriptions, &c., to and from the office of the Institute, and all expenses incidental thereto, must be defrayed by the owner. They will be delivered on demand to the owner or to any person authorised by him to receive them, but the Royal Institute will not incur any expense in returning them. Due care will be taken of such Testimonies of Study, Sketchbooks, Notebooks, Descriptions, &c., but the Royal Institute will not be responsible for any loss of or damage to them while they remain in its keeping.

The Intermediate Examination, to be held during November 1907 and June 1908, and to be passed by Probationers whose Testimonies of Study before described have been approved, consists of Written, Graphic, and Oral Work, the Time Table for which is as follows :—

MONDAY, 4th November 1907 and 15th June 1908.

| <i>Hours.</i> | <i>Division.</i> | <i>Maximum
No. of Marks.</i> |
|--|--|----------------------------------|
| 10.0–11.30. | I. Classic Ornament | 50 |
| 11.30–1.30. | II. The Characteristic Mouldings and Ornament
of each Period of English Architecture from
A.D. 1000 to A.D. 1550, with their Application | 75 |
| 1.30–2.30. | INTERVAL. | |
| 2.30–4.0. | III. The Orders of Greek and Roman Architec-
ture, their origin, development, and application | 50 |
| 4.0–5.30. | IV. Outlines of the History of Mediæval and
Renaissance Architecture in Europe..... | 75 |
| * * The papers to be illustrated by some perspective sketches. | | |

TUESDAY, 5th November 1907 and 16th June 1908.

| | | |
|----------------------------|---|-----|
| 10.0–12.0. | V. Theoretical Construction: Stresses, Strains,
and Strength of Materials | 75 |
| 12.0–1.30. | VI. Descriptive Geometry: the Projection of
Solids | 50 |
| 1.30–2.30. | INTERVAL. | |
| 2.30–5.30. | VII. Elementary Applied Construction: the
Nature and Use of Ordinary Building
Materials | 125 |
| Total number of marks..... | | 500 |

[WEDNESDAY—interval.]

THURSDAY, 7th November 1907 and 18th June 1908.

Oral Examination on the Papers set and the Testimonies of Study.

* * The Questions set in June 1907 are printed on p. 345 ff.

The results of these Examinations are reported to the Council by the Board of Examiners, who recommend as to the fitness of the candidates for admission as Students, and return the names of those who pass in order of merit. On the approval by the Council of such recommendations the names and addresses of the successful candidates are entered in the Register of Students and published in the JOURNAL and KALENDAR of the Royal Institute; and the candidates receive notification of the fact.

Every Student R.I.B.A. has the right to use the Library and Loan

Collection of Books, and the right of admission to the Ordinary Meetings of the Royal Institute.

*** The list of books recommended to candidates as indicating generally the nature and limit of the course of study required for the Examinations is under revision by a Committee of the Board of Examiners, and will be published as soon as possible.*

III. THE FINAL EXAMINATION:

To Qualify for Candidature as Associate R.I.B.A.

Examinations (Written, Graphic, and Oral) of Students of the Royal Institute of British Architects are held by the Royal Institute twice a year, in the months of June and November, in accordance with the particulars given on the official form.*

A *Student R.I.B.A.* who has attained the age of at least 21 years, and who is desirous of qualifying for candidature as *Associate R.I.B.A.*, must make an application on the official form,* to be filled up as directed thereon, and to be accompanied by a remittance of Four Guineas, which will be returned should the application be refused. He must also send with his application Testimonies of Study† as hereinafter set forth, accompanied by a certificate from a member of the Royal Institute, or other person of recognised position, that the *Student* is a proper person to be admitted to this Examination, and that the Testimonies of Study he submits are his own work. Applicants unsuccessful at their first sitting may present themselves at one subsequent Examination without further fee; should they then fail to pass, a fresh fee must be paid for each subsequent attempt.

The Testimonies of Study required from Students R.I.B.A. are :—

1. A study of Ornament from the round, shaded.
- 2.† A design for a Building of moderate dimensions, such as a detached villa, parsonage, school, local institution, or cottage hospital, to be fully drawn out as working drawings to a scale of not less than one-eighth of an inch to the foot, in plans, elevations, and sections, duly figured and showing construction, drainage, with details of the construction and ornament, and a perspective view.
3. Drawings of some Historical Building, or part of a Building, made from actual measurement, with the jointing of the masonry &c. correctly shown, and the construction; the whole in plan, elevation, and section, carefully figured, with details at least one quarter full size. The original sketches measured and plotted on the spot are to be appended.
4. One sheet of diagrams of Constructive Masonry or Brickwork, such as arches or groined vaults, with the projection of arch and vault stones.
5. One sheet of diagrams of a Roof Truss of iron or steel, not less than 40 feet span, with details to a large scale, with all the calculations for strength at the various parts fully worked out and appended thereto.

* To be obtained at the Institute and from the Allied Societies.

† In order to test the Student's knowledge of what he has drawn and described in his "Testimonies of Study," they are brought up at the Oral Examination, when he is required to answer questions respecting them.

‡ Drawings prepared in competition for the following Institute Prizes—viz. the Soane Medallion, the Tite Prize, and the Grissell Gold Medal—may be submitted in place of the drawings enumerated in this paragraph.

Each of the sheets of drawings (half double-elephant, *i.e.* 27 inches by 20 inches) must be carefully finished as a complete work. The drawings must be delivered flat, in a portfolio 30 inches by 22 inches.

If the Testimonies of Study submitted by the Student be approved by the Board of Examiners, the Secretary of the Royal Institute communicates with him in reference to the place at which he is to attend for the Examination. The carriage of the Testimonies of Study to and from the office of the Royal Institute, and all expenses incidental thereto, must be defrayed by the owners. They will be delivered on demand to any person authorised by the owner to receive them, but the Institute will not incur any expense in returning them. Due care will be taken of the drawings, but the Royal Institute will not be responsible for any loss of or damage to them while they remain in its keeping.

The *Student* who successfully passes the Final Examination becomes qualified, subject to the provisions of Section 8 of the Charter, for candidature as Associate of the Royal Institute of British Architects; he receives, in due course, a notification to that effect, and his name is published in the Institute JOURNAL. He is then eligible on certain conditions for the award of the Arthur Cates Prize (*see next page*), and also for the Ashpitel Prize [p. 351], which is annually presented to the candidate who most highly distinguishes himself in the Final Examinations held during the year.

No entrance fee is required from candidates elected Associates within eighteen months of passing the Final Examination. Those not elected within that period are required to pay an entrance fee of Three Guineas.

In the event of any *Student* failing to pass the Final Examination within four years of having passed the Intermediate, his name will be removed from the Register of Students, unless the Council are satisfied that good cause exists for allowing it to remain.

A Final Examination, to qualify for candidature as Associate, and to be passed by Students whose Testimonies of Study before described have been approved, will be held in November 1907 and June 1908, as follows:—

THURSDAY, 14th November 1907 and 25th June 1908.

| Hours. | Division. | Maximum
No. of Marks. |
|--|--|--------------------------|
| 10.0-1.30. | I. Design of a building of moderate dimensions, or a portion of a more important edifice, to be made from particulars given. The drawings to comprise plans, elevation, and section, to a scale of $\frac{1}{8}$ inch to the foot, some details to a large scale, with a sketch perspective. The subject will be communicated in general terms to the <i>Student</i> some days before the Examination. | 350 |
| 1.30-2.30. | INTERVAL. | |
| 2.30-5.30. | I. Design continued. | |
| FRIDAY, 15th November 1907 and 26th June 1908. | | |
| 10.0-1.30. | I. Design continued. | 350 |
| 1.30-2.30. | INTERVAL. | |
| 2.30-5.30. | I. Design continued. | |

SATURDAY, 16th November 1907 and 27th June 1908.

| <i>Hours.</i> | <i>Division.</i> | <i>Maximum
No. of Marks.</i> |
|--|---|----------------------------------|
| II. The Principal Styles of Architecture: their Features, Mouldings, and Ornament— | | |
| 10.0-1.30. | (i) The Characteristic Mouldings, &c., of the special style* selected by the Student ... | 125 |
| 1.30-2.30. | INTERVAL. | |
| 2.30-5.30. | (ii) The Characteristic Mouldings, &c., of the Principal Styles of Architecture.....
The Student will be expected to show a thorough acquaintance with the Style selected, also a competent acquaintance with the details of other Styles. | 75 |

MONDAY, 18th November 1907 and 29th June 1908.

| | | |
|-------------|---|----|
| 10.0-11.30. | III. The Nature and Properties of Building Materials: their decay, preservation, and quality, and their application in building... | 75 |
| 11.30-1.30. | IV. The Arrangement and Construction of Buildings, in relation to health. Drainage, water supply, ventilation, lighting, and heating... | 75 |
| 1.30-2.30. | INTERVAL. | |
| 2.30-5.30. | V. Specifications and Estimating. A specification of the work in various trades. The Measurement and Cost of Building work. The Conditions for Building Contracts.
<i>Questions on Professional Practice will be included in this subject.</i> | 75 |

TUESDAY, 19th November 1907 and 30th June 1908.

| | | |
|----------------------------|---|--------------|
| 10.0-1.30. | VI. Construction. Foundations, walls, retaining walls, arches, vaults, floors, roofs, &c.; and constructive details in all trades | 100 |
| 1.30-2.30. | INTERVAL. | |
| 2.30-5.30. | VII. Construction. Construction in iron and steel. Shoring, underpinning, and dealing with ruinous and dangerous structures..... | 125 |
| Total number of marks..... | | <u>1,000</u> |

[WEDNESDAY—interval.]

THURSDAY, 21st November 1907 and 2nd July 1908, and the following day if necessary.

Oral Examination on the various Papers and the Testimonies of Study.

* * The Questions set in June 1907 are printed on p. 363 ff.

The Arthur Cates Prize (Value Forty Guineas).—This Prize is open only to Students, British subjects, who have passed the Institute Final Examination at one sitting. Competitors must enter for the Prize within two years of having passed the Examination. The Prize is awarded to the Student who submits the best set of drawings, as follows:—1. The original "Testimonies of Study" which procured him admission to the Final Examination, provided that such Testimonies have been certified by the Board of Examiners as of sufficient excellence to be admitted into the

* The special styles from which candidates may choose are (A) Classic and Renaissance; (B) Mediæval; no further subdivision is allowed.

Competition; 2. Not less than three sheets comprising studies of subjects of Classical or Renaissance, and of Mediæval Architecture, accurately drawn in perspective and shaded by rule, and also detailed studies of a groined vault of any period between A.D. 1100 and 1500. (For fuller particulars see Prizes and Studentships pamphlet.)

The Ashpitol Prize.—This Prize, which consists of books to the value of about £10, is (subject to conditions) awarded annually by the Council to the *Student* who, in the opinion of the Board of Examiners, distinguishes himself most highly in any one of the Final Examinations held during the year, and whom the Board recommend as deserving of such honour.

. *The List of Books recommended to candidates as indicating generally the nature and limit of the course of study required for the Examinations is under revision by a Committee of the Board of Examiners, and will be published as soon as possible.*

. *For particulars of the Special, Colonial, and Statutory Examinations see pp. 369, 370, 372.*

QUESTIONS SET FOR THE JUNE EXAMINATIONS 1907.

I. THE PRELIMINARY.

Monday Morning : three hours and a half.

I. SHORT ENGLISH COMPOSITION.

One hour.

Write a short essay on *one only* of the following subjects :—

1. The recent visit of the Colonial Premiers.
2. Traces of the occupation of Britain by the Romans.
3. Architecture in the United States of America.
4. "Well-begun is half-done."

[Maximum of Marks : 40.]

II. WRITING FROM DICTATION.

Half an hour.

Write out and punctuate a short passage read by the Examiner.

[Maximum of Marks : 20.]

III. ARITHMETIC, ALGEBRA, AND ELEMENTS OF PLANE GEOMETRY.

Two hours.

Candidates were required to attempt at least one question in each branch of the subject.

1. A rod of brickwork contains 306 cub. ft. ; find the cost at £12 per rod of a brick wall 34 yds. by 7 feet 6 inches by 1 foot 2 inches thick.
2. Express the difference between '623175 of £3 7s. 8d. and '41933 of £2 7s. 6d., as a decimal of £16 13s. 9d.
3. In 4 days of 6 hours each 5 men and 6 boys can earn £5 8s., a man earning half as much again per hour as a boy. How much can 10 men and 9 boys earn in 6 days of 5 hours each ?
4. Divide the product of $x^3 - 3x^2 + 3x - 1$, $x^2 - 2x + 1$, and $x - 1$ by $x^4 - 4x^3 + 6x^2 - 4x + 1$.
5. If $x = 2$, $y = -\frac{1}{2}$ find the numerical value of

$$\frac{3y}{x-y} - \frac{x}{x+y} - \frac{x^2 + 2xy}{2xy - y^2}.$$
6. Solve $\frac{11x - 5y}{11} = \frac{3x + y}{16}$, $8x - 5y = 1$
7. The angles at the base of an isosceles triangle are equal, and if the equal sides be produced the angles on the other side of the base shall be equal.
8. To a given straight line to apply a parallelogram which shall be equal to a given triangle and have one of its angles equal to a given rectilineal angle.
9. If a straight line is divided into any two parts, then the squares of the whole line and of one of the parts are equal to twice the rectangle contained by the whole and that part, together with the square of the other part.

10. Draw a circle of radius 5 centimetres; in it place a chord PQ 6 centimetres long; produce PQ to R so that QR shall be 6 centimetres; from R draw a tangent to the circle and measure its length.
11. Construct a triangle ABC having $BC = 4$ inches, $\angle B = 30^\circ$, $\angle C = 90^\circ$, forming the angles by geometrical construction. Describe a circle to pass through the mid-points of the sides, and also inscribe a circle in the triangle. Measure both radii and the distance between the centres of the circles.
12. If one side of a triangle is produced, then the exterior angle is greater than either of the interior opposite angles.

* Either questions 7, 8, and 9, or questions 10, 11, and 12 had to be attempted; but questions were not to be selected from both groups.

[Maximum of Marks: 100.]

Monday Afternoon: three hours.

IV. GEOGRAPHY AND HISTORY.

One hour and a half.

Answers were not required to more than six of the questions, viz. three in each section, A and B.

SECTION A.

1. Explain the meaning and give two instances in Europe of each of the following:—*cape, isthmus, glacier, watershed, delta*.
2. Into what four Provinces is Ireland divided? Name the counties with capital towns of one of these.
3. Give the position of the following towns, and for what each is noteworthy:—Huddersfield, Cardiff, Dundee, Belfast, Antwerp, Riga, Valetta, Bucharest.
4. Describe the course of the Rhine or the Danube, naming its chief tributaries and the principal towns on its banks.
5. Draw an outline map of Wales or of Italy, showing the chief physical features, and the position of eight large towns. Trace the course also of at least one important railway.

SECTION B.

1. Show, in a tabular form, the descent of Henry VI. from Henry II. How many years elapsed between the accession of Henry II. and the death of Henry VI.?
2. Relate the causes which led to the formation of a *national* party in the reign of Henry III. What were the Provisions of Oxford, and the Dictum of Kenilworth?
3. Give a short account of two of the following:—Stephen Langton, Piers Gaveston, Owen Glendower, Sir Thomas Wyatt, Lady Jane Grey.
4. What were the Statutes of Livery and Maintenance and of Fines? Explain the terms: Benefit of Clergy, High Treason, Attainder.
5. What were the circumstances which led to the attempted invasion of England by Spain in the reign of Elizabeth? Give a short account of that attempt.

[Maximum of Marks: 60.]

V. LATIN, FRENCH, OR GERMAN.

One hour and a half.

Candidates were to attempt only one language—Latin, or French, or German—as previously selected.

LATIN.

I. Translate into English :—

Fuerunt olim duo pictores celeberrimi, quorum alter Zeuxis, Parrhasius alter appellatus est. Hi aliquando de arte certabant. Zeuxis uvas pinxerat, atque sic erat imitatus naturæ veritatem, ut aves ad tabulam advolarent, quasi veræ essent uvæ. Tum Parrhasius tabulam attulit, in qua linteum pinxerat. Zeuxis deceptus pictum linteum verum habuit, sub quo pictura occultaretur. Quum igitur diutius morari videretur Parrhasius, Zeuxis flagitabat, ut tandem linteum removeret, ostenderetque picturam. Tum vero quum intellexisset errorem, palmam Parrhasio detulit ingenuo pudore, quoniam ipse aves fefellisset, Parrhasius autem ipsum artificem.

II. GRAMMATICAL QUESTIONS.

1. Decline in the singular *ingenuo pudore*; in the plural *veræ uvæ*.
2. Parse fully: "Tum vero quum intellexisset errorem, palmam Parrhasio detulit."
3. Give the principal parts of, *appellatus est, pinxerat, attulit, occultaretur, videretur, fefellisset*.

III. Translate into Latin :—

1. He led the men under the bridge.
2. Cassius, who was the general in that war, is now dead.
3. It is the duty of the master to praise the good.
4. He said that he would come.
5. The city was stormed by our soldiers.
6. Troy having been taken by the Greeks, Æneas came into Italy.

FRENCH.

I. Translate into English :—

Dans ce moment, les premiers rayons du soleil levant parurent dans la chambre. "L'heure est venue," dit-elle; "il faut nous séparer." Elle s'assit ainsi que ses parents et les deux amis, comme il est d'usage en Russie en pareille circonstance. Lorsqu'un ami part pour un voyage de long cours, au moment de faire les derniers adieux, le voyageur s'assied; toutes les personnes présentes doivent l'imiter; après une minute de repos, pendant laquelle on parle du temps et de choses indifférentes, on se lève, et les pleurs et les embrassements commencent. Cette cérémonie, qui au premier coup d'œil paraît insignifiante, a cependant quelque chose d'intéressant. Avant de se séparer pour longtemps, peut-être pour toujours, on se repose encore quelques moments ensemble, comme si l'on voulait tromper la destinée et lui dérober cette courte jouissance.

II. GRAMMATICAL QUESTIONS.

1. Write with all the necessary accents the following sentence, drawing a line through each letter which should not be pronounced

in reading it aloud :—*J'aperçus pres de la fenetre mon eleve occupe a ecrire.*

2. Write in French *ninth, twenty-first, eighty men, Henry the eighth, seven hundred miles, July the tenth sixteen hundred and seventy three.*
3. Write in full the present indicative of *jeter* and *s'en aller*; and the present subjunctive of *pouvoir* and *prendre*.

III. Translate into French :—

1. He will come and see you to-morrow, if you write to him to-day.
2. We arrived at the station in time for the four o'clock train.
3. What is the name of this town? I believe it is called Bath.
4. Do let us visit the picture-gallery here.
5. That water is fresher than this. Is it not so?
6. Did you suffer from sea-sickness when you crossed the Channel?

GERMAN.

I. Translate into English :—

In der schönen Stadt Nürnberg wurde am 24. Mai 1471 der grosse Künstler Albrecht Dürer geboren. Sein Vater war ein Ungar, der sich als Goldschmied dort niedergelassen hatte. Dieser sah bald, dass sein Sohn aussergewöhnliche Begabung für die Kunst hatte, und schickte ihn schon als fünfzehnjährigen Knaben zu Michel Wohlgemut. Von 1490 bis 1494 reiste er in der Fremde und besuchte in diesen Wanderjahren auch Venedig. Dann kehrte er nach Nürnberg zurück. Schon im Jahre 1497 malte er seinen Vater, ein sehr schönes Bild; und aus dem Jahre 1500 haben wir das herrliche Selbstporträt, das ihm einen Platz unter den ersten Künstlern seiner Zeit sicherte. Im Jahre 1506 kam er wieder nach Venedig und wurde aufs wärmste begrüsst. Er traf dort viele Männer, die sich in der Wissenschaft, in Kunst und Musik ausgezeichnet hatten. Es zog ihn aber doch endlich in seine Heimat zurück, wenn auch die Tage in Italien schön gewesen waren. Als er Abschied nahm, rief er traurig: "O, wie wird mich nach der Sonne frieren!"

II. GRAMMATICAL QUESTIONS.

1. Give the genitive singular and plural, and the English, of: Fuchs, Affe, Fliege, Hand, Bett, Schmetterling.
2. Decline in the singular and plural: der gross-Hund, klein-Kind; die faul-Magd.
3. Write down the first person singular present indicative active, the past participle, and the meaning of the following imperfect tenses: lobte, ging, kam, wollte, trug, las, regnete, mochte.

III. Translate into German :—

1. How can people live in this town? There is so much smoke in it.
2. More than seventy thousand people live here because they must.
3. Many work ten hours every day. Then they are very tired in the evening.
4. I asked his brother what was the matter with him.
5. There has been scarcely any rain all September; soon we shall have no water to drink.
6. Have you no river near the town in which you live?

[Maximum of Marks : 80.]

Tuesday Morning : three hours and a half.

VI. GEOMETRICAL DRAWING, OR ELEMENTS OF PERSPECTIVE.

Questions were to be answered in A and B as previously selected.

A. GEOMETRICAL DRAWING.

1. In a given isosceles triangle inscribe two equal circles touching two sides of the triangle and the other circle.
2. Construct a square the diagonal of which is 1 inch and $\frac{7}{8}$ inch.
3. Describe any regular polygon on a given straight line A B.
4. Construct an ellipse the major axis of which is $2\frac{1}{2}$ inches and the minor axis $1\frac{1}{2}$ inches; find the points for constructing the figure by means of intersecting arcs.
5. On a certain drawing a line measuring 2 inches and $\frac{1}{8}$ of an inch represents 11 feet 6 inches; draw the corresponding scale, divided generally into 10-foot lengths, with one such length subdivided into single feet and 1 foot into inches.
6. Draw to a $\frac{1}{4}$ scale the plan of a rectangular room, 32 feet long and 17 feet wide, enclosed with 14-inch walls. On one long side are two chimney breasts each 7 feet wide, and the centres being 8 feet 6 inches from either end of room. The fireplace opening in breast is 4 feet wide and 14 inches deep, and projects into the room 9 inches. On the opposite side of room are two semi-circular bay windows struck from a centre 4 feet within the room, the width of the opening in the room being 8 feet. Divide the bays into four equal-sized windows having mullions 4 inches wide. The centres of bay windows are 8 feet 6 inches from either end wall, so as to be immediately opposite the fireplace openings. On one short side of the room there is a doorway 5 feet wide, and at the other a four-light window, 9 feet wide, with mullions, each 4 inches wide. Show portion of a pavement composed of octagons and squares, the octagons having a diameter of 1 foot.

Figure on all dimensions.

B. ELEMENTS OF PERSPECTIVE.

1. Briefly describe in what way a perspective drawing differs from an isometrical view and an elevation respectively.
2. Define and illustrate by sketches :—
(i) Angle of vision. (ii) Measuring line. (iii) Picture plane.
3. What do you understand by the term "violent perspective," and state how this is to be avoided.
4. Draw in perspective a four-leaved screen 5 feet 6 inches high, the leaves being 1 foot 9 inches wide and standing open at an angle of 40° , the horizontal line to be above the object, and the station point to be to the right.
5. Draw in perspective, set out from plan and elevation drawn to an inch scale, a shaft 7 feet high and square on plan, tapering from a width of 14 inches at bottom to 10 inches at top, the shaft placed centrally on a 2-foot-square plinth block 18 inches high, standing upon a square base 12 inches high, and projecting 6 inches beyond each face of the plinth block. Total height 9 feet 6 inches, and width of base 3 feet square.

One angle of base to touch the picture plane, and the horizontal line to be 3 feet 6 inches above ground line.

The vanishing points in Questions 4 and 5 to be on the paper.

[Maximum of Marks : 80.]

Tuesday Afternoon : three hours.

VII. ELEMENTARY MECHANICS AND PHYSICS.

One hour.

Answers were not required to more than six questions.

1. A force of 200 lb. is resolved into two others acting at right angles ; one of the components is 56 lb., what is the other component ?
2. Weights of 2, 4, 6, and 12 lb. respectively are placed 1 foot apart on a yard rod. Find the point on which it should balance if the weight of the rod is disregarded.
3. Distinguish between the three different kinds of levers, and illustrate by examples the advantage gained in each case.
4. A particle moving with uniform acceleration has at a given point a velocity of 33 feet per second ; 11 seconds later it has a velocity of one mile per minute. Determine the measure of the acceleration in foot-second units.
5. What advantages are obtained by using (a) a single fixed pulley ; (b) a single movable pulley and a single fixed pulley with one cord passing over both ? (*Draw diagrams.*)
6. Explain how you would find the specific gravity of a liquid. A 56-lb. weight weighs 48·73 lb. in water. What is its specific gravity ?
7. The area of the smaller piston of a hydrostatic press is $\frac{1}{4}$ square inch, and the pressure on it is 1 lb. If the weight supported on the larger piston is 1 ton, what is the area of the larger piston ?
8. Explain the difference between a mercury barometer and an aneroid barometer. If the barometer rises from 29·524 to 29·829 inches, what is the increase in pressure in pounds per square inch ?

[Maximum of Marks : 80.]

VIII. FREEHAND DRAWING FROM THE ROUND.

Two hours.

Hon. Examiner : H. P. BURKE DOWNING.

The candidate was required to make a drawing of a cast of ornament placed before him.

[Maximum of Marks : 40.]

II. THE INTERMEDIATE: QUESTIONS SET AT THE JUNE EXAMINATION 1907.

Monday Morning : three hours and a half.

I. THE SEVERAL VARIETIES OF CLASSIC ORNAMENT.

One hour and a half.

Hon. Examiners : $\left\{ \begin{array}{l} \text{COLE A. ADAMS.} \\ \text{E. GUY DAWBER.} \\ \text{W. H. SETH-SMITH.} \end{array} \right.$

Questions 1 and 5 were to be answered, and not more than four altogether.

1. In what position was ornament, as distinct from statuary and relief carving, placed upon temples and other buildings ? Sketch three varieties of ornament used.
2. Draw a honeysuckle ornament about 4 inches high with scrolls, and show by a small key plan the position in which it is generally found in buildings.

3. Draw a guilloche or interlaced ornament about 3 inches high, and show clearly where this was used, and whether in Greek or Roman architecture.
4. Give two sketches, each about 4 inches high, of a Greek and Roman Ionic Order, showing the entablature and capital in profile and elevation with the respective ornament.
5. Describe concisely where colour decoration as distinct from carving was used in Classic architecture.

[Maximum of Marks : 50.]

II. THE CHARACTERISTIC MOULDINGS AND ORNAMENT OF EACH PERIOD OF ENGLISH ARCHITECTURE FROM A.D. 1000 TO 1550, WITH THEIR APPLICATION.

Two hours.

Hon. Examiners : { W. A. FORSYTH.
W. J. TAPPER.

Candidates were not expected to attempt more than four questions.

1. Write a brief account (illustrated by marginal sketches) of the gradual change in the sectional profile of stone door jambs during three centuries, from c. A.D. 1100 onwards.
2. Illustrate full size in a workmanlike way two typical fourteenth-century gable crosses with apex stones.
3. Draw in full size section a series of cap mouldings, each of a different century, assigning to each approximately an appropriate date.
4. Write a brief account (illustrated by marginal sketches) of the gradual development of stone vaulted roofs during three centuries, from c. A.D. 1100 onwards.
5. Draw full size of at least four different sections of window mullions, illustrating variation in section, from the twelfth to the fifteenth century, and assign to each example approximately an appropriate date.
6. A fifteenth-century octagonal oak pulpit is framed in panels having traceried heads. Illustrate one of these heads by a sketch, and give full size section of the mouldings of one angle post and tracery.

[Maximum of Marks : 75.]

Monday Afternoon : three hours.

III. THE ORDERS OF GREEK AND ROMAN ARCHITECTURE : THEIR ORIGIN, DEVELOPMENT, AND APPLICATION.

One hour and a half.

Hon. Examiners : { W. FLOCKHART.
A. C. HOUSTON.

All Candidates were expected to attempt the first two questions, and not more than two others.

1. Draw to a scale of $\frac{1}{2}$ inch to a foot an example of the Greek Ionic Order, the total height of column and entablature to be 20 feet. Any well-known example may be followed, and the detail of volute, &c., is not required. Give section of entablature and base of column to $1\frac{1}{2}$ -inch scale.
2. Illustrate by sketches any two examples of Greek Corinthian capitals with which you are acquainted, and give some particulars of the buildings to which they appertain.
3. Describe any variations from the Greek Doric Order of the Parthenon in any other example of the Order with which you are acquainted, illustrating the same with sketches.

4. Mention six ancient Roman buildings with the Order or Orders used in each.
5. Sketch the plan and section of the atrium of a typical Roman house.
6. Draw an example of a doorway or window of an Italian Renaissance palace, showing the application of the Orders to such features.

[Maximum of Marks : 50.]

IV. OUTLINES OF THE HISTORY OF MEDÆVAL AND RENAISSANCE ARCHITECTURE IN EUROPE.

One hour and a half.

Hon. Examiner : H. P. BURKE DOWNING.

Candidates were not required to attempt more than four questions.

1. Describe the methods of construction employed in the domes respectively of the Cathedrals of St. Peter at Rome and Sta. Maria at Florence, and compare them from the point of view of design also.
2. Give a description of any important building erected in the fifteenth century, and particularly of any distinguishing features.
3. Compare the structural principles exhibited in vaulting in England and on the Continent, and illustrate your comparison by sketches.
4. How has the ordinary form of a pre-Norman church influenced the development of the plan of English parish churches? Give a sketch of a typical plan of a pre-Norman British church.
5. Contrast the thirteenth-century ecclesiastical architecture of England with that of either France or Germany.

[Maximum of Marks : 75.]

Tuesday Morning : three hours and a half.

V. THEORETICAL CONSTRUCTION: STRESSES, STRAINS, AND STRENGTH OF MATERIALS.

Two hours.

Hon. Examiners : { ARTHUR ASHBRIDGE.
MATT. GARBUTT.

Candidates were required to attempt not more than six questions.

1. What is the total stress in the bottom flange of a steel girder of which the effective span is 17 feet and the effective depth 15 inches, and which is loaded uniformly from end to end with a load of $1\frac{1}{2}$ tons per foot run?
2. If the effective depth of the girder mentioned in Question No. 1 were made 30 inches, all other dimensions remaining unaltered, what would then be the total stress in the top flange?
3. If W equals the total load upon and L the total length of a beam or girder, give the maximum bending moments when the beam is
 - (a) fixed at one end and free at the other and has the load concentrated at the free end;
 - (b) fixed at one end and free at the other and has the load evenly distributed over its whole length;
 - (c) supported at both ends and has the load concentrated in the centre;
 - (d) supported at both ends and has the load evenly distributed over its whole length.

Also make diagrams showing how the bending moment at any point of the beam, in each of the above cases, may be ascertained.

4. The girder shown is to be assumed to be loaded over the whole 25 feet of its length from A to B with a load of 9 cwt. to the foot run. What weight of wall is necessary at A to maintain the girder

in equilibrium? The weight of the girder itself may be disregarded and only the loads and their moments around the head of the column need be considered.

5. A beam of fir is 14 feet long by 1 foot wide by 1 foot 6 inches deep. What uniformly distributed load will it safely carry?
6. A floor 36 feet long by 16 feet wide is supported by joists and girders resting upon columns and piers, as shown. There is a load due to the floor and weight on same of 2 cwt. per foot super uniformly distributed over the whole area, and in addition a wrought-iron

tank 10 feet diameter and 6 feet deep, filled with water, is placed upon the floor in the centre of the end bay, where shown. The thickness of the metal forming the tank may be assumed to average $\frac{1}{2}$ inch all over the sides and bottom. What is the weight upon each of the four columns?

7. Trusses, as shown in the diagram, are spaced 10 feet apart and loaded at the joints only. Taking the load upon roof at $\frac{1}{2}$ cwt. per

foot super, make a diagram showing the stresses in each member. Mark on your drawing the nature and amount of the stress in each member.

8. Determine, graphically, the load upon each abutment in the case given by diagram.

9. Give as many as you can of the following figures:—

- Safe load per foot super on stock brickwork in mortar (walls or piers not more than 12 diameters high).
- Safe load per foot super on best blue Staffordshire brickwork in Portland cement mortar (same limit of height as before).
- Ultimate tensile strength of mild steel, in tons per square inch.
- Ultimate tensile strength of wrought iron, in tons per square inch.
- Ultimate tensile strength of cast iron, in tons per square inch.
- Safe load in compression on cast iron in beams of ordinary proportions, in tons per square inch.
- Safe load in compression on wrought iron in beams of ordinary proportions, in tons per square inch.
- Safe load in compression on mild steel in beams of ordinary proportions, in tons per square inch.
- Factor of safety, minimum, for use in temporary steel buildings, with dead load only.
- Factor of safety, minimum, for use in good permanent work and with live loads.

10. What weight applied centrally will break a rolled steel joist ten inches by five inches on a span of 12 feet? The thickness of the flanges may be assumed to be $\frac{3}{8}$ inch.

[Maximum of Marks : 75.]

VI. DESCRIPTIVE GEOMETRY: THE PROJECTION OF SOLIDS.

One hour and a half.

Hon. Examiners: { LESLIE WATERHOUSE, M.A.
H. W. WILLS.

Candidates were not required to attempt more than four questions.

1. A cone is 5 feet high and has a diameter of 3 feet at base. Draw same to a scale of $1\frac{1}{4}$ inch to the foot, and project the surfaces obtained by :
A horizontal section 3 feet from top ;
An oblique section cutting the opposite sides 2 feet from top and 1 foot from bottom ;
A vertical section taken 1 foot from centre line ;
A section 1 foot from side, and parallel to it.
2. State the names of the various figures obtained in the previous question, and give in writing a definition of them.
3. A building 22 feet wide has its front wall at right angles to the two side walls, which are 32 and 42 feet long respectively. The pitch of the roof is 60° , and it is hipped at each end at 45° . Draw to $\frac{1}{8}$ -inch scale the outline plan of the roof, and show how to determine the points of intersection of the hip rafters with the ridge, and the length of the hip rafters.
4. Show the method of obtaining the curves of penetration of two cylinders 5 feet and 3 feet 6 inches in diameter respectively which penetrate each other at right angles. Draw same to a scale of 1 inch to 1 foot.
5. Draw in isometrical projection a circular ring 4 inches diameter and $\frac{1}{2}$ inch square in section.

[Maximum of Marks : 50.]

Tuesday Afternoon : three hours.

VII. ELEMENTARY APPLIED CONSTRUCTION: THE NATURE AND USE OF ORDINARY BUILDING MATERIALS.

Hon. Examiners: { R. STEPHEN AYLING.
T. DAVISON.

1. Define and illustrate by sketches :—
(a) Compound girder, (b) Reinforced concrete, (c) Hung folding, (d) Wiped joint, (e) Secret fixing, (f) Sheet-piling.
2. What materials would you consider best for the following purposes : (a) Foundation on a clay soil, (b) A fire-resisting floor, (c) Cill to a wood casement window, (d) A basement below water-level?
3. A room is 18 feet by 30 feet, with chimney-breast 7 feet wide on one side, containing four flues and fireplace opening; draw a diagram showing position of joists, &c. ; and 1-inch scale details of all construction : (a) with wood joists, (b) with steel joists and concrete, figure on all sizes.
4. Draw to $\frac{1}{8}$ -inch scale a principal, of wood and iron, 18 feet span, 45° pitch. State distance apart of principals and figure all sizes.

5. Draw plan, elevation, and section, $\frac{1}{2}$ -inch scale, of a niche in a stone wall, semicircular on plan, and with semicircular head, 4 feet wide, 6 feet high to springing, showing jointing, the courses to be 12 inches high.
6. A window in a hospital ward is 3 feet wide, 8 feet high; draw to $\frac{1}{2}$ -inch scale elevation, section, and plan.

[Maximum of Marks: 125.]

III. THE FINAL: QUESTIONS SET AT THE JUNE EXAMINATION 1907.

Thursday and Friday (six hours and a half each day).

I. DESIGN.

Hon. Examiners: { R. SELDEN WORNUM.
H. P. BURKE DOWNING.

Subject:—A CHURCH INSTITUTE FOR A SUBURBAN OR A COUNTRY TOWN.

Site:

50 feet frontage, 155 feet deep, in a street with shops on either side.

Ground Floor:

Central Entrance to Institute, with a shop on either side of it.

A Separate Entrance to the

Assembly Hall, 60 feet by 26 feet. The central entrance corridor to be 8 feet wide.

A Cloak-room in connection with the entrances must be provided on the ground floor.

Staircase to upper floors and down to basement for the use of the Institute.

A Lounge about 35 feet by 16 feet from which for the Institute purposes the Assembly Hall can be entered.

Small office off the Lounge for the Secretary.

Committee and retiring rooms, &c., at the far end of the hall.

Basement:

Gymnasium, same area as hall over (*i.e.* 60 feet by 26 feet), with dressing-rooms, w.c.'s, shower-baths, &c., in connection with it.

Small office for Instructor.

Lavatory, &c., for the use of the Institute.

Tea-kitchen and store, and service lift to first floor.

Photographic dark-room.

Stores under shops.

Heating apparatus.

First Floor:

Reading-room.

Library.

Smoking-room.

Games-room.

Tea-room.

Second Floor or Attic:

Caretakers' quarters.

The Drawings required are:

1. Plans of each floor and the roof.
2. One section from front to back.
3. One elevation.

(All to be drawn to a scale of one-eighth of an inch to a foot.)

4. Detail of front to half-inch scale, and section through it showing windows, start of floors, &c.
5. Perspective sketch of the elevation.

[Maximum of Marks : 350.]

Saturday Morning : three hours and a half.

II. THE PRINCIPAL STYLES OF ARCHITECTURE: THEIR FEATURES, MOULDINGS, AND ORNAMENT.

Hon. Examiners: { B. INGELow.
D. B. NIVEN.

Candidates were required to work in the style selected by them.

A.—CLASSIC AND RENAISSANCE.

1. Name all the mouldings and principal features in any temple of the Greek Ionic Order, and give sketches in detail to show the enrichments and ornament.
2. Describe and illustrate by sketches (to as large a scale as necessary to be clear) the principal differences between Greek and Roman architecture.
3. Draw in detail an angle view, perspective sketch (about 6 inches high, from a standpoint below the level), of the capital of a characteristic Byzantine column showing the springing of the arch.
4. Sketch three typical features of the Italian Renaissance, the first to be characteristic of the Florentine, the second of the Roman, and the third of the Venetian schools; each sketch to fill about 6 inches square.

B.—MEDIÆVAL.

5. Describe and sketch the following: Barbican, chevron, jube, louvre, respond.
6. Draw, quarter full size, the wrought-iron ornamental hinge for a door 4 feet wide.
7. Draw to inch scale a wooden screen suitable for a church or hall; give plan, elevation, and section, and some of the details full size. The drawings need only be completed enough to show the design.
8. Draw to half-inch scale a four-light window; give plan, elevation (half inside and half outside), and section; draw the principal details, full size, and show carefully the jointing of the masonry. The drawings to be completed sufficiently to show the design.

[Maximum of Marks : 125.]

Saturday Afternoon : three hours.

II. THE PRINCIPAL STYLES OF ARCHITECTURE: THEIR FEATURES, MOULDINGS, AND ORNAMENT (*continued*).

Hon. Examiners: { B. INGELow.
D. B. NIVEN.

A.—CLASSIC AND RENAISSANCE.

Every Candidate in Division A was expected to give an answer to Question No. 12.

9. Describe three features in late French Renaissance which are essentially different from the early French Renaissance manner each sketch to fill about 6 inches square.

10. Describe how English Renaissance differs from the Renaissance of other countries, and illustrate by not more than three sketches, each to fill about 6 inches square.
11. State some of the influences tending to cause these differences.

B.—MEDIEVAL.

Every Candidate in Division B was expected to give an answer to Question No. 9.

12. Sketch two or three examples of stone or brick chimneys.
13. Draw a quarter full-size the outside stone plinth of some cathedral or large church.
14. Draw to inch scale the sedilia in the chancel of some church; give plan and elevation and some of the details full size; show the jointing of the masonry.

[Maximum of Marks : 75.]

Monday Morning : three hours and a half.

III. THE NATURE AND PROPERTIES OF BUILDING MATERIALS: THEIR DECAY, PRESERVATION, AND QUALITY, AND THEIR APPLICATION IN BUILDING.

One hour and a half.

Hon. Examiners: { H. D. SEARLES-WOOD.
A. H. KERSEY.

Candidates were not expected to attempt more than six questions.

1. Describe the materials you would employ in building a retaining wall of a river-bank on a tidal river with a rise of 10 feet; the banks being clay; at low water the wall is left dry.
2. Give the supporting power per foot super of the following soils, and the materials you would employ for preparing the foundations to carry the base of a column not more than 1 foot 6 inches diameter with a load of 200 tons (a) clay, (b) gravel, (c) running sand. What tests do you use in deciding what depth you will carry your foundations down?
3. Give a list of the materials used for making mortar and the qualities and defects of each. Upon what characteristics do aggregates depend for strength in mortar, and why?
4. Give a list of the methods and materials employed to protect brick-work from dampness.
5. What are the causes of decay in stonework? How can they be avoided or cured?
6. What quality of steel would you use in reinforcing concrete? What treatment would you give it (if any) to prevent rusting before using it? Describe any one of the patent methods of construction in reinforced concrete.
7. Give a list of the materials used in making paint (a) bases, (b) vehicles, (c) solvents, (d) driers, (e) colour pigments. Give the advantages or defects and special uses of each material.
8. What materials would you employ in the construction of a fire-resisting building? What is the position each is best suited for, and what effect has fire on each material?

[Maximum of Marks : 75.]

IV. THE ARRANGEMENT AND CONSTRUCTION OF BUILDINGS
IN RELATION TO HEALTH.—DRAINAGE, WATER SUPPLY,
VENTILATION, LIGHTING, AND HEATING.

Two hours.

Hon. Examiners: { ARTHUR ASHBRIDGE.
F. T. W. GOLDSMITH.

Candidates were not expected to attempt more than five questions, but all were to attempt Questions 1 and 2.

1. The accompanying plan represents a portion of a terrace of small houses three stories high which are to be drained by a combined system of drainage through a narrow passage at the rear of the back yards. Show on same the system of drainage that you would advise. It is to be assumed that in addition to the usual rain-water pipes and yard gullies there are on the ground floor two w.c.'s, one lavatory basin, and one sink in each house; also that there is on the first floor one w.c., one bath, one lavatory basin, and a housemaid's sink; also that on the second floor there is a bath.
2. Draw to a scale of 4 feet to an inch an elevation showing the soil pipe, waste pipe, &c., of one house.
3. It is proposed to build a shop having a basement and sub-basement, which are to be used as showrooms. Explain how you would ventilate the sub-basement, and give sketches.
4. Explain what means you would adopt to keep the basement and sub-basement referred to in the last question dry. It is to be assumed that the subsoil is clay.
5. If you were building a swimming-bath in a poor neighbourhood, show by a cross-section through the wall of bath and path round it what precautions you would adopt to prevent the contamination of the bath water. How would you construct the dressing compartments?
6. Make sketch showing a range of trough closets for a school.
7. Draw to a scale of 1 inch to a foot a plan and section of a man-hole not less than 10 feet deep.
8. Explain what is meant in sanitary work by a "thimble." When and where is it used, and why? Make sketch showing same.

[Maximum of Marks: 75.]

V. SPECIFICATIONS, ESTIMATING, AND PROFESSIONAL
PRACTICE.

Monday Afternoon : three hours.

Hon. Examiners: { A. BURNELL BURNELL.
W. HENRY WHITE.

Not more than five questions were to be answered.

1. Write a specification for the underground drainage work of a large town house.
2. Give the headings of the clauses which should be embodied in a contract between the owner and the contractor—
 - (a) From the owner's point of view.
 - (b) From the contractor's point of view.
 - (c) As to the powers of the architect—

3. In a first-class block of flats of four stories the sanitary wing contains best and servants' w.c.'s, two baths, and one lavatory in bathroom, and scullery and pantry sinks. Specify the plumber's work and fittings in detail with sketches of soil pipe and connections to w.c.'s, stating p.c. cost of fittings to be provided.
4. Write out the *preliminary clauses* in a specification for a large country house as to the following trades:—
 Concretor and bricklayer.
 Carpenter and joiner.
 Plumber.
5. Specify in detail the materials and workmanship for—
 (a) Rough-casting external walls.
 (b) Boarding, felting, battening, and tiling roofs.
 (c) The sashes and frames and casements and frames for the house mentioned in previous question.
6. In adjusting accounts at the completion of a contract, what steps would you take to protect the client's interests?
7. Give alternative methods of arriving at an approximate estimate from a set of sketch plans, and state the relative value per cubic foot for—
 (a) A cottage.
 (b) A small town hall.
 (c) A block of city offices in an important thoroughfare.
8. A billiard-room 30 feet by 20 feet is to be roofed with steel joists and covered with asphalte. There will be a lantern light 12 feet by 6 feet over the table, and the outer walls will have an ornamental stone balustrade above the flat. Write a specification for the stonework, the roofing, and lantern light.

[Maximum of Marks : 75.]

Tuesday Morning : three hours and a half.

VI. CONSTRUCTION: FOUNDATIONS, WALLS, RETAINING WALLS, ARCHES, VAULTS, FLOORS, ROOFS, &c., AND CONSTRUCTIVE DETAILS IN ALL TRADES.

Hon. Examiners: { ALFRED CONDER.
 GEORGE HUBBARD, F.S.A.

Candidates were not expected to answer more than four questions, but all were to attempt the first.

1. A lofty and substantial warehouse is to be erected upon a site which has a bed of soft clay 6 feet in thickness under a layer of made ground 5 feet in depth below the surface level.
 Draw to scale 2 feet to 1 inch, section and plan showing the pile foundations you would suggest. Only a part of the building to be dealt with—namely that at one corner, including the foundations for internal columns and piers. The footing for the wall, &c., to be drawn at a depth of 5 feet below the lowest floor line. Assume your own dimensions and plan.
2. Draw to scale 2 feet to 1 inch, section and part elevation of a corridor bridge, 10 feet wide in the clear, across a thoroughfare 40 feet in width. The floor and roof to be fire-resisting, and the walls to be of brickwork constructed upon steel. Adequate abutments are to be assumed. Calculations are not asked for.
3. Make a detail elevation and section to scale 2 feet to 1 inch, of the masonry of an oriel window between pilasters or piers on the first floor story of a City bank faced with stone, over an arched

doorway on the ground-floor story. The projection to be 2 feet 6 inches beyond the straight frontage.

Assume your own dimensions, and show the jointing.

4. Design the construction of a timber hammer-beam roof with a span of 30 feet.

Draw a transverse section to scale, 2 feet to 1 inch, and give three details of various joints to one-eighth of the full size.

5. A lantern light covering a well hole 10 feet by 6 feet is to be constructed of wood on a lead flat.

Draw to scale, 2 feet to 1 inch, two sections showing the connection with lead flat, the means of ventilation, disposal of condensation, &c. Also sketch sectional details through three principal parts, quarter full size.

[Maximum of Marks : 100.]

Tuesday Afternoon : three hours.

VII. CONSTRUCTION: CONSTRUCTION IN IRON AND STEEL; SHORING, UNDERPINNING, AND DEALING WITH RUINOUS AND DANGEROUS STRUCTURES.

Hon. Examiners : { LEWIS SOLOMON.
ARTHUR CROW.
W. E. V. CROMPTON.

1. There is a pair of semi-detached warehouses 30 feet deep, with a total frontage of 30 feet "out to out." The warehouses consist of a ground floor and three stories over, each 12 feet high floor to floor, with flat iron and concrete roof. The walls are of unplastered brickwork. It is proposed to remove the party-wall on the ground floor and insert iron stanchions in lieu of same. The soil is gravel of good quality, but the front wall is badly bonded to the side walls. State clearly and shortly how you would proceed.
2. If the weight carried by the ground-floor party-wall in the previous question be assumed 240 tons all inclusive, and the depth be divided into three equal bays by two stanchions between the front and back walls, draw one quarter full-size plan of stanchion, showing elevation to same scale of base and footings; also head of stanchion carrying girder over.
3. The front wall in the previous questions into which the party-wall is tied consists of a middle pier of brickwork 3 feet by 1 foot 6 inches thick, with an opening 10 feet 6 inches wide on each side of this pier, and at each extremity a pier 3 feet wide. The middle pier shows signs of weakness. How would you stiffen it? Give sketches.
4. The stanchions in the previous questions carry a girder which supports the wall, &c., over. Sketch one-fourth full size the section of the girder, and figure the dimensions.
5. Sketch to 1-inch scale a flying shore between two buildings 20 feet apart. Figure the dimensions, and sketch one-fourth full size where the shore abuts against the wall.
6. It is decided to lower the floor of a drawing-room 2 feet 6 inches to make it practically level with the garden outside. On opening up the ground to underpin the wall this is found to have no footings, and has to be underpinned. The ground is of loose poor quality to a depth of 5 feet below the old base, and has to be removed. State step by step how you would proceed. There is no basement. The ground under the drawing-room is very damp.

[Maximum of Marks : 125.]

SPECIAL EXAMINATION :

To Qualify for Candidature as Associate R.I.B.A.

[For applicants exempted, by Special Resolution of the Council, from the Preliminary and Intermediate Examinations, and from submitting Testimonies of Study.]

The attention of architects in practice, not less than 25 years of age, and of chief assistants over 30 years of age, who may contemplate applying for admission to the Royal Institute of British Architects, is directed to the Regulations of the Special Examination qualifying for candidature as Associate, which is held twice a year, in the months of June and November, in accordance with the particulars given on the official Application Form.

Architects in practice, and chief assistants as above stated, who desire to be admitted as Associates, can be exempted from passing the *Preliminary* and *Intermediate* Examinations and from sending in "Testimonies of Study." They can be admitted, by resolution of the Council in each case, to a Qualifying Examination (namely, the *Final* [q.v.] of the three Examinations), which is conducted with especial regard to the requirements of such architects, their professional works and position being duly taken into account by the Board of Examiners.

The probationary work required to be submitted and approved prior to the applicant's admission to the Examination may consist of the working drawings of a building, executed or otherwise, of his own design, with a perspective view, and a drawing of some ornament from the round. All practitioners of architecture who have been in the active exercise of their profession for twelve years are exempted from submitting any probationary work. An applicant who has not been twelve full years in practice may submit the working drawings of any building erected from his design and under his superintendence; with a drawing of a building in perspective, and a sheet of ornament. Due care will be taken of probationary work submitted by applicants, but the Royal Institute will not be responsible for any loss of or damage to the drawings while they remain in its keeping; and applicants are expected to remove their probationary work immediately after the close of their examination.

A fee of Six Guineas for the Special Examination must be paid by each applicant on sending in his formal application. Applicants unsuccessful at their first sitting may

present themselves again within twelve months without further fee; should they then fail to pass, a fresh fee must be paid for each subsequent attempt. Should an applicant be admitted and pass he will be qualified, subject to Section 8 of the Charter, for candidature as Associate. The names of those who pass are returned alphabetically, and they are at once informed thereof, with a view to their presenting themselves for election as Associates—the entrance fee to which class is Three Guineas, and the annual subscription Two Guineas. Should an applicant fail to pass he will be informed of the fact, but the names of unsuccessful candidates are not published.

Applicants availing themselves of the foregoing special concessions are not eligible for the Ashpitel Prize.

COLONIAL EXAMINATIONS:

To Qualify for Candidature as Associate R.I.B.A.

Architects of not less than 25 years of age working in the Colonies, either as architects in practice or as assistants, can be admitted to the "Special Examination" [*q.v.*] qualifying for candidature as Associate, which is held at such colonial centres as the Council may from time to time determine. All applications must be made on the official form, to be obtained from the Secretary R.I.B.A., or at the colonial centres indicated below.

Prior to the applicant's admission to the Examination, probationary work must be submitted to, and approved by, the Board of Examiners sitting in London. Such probationary work must consist of the working drawings of a building, executed or otherwise, of the applicant's own design, with a perspective view, and a drawing of some ornament from the round. All practitioners of architecture who have been in the active exercise of their profession for twelve years are exempted from sending in probationary work. Probationary work must be forwarded to London at the expense of the applicant, but will be returned at the expense of the Institute.

A fee of Six Guineas for the Special Examination must be paid by each applicant on sending in his formal application. Should the application be refused, this fee will be returned. If the application be approved, the candidate will receive intimation from the Secretary as to the place

he will be required to attend for the Examination. Successful candidates are qualified, subject to Section 8 of the Charter, for candidature as Associate. The names of those who pass are returned alphabetically, and they are at once informed thereof, with a view to their presenting themselves for election as Associates—the entrance fee to which class is Three Guineas and the annual subscription Two Guineas. Should an applicant not be passed by the Board, he will be informed of the fact; the names of unsuccessful candidates are not published. Candidates unsuccessful at their first sitting may present themselves once more for examination without further fee. Should they then fail to pass, a fresh fee will be required for each subsequent attempt.

R.I.B.A. Colonial Examinations, 1908: Canada, Australia, and South Africa.—*Preliminary and Intermediate.*—The Institute of Architects of New South Wales (who conduct the Examinations in Sydney) and the Victorian Institute of Architects are empowered by the Council of the R.I.B.A. to grant at their discretion exemption from the Preliminary Examination to candidates who desire to enter for the Intermediate. Candidates desirous of admission to these Examinations must address their Testimonies of Study [see p. 345], Application Forms, and Fees direct to the Secretary R.I.B.A., 9, Conduit Street, London. These must be despatched in time to reach London not later than the first week in September of each year. Candidates will be informed in due course of the time and place of the Examination.

Final and Special.—Examinations will be held in Melbourne from 25th June to 2nd July 1908 inclusive, and in Toronto and Johannesburg in the following November, simultaneously with the Final and Special Examinations to be held in Great Britain. Application forms, fees, and probationary work must reach London from Melbourne by the first mail arriving after the 31st March 1908, and from Toronto and Johannesburg by the first mail arriving after the 31st August 1908.

Application forms may be obtained from the Secretary R.I.B.A. at the offices of the R.I.B.A. in London; from Mr. F. S. Baker, Hon. Sec. R.I.B.A. for Canada, Mail Building, Toronto; from Mr. G. C. Inskip, Hon. Sec. R.I.B.A. for Australia, 375, Collins Street, Melbourne; and from Mr. Charles Small, Hon. Sec. Transvaal Institute of Architects, P.O. Box 5606 Johannesburg, S.A.

BUILDING SURVEYING.

EXAMINATION QUALIFYING FOR CANDIDATURE AS DISTRICT SURVEYOR IN LONDON.*

Section 140 of the London Building Act 1894 provides :

The Royal Institute of British Architects may cause to be examined by such persons and in such manner as they think fit all candidates presenting themselves for the purpose of being examined as to their competency to perform the duties of District Surveyor, and shall grant certificates of competency to the candidates found deserving of the same, and a person who has not already filled the office of District Surveyor shall not be qualified to be appointed to that office unless he has received a certificate of competency from the said Institute or has been examined in such other manner as the Council may direct and been found competent in such examination.

The Candidate must be prepared to answer orally, in writing, or by means of architectural drawing, questions upon the following points, in order to satisfy the Board as to his competency for the office of a District Surveyor :—

1. The materials most in use in building ; their strength under various stresses, their excellences, defects, weight, decay, and other properties, and the indications of their being of good or bad quality. The rough methods of testing them on the spot. The bonding of masonry and brickwork, use of mortar and cement, framing of carpentry, and the testing of trusses and timber girders.
2. The loads and stresses affecting structures, and the modes of estimating them and calculating arches and the different parts of timber and iron structures ; especially such rapid modes of calculating as can be employed on the spot readily.
3. Cast iron, wrought iron, and steel. The design, testing, and fixing of constructional iron and steel work.
4. Foundations in various kinds of soil, and precautions to be taken in digging them ; expedients when the bottom is bad or under water. The risks of accident due to interference with foundations after they have been put in, or to increasing the load on them. The foundations of high chimney shafts. Indications of the failure of foundations.
5. Usual defects in construction and materials. Decay of structures. Neglected and dangerous structures. Shoring, underpinning, repair of walls, tying buildings together, forming openings in existing walls. The force of storms and stability of high structures.
6. The behaviour of various materials and modes of construction with reference to fire. Fire-resisting construction. Precautions necessary in heating and lighting buildings. Precautions to be taken in the storage of water.
7. The London Building Act of 1894 and the by-laws in force ; and the ordinary procedure thereunder, including the mode of valuing a party wall.
8. Defects or deficiencies in plans for a proposed building.

The Examination is held once a year—viz. in the month of October. For particulars as to attendance, fees, &c., see page 376.

* Application forms, to be filled up by persons desirous of being examined, can be obtained free of charge at the office of the Institute.

List of persons to whom The Royal Institute of British Architects has granted Certificates of Competency to act as District Surveyor in London.

- 1904.—Percy John Black; John Moir Kennard; John Todd.
- 1905.—Albert Anthony Fillary; Edgar Walsh Knight; Edwin Palser; Harry Tom Boden Spencer; Alexander Lionel Woodward.
- 1906.—Horace William Cubitt; William Robert Davidge; Percie Ion Elton; Herbert Kenchington; Gilbert Henry Lovegrove; William Herbert Rogers; Herbert Shepperd; William George Shipwright; Collings Beatson Young.

CONDITIONS OF THE APPOINTMENT.

No person is accepted as a candidate for the appointment of District Surveyor unless he shall have attained twenty-eight years of age and be under fifty years of age, and every candidate must deliver with his application satisfactory evidence of his age.

Every candidate is required to sign a declaration and deliver it with his application that he becomes a candidate, and will accept the appointment if he should be appointed, on the following understanding:—

- (a) That he will personally discharge the duties of his office, subject to section 142 of the London Building Act 1894.
- (b) That he will give his whole time to the duties of the office.
- (c) That he will not during his continuance in office (except in

the discharge of the duties thereof) carry on business as an architect, surveyor, or builder, or directly or indirectly, as a partner or otherwise, be interested in such business.

- (d) That he will make no claim for compensation in case a diminution of his income shall at any time hereafter arise.
- (e) That he will keep his District Office open from Monday to Friday (both inclusive) between the hours of 9.30 A.M. and 5 P.M., and on Saturday from 9.30 A.M. until 1 P.M., and give his personal attendance there daily from 9.30 to 10.30 A.M.
- (f) That he will retire, if required to do so, on attaining the age of 65, or at any date subsequent to his attaining that age.

The County Council reserves to itself the exercise of its powers of dismissal if the District Surveyor so appointed should not act consistently with the understanding above set forth in any of the matters referred to therein, or for other sufficient reason.

See List of District Surveyors now holding office, page 376; particulars as to fees, page 380.

EXAMINATION QUALIFYING FOR CANDIDATURE AS BUILDING SURVEYOR UNDER LOCAL AUTHORITIES.

The Candidate must be prepared to answer orally, in writing, and by means of architectural drawing, questions upon the following points, in order to satisfy the Board as to his competency for the office of a Building Surveyor:—

1. The materials most in use in building; their strength under various stresses, their excellences, defects, weight, decay, and other properties, and the indications of their being of good or bad quality. The rough methods of testing them on the spot. The bonding of masonry and brickwork, use of mortar and cement, framing of carpentry, and the testing of trusses and timber girders.
2. The loads and stresses affecting structures and the modes of estimating them and calculating arches and the different parts of timber and iron structures; especially such rapid modes of calculating as can be employed on the spot readily.
3. Cast iron, wrought iron, and steel. The design, testing, and fixing of constructional iron and steel work.
4. Foundations in various kinds of soil, and precautions to be taken in digging them; expedients when the bottom is bad or under water. The risks of accident due to interference with foundations after they have been put in, or to increasing the load on them; the weight different soils will carry. The foundations of high chimney shafts. Indications of the failure of foundations.
5. Usual defects in construction and materials. Decay of structures. Neglected and dangerous structures. Shoring, underpinning, repair of walls, tying buildings together, forming openings in existing walls. The force of storms and stability of high structures.
6. The behaviour of various materials and modes of construction with reference to fire. Fire-resisting construction. Precautions necessary in heating and lighting buildings. Precautions to be taken in the storage of water.
7. The sanitary precautions needed to secure healthiness of site. The materials used in and the mode of executing house drainage works, and the ventilation of houses and drains.
8. The "Model Bye-Laws."

List of persons to whom The Royal Institute of British Architects has granted Certificates of Competency to act as Building Surveyor.

- 1886.—John C. Lebon Bettridge.
 1887.—William Chapman Field.
 1888.—Cecil Orr; William Ward, jun.
 1889.—Henry Heugh Tasker; Robert Williams.
 1890.—Watson Hall; William Mortimer Paton.
 1895.—Francis Baugh Andrews; Hugh Davies.
 1896.—John Hoy Dunn.
 1901.—James Edwin Webb.
 1903.—William David Jenkins.
 1905.—William John Stainton.
 1906.—Harry Prince Healy.

Particulars applicable to both Examinations.

Candidates must, on the first of the two days appointed for the Examination, attend punctually at 9.45 a.m. at the Rooms of the Institute for the written and graphic examination, which occupies two sittings, namely, from 10 till 1 and from 2 till 5. Candidates are not allowed to bring or refer to any books or written memoranda. Each candidate must provide his own drawing-board and instruments.

At 11 o'clock on the following day, the Board of Examiners meet to inspect the papers and drawings, and to put such questions as they may think advisable to be answered orally by the Candidates; and they will ask for further particulars in those cases where the written answers are imperfect, insufficient, or incorrect.

Each Candidate, on sending in his paper (a form to be previously obtained at the office of the Institute), duly filled up, must pay a fee of Two Guineas. Afterwards, on receiving his Certificate of Competency, should the same be granted to him, he must pay a further sum of Three Guineas.

* * Statutory Examinations for the Offices of District Surveyor and Building Surveyor: October 15-16, 1908.

Woolwich.—ALFRED CONDER [F.]; *District Office*, 21, William Street, Woolwich; office hours, 10 to 4; personal attendance at District Office 10.30 to 11.30.

DISTRICT SURVEYORS' FEES.

The districts are re-arranged by the Committee of the London County Council as opportunities may occur, so that the average of the fees received may in no case amount to less than £500 per annum.

The following fees are paid by the London County Council to district surveyors, in accordance with section 155 of the London Building Act 1894:—

| | | | | | | | | | | | | |
|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|
| On reporting that the roadway of a street sanctioned by the Council has been defined and made throughout as regards levels, direction, width and gradient to comply with any statutes and by-laws for the time being in force regulating such street and to comply with the plans and sections attached to the Council's order sanctioning such street, and that all conditions (if any) attached to such sanction have been complied with | ... | ... | ... | ... | ... | ... | ... | ... | ... | 2 | 2 | 0 |
|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|

| | | | | | | | | | | | | |
|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|
| On reporting that a way has been adapted as a street, or that a street or way has been widened in accordance with a sanction given by the Council on an application made under section 10, and that all conditions (if any) annexed to such sanction have been complied with | ... | ... | ... | ... | ... | ... | ... | ... | ... | 1 | 1 | 0 |
|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|

| | | | | | | | | | | | | |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|
| On reporting that a building, forecourt boundary or fence has been set back to the distance from the centre of the street sanctioned by the Council under section 13 or 17, and all conditions (if any) annexed to such sanction have been complied with, and all land (if any) that should have been, has been added to the public way | ... | ... | ... | ... | ... | ... | ... | ... | ... | 0 | 5 | 0 |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|

| | | | | | | | | | | | | |
|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|
| On reporting that a building, other than a building sanctioned by the Council under section 13 or 17, and upon which the district surveyor is entitled to a fee under these standing orders, has been erected to the line of frontage for which the consent of the Council was given under section 22, and all conditions (if any) annexed to such consent have been complied with | ... | ... | ... | ... | ... | ... | ... | ... | ... | 0 | 5 | 0 |
|--|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|---|---|

| | | | | | | | | | | | | |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|----|---|
| For attending a Police Court to give evidence on behalf of the Council in relation to any of the above matters; for each attendance | ... | ... | ... | ... | ... | ... | ... | ... | ... | 0 | 10 | 0 |
|---|-----|-----|-----|-----|-----|-----|-----|-----|-----|---|----|---|

THE TRIBUNAL OF APPEAL.

The London Building Acts 1894 to 1905.

Clerk of the Tribunal : Mr. CHARLES HERBERT LOVE.

Offices : 13, Great George Street, Westminster, S.W.

THE Tribunal of Appeal, as constituted under sections 175 and 178 of the London Building Act 1894, is composed of three members—one appointed by a Secretary of State, one by the Council of the Royal Institute of British Architects, and one by the Council of the Surveyors' Institution. The members are appointed for a term of five years, and are eligible for re-appointment. Appeal may be made to the Tribunal under the several sections set out in the London Building Act 1894 (57 & 58 Vict., c. ccciii.) and in the London Building Acts (Amendment) Act 1905 (5 Edw. 7, c. ccix.); the Tribunal having power to hear the parties interested in person, or by counsel, solicitor, or agent; to administer oaths; to hear and receive evidence; to require the production of documents or books; and to confirm, reverse, or vary any decision appealed against, and to make any such order as they may think fit, also to award costs in their discretion.

When any question of *law* is involved in any appeal submitted to them, the Tribunal may, on the request of the parties, and it ordered by the High Court, or a Judge thereof, on an application in a summary manner made by any party to the appeal, shall state a case for the opinion of the High Court, which shall hear and determine such question of law, and thereupon reverse, affirm, or amend the decision of the Tribunal, or remit the matter to them with the opinion of the Court on the case stated, or make such other order as to the matter and as to the costs of the case as the Court sees fit.

Any order of the Tribunal may be enforced by the High Court as if it had been an order of that Court.

With the approval of the Lord Chancellor, Regulations have been made as to the procedure to be followed in cases of appeal, and as to fees to be paid to the Tribunal by the Appellants and other parties, copies of which may be obtained from the Clerk to the Tribunal on application.

Appeals are to be lodged (by hand) at the Office of the Tribunal, and the fee thereon paid, within the periods (if any) prescribed by the Acts, and where no period is so prescribed; within the time required by the Regulations.

The Tribunal consists of the following members :—

Mr. ALFRED ARTHUR HUDSON [*H.A.*], Barrister-at-Law, appointed by the Secretary of State for the Home Department (*President of the Tribunal*).

Mr. EDWARD AUGUSTUS GRUNING [*F.*], appointed by the Council of the Royal Institute of British Architects.

Mr. HERBERT THOMAS STEWARD, appointed by the Council of the Surveyors' Institution.

All communications should be addressed to the Clerk of the Tribunal. All payments to be made in cash. Office hours, 10 to 4 (Saturdays, 10 to 1).

THE LIBRARY.

THE Library of the Royal Institute of British Architects consists principally of books presented by their authors, members of the corporate body. Many have been received in large donations, others by bequest. From time to time standard works of reference are purchased, to meet the requirements of the professional student, as well as to maintain the special character and historic value of the collection. Not the least interesting portion of the Library is that which includes rare and valuable editions of Foreign Works, mostly presented by Hon. Corr. Members.

For convenience of reference the Catalogue is kept up to date with printed slips inserted as they appear in the announcements in the Supplement to the JOURNAL, together with cross-references. A Catalogue published in 1889, which was printed at the cost of the late David Brandon, contains all the works presented and purchased up to June 1887, with an Appendix comprising all the publications acquired up to the 31st December 1888. A Supplement to this Catalogue comprises additions from June 1887 to December 1898. Copies of the Catalogue complete, strongly bound in buckram, gilt lettered, may be purchased at the Institute, price 10s. 6d. The Supplement above mentioned may be had separately, price 1s.

From the 1st October till the end of June the Library is open from 10 a.m. to 8 p.m. (Saturdays 6 p.m.); in July and September it closes at 7 p.m. (Saturdays 2 p.m.). The Reference Library is closed during the whole of August, but Loan books may be received or issued between the hours of 12 and 2 daily.

All Probationers, Students, and Qualified Candidates for Associateship, on registration in the books of the Institute, are furnished with a card of admission, and such card must be shown by the reader at every visit. Members of the Architectural Association under the age of 23 years must be provided with a specially stamped card, to be annually renewed, signed by the Hon. Secretaries of the Association. Cards are also granted on the recommendation of members of the Institute, professors of colleges, schoolmasters, and others, who are required to certify, on a form to be obtained at the Institute, that the persons they recommend are fit to be admitted to the privileges of the Reference Library and the Loan Collection.

The Council, after due application has been made and inquired into, afford facilities to architects and others, not members of the Institute, to consult books in the Reference Library, and to have the use of the Loan Collection. Applications should be made in writing to *The Secretary R.I.B.A.* at the office of the Institute.

The Loan Library.—Books borrowed by members from the Loan Library are despatched at the cost of the Institute, but the return postage must be paid by the borrower.

RULES TO BE OBSERVED IN THE LIBRARY.

THE REFERENCE LIBRARY.

1. Every one using the Library must sign the Attendance Book placed at the entrance.

2. The front and back rooms are reserved for members of the Institute, but non-members are allowed access to any special books of reference there on application to the officer in charge.

3. No book or other work forming part of the Reference Library is allowed to be taken from the premises of the Institute, except by special resolution of the Council.

4. Readers desiring to trace are required to apply to the Librarian or officer in charge for a form, which must be duly filled up, giving particulars of the work and specifying the portion it is intended to trace. Soft pencils only may be used in tracing. In the case of rare and other valuable works, in order to preserve the print from injury, isinglass will be supplied for the purpose of tracing.

5. No compasses of any kind may be applied to any of the works, and the use of ink is prohibited at any table on which rare or costly works are placed.

6. Readers are requested to inform the officer in charge when they have finished with any work, in order that it may be restored to its place.

7. Silence is necessary in the Library, and all oral communications should be conducted in an undertone.

THE LOAN LIBRARY.

8. The Loan Library is open for the issue and return of books during the same hours as those appointed for the Reference Library.

9. Not more than one volume at a time is issued to any one borrower, except by permission of the Librarian, and no volume may be retained longer than fourteen days, unless a written renewal from the Librarian has been obtained [see No. 12].

10. Application for works must be made personally, except in the case of members of the Institute, who may send a written request by a person authorised to receive and sign for them, or

may apply in writing to the Librarian for the volume to be sent by post or rail.

11. A borrower is required to sign a voucher for each book he takes out, and is responsible for the work so long as the voucher remains uncanceled. A book will not be accepted as returned unless it be delivered by hand to the officer in charge at the Library during Library hours, and the borrower's receipt obtained in exchange. In the case, however, of a member of the Institute borrowing through the post, his letter of request shall be countersigned by the Librarian on the day when the volume is despatched, and shall be regarded as the member's voucher. Volumes shall be despatched at the cost of the Institute and returned at the cost of borrowers. On the return of a book the Librarian shall at once send the member a receipt. Books due for return on days when the Library is closed must be returned on the first following day when it is open.

12. Application for renewal must be made personally or by postcard in sufficient time to allow of the book being punctually returned if it cannot be renewed; if renewed or otherwise, a notice from the Librarian will be sent.

13. A fine of sixpence must be paid for every day or portion of a day during which any volume is retained beyond the time allowed, unless the borrower can show a written renewal from the Librarian. And a fine of one shilling must be paid for every day or portion of a day during which any volume is retained after delivery at the borrower's address of a notice from the Librarian for its return (the day of delivery of such notice not included).

14. Borrowers are not to trace with ink or with a hard pencil, nor apply compasses of any kind to the works. Marking any book by writing, turning down leaves, &c., is strictly prohibited: this applies even to correction of a misprint, or to a single additional mark in a book, however much previously disfigured. Infringement of this rule will render the borrower liable to suspension from the use of the Loan Library. A borrower is liable to be called upon to replace at his own expense any work lost, marked, or injured while in his possession, or to pay a fine.

15. A borrower whose fines are unpaid will not be permitted to use the Loan Library; and if not a member of the Institute, he will also be debarred the use of the Reference Library.

THE LOAN LIBRARY CATALOGUE.

A Catalogue of works in the Loan Library up to November 1896, with Supplements comprising additions down to December 1904, may be obtained at the office of the Institute, price Sixpence.

PRIZES AND STUDENTSHIPS 1907-1903.

FULL particulars of the subjects set for the Prizes and Studentships 1907-1908, with Conditions of Competition and Award, will be found in the pamphlet issued to members last March. Copies of the pamphlet may be obtained at the Institute, price 3d., by post 3½d. The following is a list of the Prizes, with subjects set for the current year, and complete Registers of Prize-winners.

THE ROYAL INSTITUTE SILVER MEDALS.

THE ESSAY MEDAL AND TWENTY-FIVE GUINEAS, open to British subjects under the age of 40 years, will be awarded for the best Essay on THE FUNCTION OF COLOUR IN STREET ARCHITECTURE.

THE HENRY SAXON SNELL PRIZE (A SUM OF SIXTY POUNDS), open to any member of the Architectural Profession (who may associate with him any member of the Medical Profession).—This prize, which was founded to encourage the study of the improved design and construction of Hospitals, of Convalescent Homes, and of Asylums for the Aged and Infirm Poor, will be awarded for the best DESIGN FOR A GENERAL HOSPITAL SUITABLE FOR A ROYAL TOWN, for about 200 beds.

The prize, after the first year, will be awarded triennially, the selection of the prizeman being based (1) on a design of a practical character dealing with a set subject, or (2) on a critical report on contemporary practice in the subject set for the year, with illustrations from existing buildings and original designs. The prize must be devoted to study of the special subject in England or abroad, according to the direction of the Council.

PRIZE FOR DESIGN AND CONSTRUCTION.

THE GRISSELL PRIZE (A GOLD MEDAL AND TEN GUINEAS) open to British subjects who have not been in professional practice longer than ten years, will be awarded for the best DESIGN FOR AN ELEVATED WATER TANK IN REINFORCED CONCRETE.

A NEW SYSTEM OF PRACTICAL PERSPECTIVE FOR ARTISTS AND ARCHITECTS. With 17 Plates. By Cav. SETTIMIO GIAMPIETRI (Rome). Price 2s. 6d.

THE LEGAL POSITION OF ARCHITECTS IN RELATION TO CERTIFICATES AND AWARDS. By J. A. STRAHAN, M.A., LL.B., Barrister-at-Law. Price 1s.

THE TRANSACTIONS, NEW SERIES (1885-1892).

This Series of the TRANSACTIONS, complete in eight volumes, comprises all the Papers read before the Institute during the Sessions from 1884-85 to 1891-92. Abstracts of Presidential Addresses, the Institute Prize Essays, Travelling Students' Reports, and other Papers, with Notes and Addenda. For a limited period the charge for a complete set bound in paper or linen

covers will be £1. only, instead of 3s. 6d. cloth bound leather backs, 30s. extra. Reduced prices of single volumes are quoted on page 6.

Complete sets of the *Original Series* of the *TRANSACTIONS* are out of print but several odd volumes are for disposal at prices varying from 5s. to 21s. according to the rarity of the volume. Copies of the 1842 volume, containing Professor Willis's valuable treatise on the Construction of the Vauxs & the Middle Ages, may be had for 7s. 6d. a copy.

FORM OF AGREEMENT AND SCHEDULE OF CONDITIONS FOR BUILDING CONTRACTS.*

[COPYRIGHT.]

Issued under the sanction of the Royal Institute of British Architects agreement with the Institute of Builders and the National Federation of Building Trade Employers of Great Britain and Ireland.

NOTE.—The following form is applicable WHERE QUANTITIES DO NOT FORM PART OF THE CONTRACT, and requires to be varied and to have the blanks filled in to meet the special circumstances of each contract.

[There is another Form for use where Quantities form part of the Contract. Except for the addition 12A, this document is practically identical with the below, the variations being only such as are necessary to make the Agreement and Contract clauses apply where Quantities are to form part of the Contract.*]

Articles of Agreement made the day of
190 BETWEEN of in the
County of (hereinafter called "the Employer") of
the one part and of and
of in the County of Builder †
(hereinafter called "the Contractor") of the other part.
WHEREAS the Employer is desirous of at
and has caused Drawings and a Specification
describing the work to be done to be prepared by
of his Architect: AND WHEREAS the said Draw-
ings numbered 1 to inclusive and the Specification
marked "A" have been signed by or on behalf of the parties
hereto: AND WHEREAS the Contractor has agreed to execute
upon and subject to the Conditions set forth in the Schedule
hereto (hereinafter referred to as "the said Conditions") the
works shown upon the said Drawings and described in the
said Specification for the sum of £ : Now IT IS HEREBY
AGREED AS FOLLOWS:—

* To be obtained at the office of the Institute, 9, Conduit Street, W.; at the Institute of Builders, 31, Bedford Street, Strand, W.C.; and at the National Federation of Building Trade Employers, 6, Lord Street, Liverpool. Price One Shilling.

† Insert "s and co-partners" if such is the fact.

‡ State nature of intended works.

1. In consideration of the sum of _____ at the
ies and in the manner set forth in the said Conditions, the
Contractor will upon and subject to the said Conditions execute
complete the works shown upon the said Drawings and
described in the said Specification.

2. The Employer will pay the Contractor the said sum of
£ _____ or such other sum as shall become payable hereunder
at the times and in the manner specified in the said Conditions.

3. The term "the Architect" in the said Conditions shall
mean the said _____ or, in the event of his death or
ceasing to be the Architect for the purpose of this Contract, such
other person as shall be nominated for that purpose by the
Employer, not being a person to whom the Contractor shall
it for reasons considered to be sufficient by the Arbitrator
joined in the said Conditions. Provided always that no
person subsequently appointed to be Architect under this Con-
tract shall be entitled to disregard or overrule any decision or
approval or direction given or expressed by the Architect for the
time being.

4. Any reference in the said Conditions to the Bills of Quan-
tities shall not have the effect of constituting them part of this
Contract.

5. The said Conditions shall be read and construed as forming
part of this Agreement, and the parties hereto will respectively
by and submit themselves to the conditions and stipulations
perform the agreements on their parts respectively in such
manner as may be required.

As witness our hands this _____ day of _____ 190 _____

*Signed by the said
in the presence of*

SCHEDULE OF CONDITIONS OF CONTRACT.

1. The works shall be carried out in accordance with the
directions and to the reasonable satisfaction of the Architect, in
accordance with the signed Drawings and Specification, and in
accordance with such further drawings, details, instructions,
directions, and explanations as may from time to time be given by
the Architect. If the work shown on any such further drawings
or details, or necessary to comply with any such instructions,
directions, or explanations be, in the opinion of the Contractor,
extra to that comprised in the Contract, he shall, before pro-
ceeding with such work, give notice in writing to this effect
to the Architect. In the event of the Architect and Contractor
agreeing to agree as to whether or not there is any extra, and of
the Architect deciding that the Contractor is to carry out the
said work, the Contractor shall accordingly do so, and the ques-
tion whether or not there is any extra, and if so the amount
thereof, shall, failing agreement, be settled by the Arbitrator as
provided in Clause 32, and the Contractor shall be paid accord-
ingly. The Contract Drawings and Specification shall remain
in the custody of the Architect, and shall be produced by him at

contractor.

2.—One complete copy of all Drawings and of the Specification shall be furnished by the Architect free of cost to the Contractor for his own use. The Architect shall furnish to the Contractor within 14 days after the receipt by him of a request to name any details which in the opinion of the Architect necessary for the execution of any part of the work, such as to be made only within a reasonable time before it is to execute such work in order to fulfil the Contract. All and details shall be kept on the works until the end thereof, and the Architect or his representative shall have reasonable times have access to the same, and they shall be returned to the Architect by the Contractor on the completion of the Contract.

3.—The Contractor shall on the signing hereof furnish the Architect with a verified* copy of the original or for his sole use or that of the Surveyor appointed as in and by hereof, and for the purposes only of this Agreement.

4.—The Contractor shall provide everything necessary for the proper execution of the works, according to the true meaning of the Drawings and Specification, taken together, whether the same may or may not be particularly described in the Drawings or described in the Specification, provided that same is reasonably to be inferred therefrom. In case the Contractor find any discrepancy in the Drawings or between the Drawings and Specification, he shall immediately refer the same to the Architect, who shall decide which shall be followed. Figure dimensions are to be followed in preference to the scale.

5.—The Contractor shall conform to the provisions of any Act of Parliament relating to the works, and to the regulations, or by-laws of any Local Authority, and of any Water and Light Companies with whose systems the structure is proposed to be connected, and shall, before making any variation from the Drawings or Specification that may be necessitated by so doing, give to the Architect written notice, specifying the variation proposed to be made, and the reason for making it, and apply for instructions thereon. In case the Contractor shall in the due course receive such instructions he shall proceed with the work, conforming to the provision, regulation, or by-law in question, and any variation so necessitated shall be decided under Clause 13. The Contractor shall give all notices required by the said Acts, regulations, or by-laws to be given to any Local Authority, and pay all fees payable to any such Authority, or to any public officer in respect of the works.

6.—The Contractor shall set out the works, and during the progress of the building shall amend at his own cost any errors arising from inaccurate setting out, unless the Architect shall decide to the contrary.

* The word "sealed" to be inserted if so agreed.

as specified in the Specification; and the Contractor shall request of the Architect for such him with view to be materials are such as are specified.

Contractor shall keep constantly on the works a general foreman, and any directions or explanations of the Architect to such foreman shall be held to have been

the Contractor shall, on the request of the Architect, immediately dismiss from the works any person employed thereon who may, in the opinion of the Architect, be incompetent or misconduct himself, and such person shall not be employed on the works without the permission of the

Architect and any person authorised by him shall at all times have access to the works, and the Architect or his representative shall at like times have access to the premises of the Contractor or other places where work is being executed for the building.

11. The Clerk of Works shall be considered to act solely as agent and under the Architect, and the Contractor shall afford him every facility for examining the works and materials.

The Contractor shall, when authorised by the Architect, provided by Clause 5, vary by way of extra or omission in Drawings or Specification; such authorisation is to be signified by any writing or drawing signed by the Architect or by any subsequent written approval by him, but the Contractor shall make no variation without such authorisation. No claim for an extra shall be allowed unless it shall be executed under the provisions of Clause 5, or by the Architect as herein mentioned. Any such extra shall be referred to as a variation.

No variation shall vitiate the Contract, but all authorisations for which a price may not have been previously set, and any omission which may have been made with the sanction of the Architect, or without his knowledge, provided promptly give a written sanction to such omission, shall be measured and valued, as hereinafter provided, by

and a copy of the bill or statement of such measurement and valuation shall be given to the Contractor. The fees for so measuring and valuing the variations shall be added to the contract sum. If in the opinion of the Architect the work cannot be properly measured and valued, day-work prices shall be allowed therefor, provided that vouchers specifying the time

* In the form for use where Quantities form part of the Contract, the following additional clause is inserted:—

12a. Should any error appear in the Bills of Quantities other than in the Contractor's prices and valuations, it shall be rectified, and such rectification shall constitute a variation of the Contract, and shall be dealt with as hereinafter provided.

† Insert "the Architect," or the name of a Surveyor.

and materials as per special award reduced in proportion to the Architect, or his nominee, at or before the expiration of the week following that in which such work shall have been done. The variations shall be valued at the rates contained in the Contractor's original estimate, or, where the same may not apply, at rates proportionate to the prices therein contained. The amount to be allowed on either side in respect of the variations so ascertained shall be added to or deducted from the contract sum as the case may be.

14.*—The fees for the Bills of Quantities and the Surveyor's expenses (if any) stated therein shall be paid by the Contractor to the Surveyor named therein out of and immediately after receiving the amount of the certificate or certificates in which they shall be included. The fees chargeable under Clause 14 shall be paid by the Contractor before the issue by the Architect of the certificate for the final payment. If the Contractor neglects to pay as herein provided, then the Employer shall be at liberty, and is hereby authorised, to do so on the certificate of the Architect, and the amount so paid by the Employer shall be deducted from the amount otherwise due to the Contractor.

15.—When the Contractor shall have received payment of a certificate in which the Architect shall have stated that he has taken into account the value of any unfixed materials put in for the works, and placed by the Contractor thereon, or on the ground adjacent thereto, all such materials shall become the property of the Employer, and shall not be taken away, except for the purpose of being used on the building, without the written authority of the Architect; and the Contractor shall be liable for any loss of or damage to such materials.

16.—The Architect shall, during the progress of the works, have power to order in writing from time to time the removal from the works, within such reasonable time or times as may be specified in the order, of any materials which in the opinion of the Architect are not in accordance with the Specification or the instructions of the Architect, the substitution of proper materials, and the removal and proper re-execution of any work executed with materials or workmanship not in accordance with the Drawings and Specification or instructions; and the Contractor shall forthwith carry out such order at his own cost. In case of default on the part of the Contractor to carry out such order the Employer shall have power to employ and pay other persons to carry out the same; and all expenses consequent thereon or incidental thereto shall be borne by the Contractor, and shall be recoverable from him by the Employer, or may be deducted by the Employer from any moneys due or that may become due to the Contractor.

17.—Any defects, shrinkage, or other faults which may appear within months from the completion of the works, arising

* In cases where the Surveyor is engaged by the Employer to be paid direct by him this clause will come out.

the opinion of the Architect, or any damage to pointing by frost arising within the like period, shall, upon the directions in writing of the Architect, and within such reasonable time as shall be specified therein, be amended and made good by the Contractor at his own cost, unless the Architect shall decide that it ought to be paid for the same; and in case of default the Employer may employ and pay other persons to amend and make good such defects, shrinkage, or other faults or damage, and all expenses consequent thereon or incidental thereto shall be borne by the Contractor and shall be recoverable from him by the Employer or may be deducted by the Employer from any moneys that may become due to the Contractor. Should any new work have been done or material supplied by any sub-contractor employed on the works who has been nominated or approved by the Architect, as provided in Clause 20, the Contractor shall be liable to make good in the same manner as if such work or material had been done or supplied by the Contractor, and shall be subject to the provisions of this and the preceding clause.

18.—The Contractor shall, at the request of the Architect, within such time as the Architect shall name, open for inspection any work covered up; and should the Contractor refuse or neglect to comply with such request, the Architect may employ his workmen to open up the same. If the said work has been covered up in contravention of the Architect's instructions, or if, being opened up it be found not in accordance with the Drawings and Specification or the instructions of the Architect, the expenses of opening and covering it up again, whether done by the Contractor or by other workmen, shall be borne by, and recoverable from, the Contractor, or may be deducted as aforesaid if the work has not been covered up in contravention of the Architect's instructions, and be found in accordance with the said Drawings and Specification or instructions; then the expenses shall be borne by the Employer and be added to the contract sum: provided always that in the case of foundations, or of any other urgent work so opened up and requiring immediate attention, the Architect shall, within a reasonable time or receipt of notice from the Contractor that the work has been so opened, make or cause the inspection thereof to be made, and at the expiration of such time, if such inspection shall not have been made, the Contractor may cover up the same, and shall not be required to open it up again for inspection except at the expense of the Employer.

19.—The Contractor shall not, without the written consent of the Architect, assign this Agreement or sublet any portion of the works.

20.—All specialists, merchants, tradesmen, or others executing any work, or supplying any goods for which prime cost prices or provisional sums are included in the Specification, who may at any time be nominated, selected or approved by the Architect are hereby declared to be sub-contractors employed

by the Contractor, but no such contract shall be entered into upon the works, against whom the Contractor shall make the Architect considers reasonable objection, or who enters into a contract with the Contractor upon terms and conditions consistent with those in this Contract, and for the due performance and maintenance of the work and execution by such sub-contractor, and indemnifying the Contractor against any claims arising out of the misuse by such contractor or his workmen of any scaffold erected or employed by the Contractor, or that may be made against the Contractor in consequence of any act, omission, or default of such sub-contractor, his servants, or agents, and against any under the Workmen's Compensation Act 1897, or any amendment thereof.

21.—The Contractor shall be responsible for all decorative damage to property, and for injury to works or workmen to persons, animals, or things, and also the Employer's business in respect thereof, and also of any claim made under the Workmen's Compensation 1897, or any amendment thereof, by any person by the Contractor. He shall also be responsible for all injury to the buildings, the subject of this Contract, by fire, inclemency of weather, and shall reimburse all damage by the same, and thoroughly complete the whole of it.

22.—(a) The Contractor shall insure the works, and insured until they are delivered up, against loss or damage by fire, in an office to be approved by the Architect, in the names of the Employer and Contractor, for the full value of the works executed, and shall deposit with the Architect the and receipts for the premiums paid for such insurance. In default the Employer may insure the works and the premium paid from any moneys due or which may be due. All moneys received under any such policy are to be paid to the Contractor by instalments on the certificates of the Architect to be applied in or towards the rebuilding or repairing of the works destroyed or injured. The Contractor shall, as soon as a claim under the policy is settled, proceed with all due diligence with the rebuilding or repair, and shall not be entitled to any payment in respect thereof other than the sum received, but such extension of the time hereinafter mentioned for completion shall be made as shall be just and reasonable.

(b) The whole building and the works executed under this Contract shall be at the sole risk of the Employer as regards loss or damage by fire, and in the event of any such loss or damage being so occasioned which affects the original building or structure in addition to the new work, the Contractor shall be entitled to receive from the Employer the full value of all work

* In this clause division (a) applies to a new building and division (b) to an existing building to be altered; (a) or (b) should be struck out in the circumstances.

...and no work shall be done in the
provided for by Clause 1. Hereon, and this Contract, as
lates to any subsequent work, may at the option of
be determined if in the opinion of the Arbitrator
mination shall be just and equitable.

Possession of the site (or premises) shall be given to the
or on or before the day of . He

via the works immediately after such possession, shall
related with them, and shall complete the same (except
ad papering or other decorative work which in the
the Architect it may be desirable to delay) by the
of . subject nevertheless to the pro-
extension of time hereinafter contained.

Contractor fail to complete the works by the date
23, or within any extended time allowed by the
here provided, and the Architect shall verify in
works could reasonably have been completed by
within the said extended time, the Contractor
to the Employer the sum of £ . starting
as liquidated and ascertained damages for every
beyond the said date or extended time, as the case
ing which the works shall remain unfinished, except
ed by Clause 23, and such damages may be deducted by
ny moneys due to the Contractor.

opinion of the Architect the works be delayed
on by reason of any exceptionally inclement
tem of instructions from the Architect in con-
sequence taken or threatened by or disputes with
allowing owners, or by the works or delay of
of persons engaged or nominated by the
Architect, and not referred to in the Specifica-
tion, or by reason of any strike or lock-out in con-
nection with the works, or by reason of any local
strike or lock-out affecting any of the Building
materials, or by reason of the Contractor not having received
necessary instructions from the Architect for which
specifically applied in writing, the Architect shall
in reasonable extension of time for completion in
work. In case of such strike or lock-out the Contractor

not as may be, give to the Architect written notice
But the Contractor shall nevertheless use his best
to prevent delay, and shall do all that may be re-
quired to the satisfaction of the Architect to proceed
work.

The Contractor, except on account of any legal restraint
employer preventing the continuance of the works, or
of any of the causes mentioned in Clause 25, or in
attitude being withheld or not paid when due shall

suspend the work, or in the opinion of the Architect neglect or fail to proceed with due diligence in the performance of his part of the Contract, or if he shall more than once in default in the respects mentioned in Clause 16, the Employer or the Architect shall have power to give notice in writing to the Contractor requiring that the works be proceeded with in a reasonable manner and with reasonable dispatch. Such notice shall not be unreasonably or vexatiously given, and must signify that it purports to be a notice under the provisions of this clause, and must specify the act or default on the part of the Contractor upon which it is based. After such notice shall have been given the Contractor shall not be at liberty to remove from the site or works, or from any ground contiguous thereto, any plant or materials belonging to him which shall have been placed thereon for the purposes of the works; and the Employer shall have a lien upon all such plant and materials, to subsist from the date of such notice being given until the notice shall have been complied with. Provided always that such lien shall not under circumstances subsist after the expiration of thirty-one days from the date of such notice being given unless the Employer shall have entered upon and taken possession of the work site as hereinafter provided. If the Contractor shall

days after such notice has been given to proceed with the works as therein prescribed, the Employer may enter upon and take possession of the works and site, and of all such plant and materials thereon (or on any ground contiguous thereto) intended to be used for the works, and all such materials as above mentioned shall thereupon become the property of the Employer absolutely, and the Employer shall retain and hold a lien upon all such plant until the works shall have been completed under the powers hereinafter conferred upon him. If the Employer shall exercise the above power he may engage any other persons and servants, from entry upon or access to the same, except that the Contractor or any one person nominated by him may have access at all reasonable times to inspect, survey, and measure the works. And the Employer shall take such steps as in the opinion of the Architect may be reasonably necessary for completing the works without undue delay or expense, using for the purpose the plant and materials above mentioned in so far as they are suitable and adapted to such use. Upon the completion of the works the Architect shall certify the amount of the expenses properly incurred consequent on and incidental to the default of the Contractor as aforesaid, and in completing the works by other persons. Should the amount so certified as the expenses properly incurred be less than the amount which would have been due to the Contractor upon the completion of the works by him, the difference shall be paid to the Contractor by the Employer; should the amount of the former exceed the latter, the difference shall be paid by the Contractor to the Employer. The Employer shall not be liable to make any further payment or compensation

Contractor for or on account of the proper use of the
ant for the completion of the works under the provisions herein-
before contained other than such payment as is included in the
contract price. After the works shall have been so completed by
persons other than the Contractor under the provisions herein-
before contained, the Employer shall give notice to the Con-
tractor of such completion and may require him from time to
time, before and after such completion, to remove his plant and
all such materials as aforesaid as may not have been used in the
completion of the works from the site. If such plant and materials
are not removed within a reasonable time after notice shall have
been given, the Employer may remove and sell the same, holding
the proceeds, less the cost of the removal and sale, to the credit
of the Contractor. Any notice to be given to the Contractor
under this clause shall be given by leaving the same at the place
of business of the Contractor, or by registered letter sent to him
at that address.

27.—The words "Prime Cost" or the initials P.C. applied in
the Specification to goods to be obtained and fixed by the Con-
tractor, shall mean, unless otherwise stated in the Specification,
the sum paid to the merchant after deducting all trade discount
for such goods in the ordinary course of delivery, but not deduct-
ing discount for cash, and such sum shall be exclusive of special
carriage, the cost of fixing, and Contractor's profit.

28.—The provisional sums mentioned in the Specification for
materials to be supplied or for work to be performed by special
artists or tradesmen, or for other works or fittings to the build-
ing, shall be paid and expended at such times and in such amounts
and to and in favour of such persons as the Architect shall direct,
and sums so expended shall be payable by the Contractor without
discount or deduction, or (without prejudice to any rights of the
Contractor existing under the Contract referred to in Clause
No. 20) by the Employer to the said artists or tradesmen. The
value of works which are executed by the Contractor in respect
of provisional sums, or in additional works, shall be ascertained
as provided by Clause 13. At the settlement of the accounts the
amount paid by the Contractor to the said artists or tradesmen,
and the said value of such works, executed by the Contractor,
shall be set against all such provisional sums or any sum pro-
vided for additional works, and the balance, after allowing *pro*
rata for the Contractor's profits at the rates contained in the
Contractor's original estimate, shall be added to or deducted
from the contract sum, provided that in estimating the amounts
paid as last herein provided no deductions shall be made by or
on behalf of the Employer in respect of any damages paid by
the sub-contractor to the Contractor, the intention being that
the Contractor and not the Employer shall have the benefit of
any such damages.

29.—The Contractor shall permit the execution of work by any
other artists or tradesmen who may be engaged by the Employer.

30.—The Contractor shall be entitled under the certificates to

days of the 1st. Each certificate, to payment by a sum from time to time by instalments, when in the opinion of the Architect, work to the value of (or less at reasonable discretion of the Architect) has been executed according with the Contract, at the rate of per cent the value of work so executed in the building, until the balance retained in hand amounts to the sum of after which time the instalments shall be up to the full value of the subsequently executed. The Contractor shall be entitled the Certificate to be issued by the Architect, to receive of being a part of the said sum of works are practically completed, and in like manner of the balance within a further period of in soon after the expiration of such period of in work shall have been finally completed, and all good according to the true intent and meaning hereof shall last happen. The Architect shall issue his certificate in accordance with this clause. No certificate of the Architect be considered conclusive evidence as to the sufficiency of work or materials to which it relates, nor shall it release the Contractor from his liability to make good all defects as by this Agreement. The Contractor when applying for a certificate shall, if required, as far as practicable, furnish the Architect an approximate statement of the work executed, on the original estimate.

81.—Should the Employer not pay the Contractor any sum certified by the Architect within the times respectively named in Clause 80, the Contractor shall give written notice to the Employer of the non-payment, and should the Employer not pay any such sum within the period of days from the date of delivery of such notice at the Employer's address or sent to there in the ordinary course of post by registered letter, or if the Employer shall become bankrupt or file any petition for liquidation of his affairs, and if his Trustee in Bankruptcy shall repudiate this Contract, or if the Trustee shall be unable to show within days to the reasonable satisfaction of the Contractor his ability to carry out the Contract, and to make all payments due or to become due thereunder, or if the work be stopped for more than three months under an order of the Architect or any Court, the Contractor shall be at liberty to determine the Contract, and to recover from the Employer payment for all work executed and for any loss sustained upon any plant or material supplied or purchased or prepared for the purpose of the Contract. In arriving at the amount of such payment the rates contained in the Contractor's original estimate shall be followed, or, where the same may not apply, rates proportionate to the prices therein contained.

82.—Provided always that in case any dispute or difference shall arise between the Employer or the Architect on his behalf and the Contractor, either during the progress of the works or

the construction of the (on) as to any matter or thing thereunder (except as to matters left to the sole decision of the Architect under Clauses 12, 16, and 19, and the by him under Clause 18 of the right to have any work up), or as to the withholding by the Architect of any to which the Contractor may claim to be entitled, then the party shall forthwith give to the other notice of such dispute or difference, and such dispute or difference shall be and is referred to the arbitration and final decision of or, in the event of his death or unwillingness or inability or, in the event of his death or incapacity or inability to act, of a person to be appointed on the if either party by the President for the time being of a Royal Institute of British Architects, and the award of such award shall be final and binding on the parties. Such award, except on the question of notices, shall not be opened after the completion or alleged completion of the works, with the written consent of the Employer or Architect or the Contractor. The Arbitrator shall have power to open, review, and revise any certificate, opinion, decision, requisition, or notice, save in regard to the said matters expressly specified above, and to determine all matters in dispute which shall be submitted to him, and of which notice shall have been given as aforesaid, in the same manner as if no such certificate, decision, requisition, or notice had been given. Upon or after such reference the costs of and incidental to the proceedings and award respectively shall be in the discretion of the arbitrator who may determine the amount thereof, or direct the same to be paid as between solicitor and client or as between party and party, and shall direct by whom and to whom and in manner the same shall be paid. This submission shall be deemed to be a submission to arbitration within the meaning of the Arbitration Act 1889.

OTHER FORMS, &c., FOR USE UNDER PART VIII OF THE LONDON BUILDING ACT 1894.

[continued.]

The following Forms, A, B, C, D, E, prepared by the Standing Committee, and approved by the Council of the Institute, are for use under Part VIII. ("Rights of the Owner") of the London Building Act 1894. They are the copyright of the Institute, and copies obtained, printed on hand-made foolscap paper, at a price Threepence each.

To be obtained at the office of the Institute, price Threepence each.

FORM A.

PARTY STRUCTURES.

The London Building Act 1894.

57 & 58 VICTORIA, c. cccxiii., Part VIII., Sections 88 to 92 inclusive.

To _____ of _____
 As Building Owner of the Premises known as _____
 and with reference to the Party _____
 separating the said Premises from the adjoining Premises on
 the _____ side thereof known as _____
 hereby give you notice that after the expiration of _____
 month from the date of service hereof
 intend to exercise the rights given to _____ by the London
 Building Act 1894, Section _____ Subsection _____
 by executing the works undermentioned, viz. :—

and _____ propose to commence the work on or about _____
 hereby appoint _____

Mr. _____ of _____
 to act as _____ Surveyor.

(Signature)

Building Owner.

(Address)

Dated this _____

day of _____

190 _____

If the adjoining Owner do not within 14 days after the service of this notice express his
 consent thereto, he will be considered to have dissented therefrom (see Section 90, and in
 such case the Act requires him to appoint a Surveyor—Section 91 (1).

DEFINITIONS (Section 5 of Act).

16. The expression "party wall" means—

- (a) A wall forming part of a building and used or constructed to be
 used for separation of adjoining buildings belonging to dif-
 ferent owners or occupied or constructed or adapted to
 occupied by different persons; or
- (b) A wall forming part of a building and standing to a greater
 extent than the projection of the footings on lands of different
 owners.

18. The expression "party fence wall" means a wall used or constru-
 to be used as a separation of adjoining lands of different owners, and stand-
 ing on lands of different owners, and not being part of a building; but does
 not include a wall constructed on the land of one owner the footings of
 which project into the land of another owner.

19. The expression "party arch" means an arch separating adjoining
 buildings storeys or rooms belonging to different owners or occupied or con-
 structed or adapted to be occupied by different persons or separating a
 building from a public way or a private way leading to premises in other
 occupation.

20. The expression "party structure" means a party wall and also a par-
 titition floor or other structure separating vertically or horizontally buildings.

rooms approached by distinct staircases or separate entrances from

11. The expression "building owner" means such one of the owners of adjoining land as is desirous of building, or such one of the owners of wings, storeys, or rooms separated from one another by a party wall or structure, as does, or is desirous of doing, a work affecting that party or party structure.

12. The expression "adjoining owner" means the owner or one of the owners, and "adjoining occupier" means the occupier or one of the occupiers of land, buildings, storeys, or rooms adjoining those of the building owner.

NOTES.

This, as the primary notice, must be given in the case of party structures, not two months, and in the case of party fence walls at least one month, before the commencement of the work, and may be served by delivering a copy thereof at, or by sending a copy thereof by post in a registered letter to the usual or last known residence in the United Kingdom of the person to whom it is addressed, or by delivering the same to some person on the premises to which it relates, or, if no person be found on the premises, then by affixing a copy thereof on some conspicuous part of the building to which it relates, and in the case of a railway company, by delivering a copy thereof to the secretary at the principal office of the said company.

Any notice by this Act required to be given to or served on the owner or occupier of any premises may be addressed by the description of the owner or "occupier" of the premises (naming the premises) in respect of which the notice is given or served without further name or description.

It is desirable to add a sketch or drawing to scale to assist the description of the situation, &c.

The proposed work may be particularised in some of the following terms (section 86):—

1. To make good, underpin, and repair the party structure if defective or requiring repair.

2. To pull down and rebuild the party structure if so far defective or out of repair as to make such operation necessary or desirable.

3. To pull down the timber or other partition, and to build instead thereof a party wall.

4. To pull down the internal room or storeys, or part thereof, and to build the same in conformity with this Act.

5. To pull down the arch or communication over the public way, or over a passage.

6. To rebuild the same in conformity with this Act.

7. To raise and underpin the party structure.

8. To underpin the external wall built against the party structure.

9. To pull down the party structure which is of insufficient strength for building intended to be built, and to rebuild the same of sufficient strength for such purpose.

10. To cut into the party structure for the purpose of

11. To cut away the footings or chimney breasts, jambs, and flues, or projecting from the party structure.

12. To cut away or take down such parts of the wall or building as may be necessary in consequence of such wall or building overhanging the ground of the building owner, in order to erect an upright wall against the same.

13. To perform any other necessary works incident to the connection of party structure with the premises adjoining thereto. But the rights in relation to the above works shall be subject to this qualification, that any building which has been erected previously to the date of the commencement of the Act shall be deemed to be conformable with the provisions of the Act if it be conformable with the provisions of the Acts of Parliament regulating buildings in London before the commencement of the Act.

12. To raise, or to pull or to the party fence wall, and to build the same as wall.

And to perform any other necessary works incident to any of the mentioned works.

Should the Building Owner propose to erect or to erect with the party wall any building within 10 feet of and at a greater depth than the foundations of the building of the adjoining Owner, then an additional notice to the adjoining Owner shall be given (see Form B).

FORM A

INTENTION TO BUILD WITHIN TEN FEET AT A LOWER LEVEL THAN ADJOINING BUILDING

The London Building Act 1894.

57 & 58 Victoria, c. 56, s. 114, Part VII, Section 114.

10

of

As Building Owner, of the Premises known as
hereby give you notice that after the expiration of
months from the date of the service hereof, in
within ten feet of the building belonging to you on the
side of own premises, and situate

a building or structure some part of which within the
feet and as shown on the plans and sections annexed I
extend to a lower level than the foundations of your
and to exercise the rights given to by the London
Act 1894, by executing the works undermentioned, viz.:

and propose to commence the work on or about

hereby appoint

Mr. of
to act as Surveyor.

(Signature)

Building On

(Address)

Dated this day of

If the adjoining Owner shall within fourteen days after being served with this notice give a counter notice in writing that he desires the authority of the Act to be exercised in relation to the proposed work, a difference shall be deemed to have arisen. Section 114 (2) in such case the Act requires him to appoint a Surveyor. Section 114 (3).

DEFINITIONS (Section 5 of Act).

31. The expression "building owner" means each one of the owners adjoining land as is desirous of building or such one of the town buildings, storeys, or rooms separated from one another by a party structure, as does, or is desirous of doing, a work affecting the wall or party structure.

adjoining or near the buildings, streets, or common highways, those of the said

NOTES.

is primary notice, must be given at least two months before the
start of the work, and may be served by delivering a copy thereof
and a copy thereof by post in a registered letter to the
town residence in the United Kingdom at the period to whom it is
served, or by delivering the same to some person on the premises to
take it, or if no person be found on the premises, then by fixing a
copy thereof on some conspicuous part of the building to which it relates.
In the case of a railway company, by delivering a copy thereof to the
manager of the principal office of the said company.
The notice of this Act required to be given or served on the owner
of any premises may be addressed by the description of
owner of the premises (or of the premises containing the premises) in res-

pect to be given or served without further name or description
and shall state whether the building owner proposes to underpin
entirely the foundations of the building belonging to

and to be underpinned, and the depth to which the foundations
of the proposed building, and the depth to which the founda-

tion is to be underpinned, when the building owner proposes to underpin or otherwise
foundations that he should meet with the underpinning
showing in detail such underpinning or strengthening.

FORM C.

WALLS WITH FOOTINGS PROJECTING FROM ADJOINING OWNERS' PREMISES.

The London Building Act 1894.

33 Victoria, Chapter VIII, Section 82 (5 and 6).

Building Owner. of the premises known as
hereby give you notice that after the expiration of one
month from the date of service hereof I intend to erect an
external wall on my own land adjoining your land situate and

lying on the side of the said external wall, and to
exercise the right given to me by the London Building Act
1894, by erecting a wall of the following description:

I, placing the projecting footings and foundations of said
external wall on your land.

I hereby appoint

as Surveyor.

(Signature)

Building Owner.

(Address)

Dated this

day of

190

1. The expression "building owner" means such one of the owners adjoining land as is desirous of building, or such one of the owners of buildings, storeys, or rooms separated from one another by a party wall or part structure, as does, or is desirous of doing, a work affecting that party wall or party structure.

32. The expression "adjoining owner" means the owner or one of the owners, and "adjoining occupier" means the occupier or one of the occupiers of land adjacent to that of the building owner.

NOTES:

This, as the primary notice, must be given at least one month before the commencement of the work, and may be served by delivering a copy thereof at, or by sending a copy thereof by post in a registered letter to, the usual last known residence in the United Kingdom of the person to whom it is addressed, or by delivering the same to some person on the premises to which it relates, or, if no person be found on the premises, then by fixing a copy thereof on some conspicuous part of the building to which it relates, and in the case of a railway company, by delivering a copy thereof to the Secretary at the principal office of the said company.

Any notice by this Act required to be given to or served on the owner or occupier of any premises may be addressed by the description of the "owner" or "occupier" of the premises (naming the premises) in respect of which the notice is given or served without further name or description.

It is desirable to add a sketch or drawing to scale to assist the description of the situation, &c.

Where the building owner proceeds to build an external wall on his land, he has a right, at his own expense, at any time after the expiration of one month from the service of the notice, to place on the land of the adjoining owner, below the level of the lowest floor, the projecting footings of external wall, with concrete or other solid substructure thereunder, making compensation to the adjoining owner or occupier for any damage occasioned thereby, the amount of such compensation, if any difference arise, to be determined in the manner in which differences between building owners and adjoining owners are directed by the Act to be determined. See Sections 87 (6) and 91 (1).

FORM D.

PARTY WALLS ON LINE OF JUNCTION OF ADJOINING LANDS.

The London Building Act 1894.

57 & 58 VICTORIA, c. cxxiii., Part VIII., Section 87 (1, 2, 3, and 4).

To

of

As Building Owner of the Premises known as
hereby give you notice that desire to build a party
wall partly on own land adjoining your vacant land situate
and being
and to the of own said land.

The said party wall is desired to be of the following description:—

shall be obliged by your consent and by your furnishing
with the name of your Surveyor.

of
I as Surveyor.

DEFINITIONS (SECTION 5 OF ACT).

16. The expression "party wall" means:—

* A wall forming part of a building and used or constructed to be used for separation of adjoining buildings belonging to different owners or occupied or constructed or adapted to be occupied by different persons; or

A wall forming part of a building and standing to a greater extent than the projection of the footings on lands of different owners.

The expression "building owner" means such one of the owners of any land as is desirous of building, or such one of the owners of keys, or rooms separated from one another by a party wall or he, he does, or is desirous of doing, a work affecting that party structure.

The expression "adjoining owner" means the owner or one of the owners, and "adjoining occupier" means the occupier or one of the occupiers of land, buildings, storeys, or rooms adjoining those of the building owner.

NOTES.

This, as the primary notice, must be given at least two months before the commencement of the work, and may be served by delivering a copy thereof to, or by sending a copy thereof by post in a registered letter to, the owner or last known residence in the United Kingdom of the person to whom it is addressed, or by delivering the same to some person on the premises to which it relates; or, if no person be found on the premises, then by fixing a copy thereof on some conspicuous part of the building to which it relates, in the case of a railway company, by delivering a copy thereof to the secretary at the principal office of the said railway company.

The notice by this Act required to be given to or served on the owner or any premises may be addressed by the description of the owner or "occupier" of the premises (naming the premises) in respect of which the notice is given or served without further name or description, and may be accompanied by a plan or drawing to scale showing the intended wall and its situation, and to accompany this notice, and the description should specify its thickness and thicknesses.

THE PROFESSIONAL PRACTICE AS TO THE C OF ARCHITECTS

*Schedule sanctioned by the Royal Institute of British Architects
at a General Conference of Architects of the United Kingdom
and revised by the Royal Institute, 1902.*

1. The usual remuneration for an architect is as hereinafter mentioned, to be a percentage of 5 per cent total cost of works estimated under the foregoing cost is to be valued as though executed by a builder or mason. This commission is for the necessary conference and sketches, approximate estimate with (such, for instance, as may be obtained by cubic contents), the necessary general and detailed drawings, specifications, one set of tracings, duplicate specification, superintendence of works, and examining and passing accounts, exclusive of measuring and making out of omissions.

2. This commission does not include the payment for rendered in connection with negotiations relating to premises, or in supplying drawings to ground or off or in surveying the site or premises and taking the surveys and plans of buildings to be altered, realments in respect of party-walls and rights of light, or for and correspondence with local and other authorities, services consequent on the failure of builders to carry out works, or for services in connection with litigation or in the measurement and valuation of extras and For such services additional charges proportionate to the involved and time spent are made. The clerk of the works should be appointed by the architect, his salary being paid by the client.

3. In all works of less cost than £1,000, and in works required designs for furniture and fittings of buildings, or for their decoration

is a sum not exceeding a whole year's rent. If the value of plots of great value a special arrangement must be made.

12. For approving plans submitted by the lessee, and inspecting the buildings during their progress, so far as may be necessary to ensure the conditions being fulfilled, and certifying for lease, the charge is a percentage not exceeding $1\frac{1}{2}$ per cent. up to £5,000, and above that by special arrangement.

18. For valuing freehold, copyhold, or leasehold property the charge is:—

| | | |
|-------------------|-----|---------------|
| On £1,000 | ... | 1 per cent. |
| Thence to £10,000 | ... | " |
| Above £10,000 | ... | " on residue. |

In valuations for mortgage, if an advance is not made, one-third of the above scale. The minimum fee is three guineas.

14. For valuing and negotiating the settlement of claims under the Lands Clauses Consolidation Act or other Acts for the compulsory acquisition of property, the charge is on Ryde's Scale follows:—

On Amount of Settlement, whether by Verdict, Award, or otherwise.

| Amount | Gs. | Amount | Gs. | Amount | Gs. | Amount | Gs. | Amount | Gs. | Amount | Gs. |
|--------|-----|--------|-----|--------|-----|--------|-----|--------|-----|--------|-----|
| £ | | £ | | £ | | £ | | £ | | £ | |
| 100 | 5 | 1,300 | 19 | 2,300 | 29 | 3,300 | 39 | 4,300 | 49 | 5,300 | 59 |
| 200 | 7 | 1,400 | 20 | 2,400 | 30 | 3,400 | 40 | 4,400 | 50 | 5,400 | 60 |
| 300 | 9 | 1,500 | 21 | 2,500 | 31 | 3,500 | 41 | 4,500 | 51 | 5,500 | 61 |
| 400 | 11 | 1,600 | 22 | 2,600 | 32 | 3,600 | 42 | 4,600 | 52 | 5,600 | 62 |
| 500 | 13 | 1,700 | 23 | 2,700 | 33 | 3,700 | 43 | 4,700 | 53 | 5,700 | 63 |
| 600 | 14 | 1,800 | 24 | 2,800 | 34 | 3,800 | 44 | 4,800 | 54 | 5,800 | 64 |
| 700 | 15 | 1,900 | 25 | 2,900 | 35 | 3,900 | 45 | 4,900 | 55 | 5,900 | 65 |
| 800 | 16 | 2,000 | 26 | 3,000 | 36 | 4,000 | 46 | 5,000 | 56 | 6,000 | 66 |
| 900 | 17 | 2,100 | 27 | 3,100 | 37 | 4,100 | 47 | 5,100 | 57 | 6,100 | 67 |
| 1,000 | 18 | 2,200 | 28 | 3,200 | 38 | 4,200 | 48 | 5,200 | 58 | 6,200 | 68 |

Beyond this Half-a-Guinea per cent.

The above scale is exclusive of attendances on juries or sittings or at arbitrations, and also of expenses and preparation of plans.

15. For estimating dilapidations and furnishing or checking schedule of same, the charge is 5 per cent. on the estimate, in no case less than two guineas. For services in connection with settlement of claim by arbitration or otherwise, extra charges are made, under Clause 8.

16. For inspecting, reporting, and advising on the sanitary condition of premises, the charge must depend on the nature and extent of the services rendered.

17. In all cases travelling and other out-of-pocket expenses are paid by the client in addition to the fees. If the work is at such a distance as to lead to an exceptional expenditure of time in travelling, an additional charge may be made under Clause 8.

18. When an architect takes out and supplies to builders quantities on which to form estimates for executing his designs, he should do so with the concurrence of his client, and it is desirable that the architect should be paid by him rather than by the builder, the cost of such quantities not being included in the commission of 5 per cent.

REGULATION F. F. PECTURAL COMPETITION

ADOPTED BY THE ROYAL INSTITUTE OF BRITISH ARCHITECTS.

[Reissue after revision July 1905.]

If the Promoters of an intended Competition desire members of Royal Institute of British Architects to take part therein, the conditions should be based on the following suggestions:—

1. The Promoters of an intended Competition should, AS THEIR STEP, appoint one or more professional Assessors, of established reputation, whose appointment should be set in the original advertisements and instructions. The selection of an Assessor should be made with the greatest possible care, as the successful result of the Competition will depend very largely upon his experience and ability.

The President of the Royal Institute of British Architects is always prepared to act as honorary adviser to Promoters in their appointment of Assessors.

All the designs sent in should be submitted to the Assessors.

2. The duty of Assessors should be, after conference with the promoters—

(a) to draw up the particulars, conditions, and suggestions, in accordance with these Regulations, as Instructions to Competitors, such documents to be so drawn up as to form an agreement between the Promoters and the Competitors, and also to advise the Promoters upon the question of cost and the amount and apportionment of the premium premiums;

(b) to determine whether the designs conform to the Instructions, and to exclude any which do not.

(c) to advise the Promoters on the relative merits of the designs admitted to the Competition, and to make a selection in accordance with the Instructions.

Note.—It is essential in drawing up the Instructions to state definitely which of the conditions must be strictly adhered to, and which of them are merely optional or of a suggestive character.

3. No Promoter of a Competition, and no Assessor engaged upon it, nor any employé of either, should compete, or act as architect, for the proposed work.

4. The number, scale, and method of finishing of the required drawings should be distinctly set forth, and they should not be in number, or to a larger scale, than necessary clearly to set the design, and such drawings should be uniform in size, or mode of colouring, and mounting. If the Assessor states that perspective drawings are desirable, it should be so stated.

5. Competitions should be conducted in one of the following ways:—

* To be obtained at the office of the Royal Institute.

intended work, and in designs
motion. In the advice of the Assessor or of Assessors
make the selection from such designs. The design awarded the first place should be employed
out the work.

(b) By advertisement inviting architects will
pete for the intended work to send in their
given day, with such other information as it
may think likely to advance his claim to be a
Competition. From these names the Promoter
advice of the Assessor or Assessors should select
number to compete, and each competitor should
receive a specified sum for the preparation
design. The author of the design awarded the
first place should be employed to carry out the work.

(c) By personal invitation to a limited number
architects, to join in a Competition for the work.
Each Competitor should receive a specified sum
preparation of his design. The author of the design
awarded the first place should be employed to carry out the work.

6. No design should bear any motto, device, or
mark, but all designs should be numbered by the
order of receipt. Any attempt to influence the
Promoters, or of the Assessor or Assessors, should disqualify
Competitor.

7. The author of the design placed first by the Assessor
Assessors should be employed to carry out the work, and
should be paid in accordance with the Schedule of Fees
sanctioned and published by the Royal Institute.
If the author is not employed, then the proposed works are abandoned.
Promoters, then the selected architect should receive
for his services in connection with the preparation of
petition drawings of a sum equal to 1½ per cent. on
of the estimated expenditure. If the said author is
subsequently employed, the 1½ per cent. previously paid
should merge in his ultimate commission.

8. In every case the amount of premium or sum
for the competitive designs should be fixed under the
the Assessor or Assessors.

9. Where a deposit is required for supplying the
it should be returned on the receipt of a bond, and
if the applicant declines to compete and returns
instructions, within a month after the receipt of replies
petitioner's questions. The deposit required should not be
the sum of one guinea.

10. Each design should be accompanied by a declaration
signed by the Competitor, stating that the design is his
personal work, and that the drawings have been prepared
his own supervision.

if sent in after a period in accidents in transit (red);
if it does not substantially give the accommodation

it exceeds the limits of size as shown on the plan by the Promoters, the figured dimensions on which could be adhered to;

if the Assessor or Assessors should determine that its cost will exceed by 10 per cent the outlay stated in the Instructions, or the estimate of the Competitor may be stated. If the Assessor or Assessors find that the outlay stated in the Instructions is too high or they shall not be bound in the selection by the amount named in such Instructions, but of cost shall never be a material element in the award.

if the other Instructions are violated.

It is that all designs and reports submitted in a competition except any excluded under Clause 11, should, with the consent of their authors, be publicly exhibited after the award is made, which award should be published at the time of the exhibition.

It is essential to the success of any Competition that the Competitors should agree in their Instructions that the award of the prize should be adhered to unless there is some valid reason for the employment of the author of the design placed before the Assessor should be satisfied.

In case of works of considerable magnitude it is that three Assessors should be appointed. As stated by the President of the Institute is always ready to advise on other points.

Royal R.I.B.A. Rules of Charges for Assessing
as is the sum of Thirty Guineas plus one-fifth per cent of the estimated cost of the proposed building.

CONSERVATION OF ANCIENT MONUMENTS

GENERAL ADVICE TO PROMOTERS OF RESTORATION

[First issued in 1865; revised and enlarged]

1. Before any alteration is decided on, an architect should be consulted and be made careful drawings of the building, with several photographs should then be taken of all objects especially such as are so dilapidated and it becomes absolutely necessary to renew them in part. In the case of Churches, these photographs of the drawings should be deposited in the Parish Registry, or any public office in the town for the purpose, and the date of their deposit.

Any clearance of wall limits, pavements, floor, high pews, modern wall partitions, or other encumbrances (provided that they be nearly modern), necessary detailed arrangements are made for the restoration, only be carried out under the direction of the architect after his inspection of the church; and such alterations should not include works of artistic or other interest which it is often most important to preserve. No modern tiles, steps, or other pavements, should be removed without his special permission.

2. Careful enquiry should be made for any church furniture—stained glass, sculpture, &c.—old work which may at any time have been in the building, with a view to their restoration in place.

3. Buildings of the same style and character in the neighbourhood should be examined when any doubt exists as to the original design in any part.

4. Diligent search should be made for indications of ancient doorways, window openings, recesses, aumbries, piscinae, sedilia, Easter sepulchres, altar stones, stoups, staircases, hagioscopes, low side-windows, recessed tombs

not character.

careful search should be made in any part of the building, and in the case of masonry, in modern walls, so as to discover a key to the parts which have been deleted or destroyed. If such stones are discovered, the architect should be informed, in order that he may personally visit the work.

plastered surfaces should be carefully examined to discover any remains of painting or ornamented or whitewashed stone or wood work, so that no injury may be done to any painting, powdering, or other coloured design. If it is proposed to renew the roof, all cleaning should be deferred until after they are protected by the erection of new roofs. Remains of ancient date are often found, and should be preserved if possible.

Ancient painted glass, with the original leading, should be carefully preserved, and taken out of the building, save for the part when absolutely necessary, and this is seldom. It is not generally desirable to remove stained glass, even when small fragments only of the glass it occupies, without first of all learning that it is in its original position. It may be inserted in old windows, care should be taken to preserve the old glass, and it should not be replaced by new, as is too often the case. It may, for the sake of its superiority of tint, be used with advantage. The use of stained glass, and the use of millions, silk, tinsel, and other materials, are practicable, have such parts as are decorated by dovelling new stone on to the old internal part may be frequently done without taking down the part of the window.

Ancient ironwork of windows should not be taken down, even when the outer half of the stonework is removed. It should be retained when new stained glass is put in, being designed with regard to it. It has been done by the destruction of old ironwork in the country that this requirement should be enforced.

any remains of churchyard walls, with their buttresses, or piers, churchyard or other crosses, lichgates,

retained in their old arrangement. Jacobean and wood-work is often quite as valuable, artistically, as interesting historically, as mediæval work.

14. Where curiosities, fragments of sculpture or stone or wood-work, of tiles or glass too small for discovered in the course of the work, it is desirable should all be carefully kept in some case or chest, arranged and labelled with a short description of their history. This case should be under lock and key. Care should be taken that the architect's Specification gives the contractor no claim upon any such thin materials.

15. In the above suggestions it has been assumed the promoters of the work have a proper appreciation of what is due to an ancient building, and are anxious about its restoration in the most conservative manner possible; such, however, is unfortunately not always the case. The promoters of restorations, whether clergy or laymen, are sometimes more bent upon getting a new building than preserving old; it cannot be therefore insisted upon, that in dealing with an ancient building, the object should be not simply to put it in good repair, but to preserve it as an authentic specimen of the ancient arts of our country. Every old building has historical value, and it should be remembered that the value is gone when its authenticity is destroyed.

The duty, therefore, of all those having charge of a building should be not so much the renewal of its remains as its preservation; and this should embrace a portion of original work which it is in any way possible to save, for it must be remembered that new work is of no value or interest except so far as it serves to preserve ancient design, and that no interest will ever be attached to it unless original parts remain to attest its authenticity.

There is ample scope for original design in additions necessarily made to the size of old buildings, and it is usually best to allow the architect to be independent. His work will then have its due historical value; and if he only make a very good copy of the old work to which he is adding, great confusion will be felt hereafter as to which part of the work is old and which modern.

16. A vigilant guard should be kept against the indulgence of individual fancies for or against particular features or styles; and especially against the theory sometimes held that a restored church must be purged of all features

stored church is a fully constituted an

tain are all the efforts of Central or Diocesan or Archaeological bodies, with their several buildings of historic interest, if those having charge remains do not cordially embrace such advice and down for their conservation, embodying what is possible to controvert, and the neglect of which is the cause of many districts being robbed of the rough rash and unskillful operations. Improper operators, the clergy, churchwardens, and others are reminded of the responsibility which they are to resist all needless destruction of ancient work competent professional aid in a building with an ancient building. Questions of embarrassment constantly arise in connection with mixed dates, involving constructional and difficulties, points requiring the experienced architect and antiquary. Moreover,

reservation of old work must largely depend on the care, therefore, should be taken to secure the interest in the work, and who can faithfully follow the instructions of the architect to prevent the mischief that may otherwise befall the work. It is always desirable that there should be a resident clerk familiar with the work, and appointed to

see that no injury is done to ancient buildings. Most watchfulness should be shown by the architect near the spot where even well-considered work is done, to see that they are really executed in the proper manner. However frequently the architect

is the works under his superintendence, he cannot at all times prevent his orders being disobeyed, and a daily or almost hourly inspection is often necessary. Intelligent will always be welcome to a zealous architect, and time, will often prevent irreparable mischief. Architects, ecclesiologists, and antiquaries, in the always do good service by carefully watching the work in old buildings.

The foregoing suggestions and remarks have been put up with special reference to the Restoration of churches: the same spirit ought to actuate those who have

degree disturbing, much less removing the an
Remember that the mode of tooling or working
stone is a subject of interest and curiosity, and the
tool-marks must therefore not be disturbed: moreover
does this caution apply to early Romanesque work, as
very coarseness of the stone, and rudeness of work
are important evidences of date. If indications
colouring be found on the surface of the stone
be carefully preserved.

The mode of removing whitewash depends on the
nature of the material. With some materials nothing
good as the Manchester card, but in each case exper
should be tried to ascertain the best mode. It is to
leave the whitewash wholly or partially on the stone, the

The object of the Society is to afford assistance to those persons in circumstances who have been engaged as Architects, or their Assistants, and to their Widows and Children.

Members consist of Subscribers, Annual and for Life.

An Annual Subscriber of One Guinea has the privilege of recommending annually two Applicants for relief, and one more for an additional Guinea annually subscribed.

A Donation of Ten Guineas constitutes a Life Member, who is entitled to the same privileges as an Annual Subscriber of One Guinea.

A Donor of Twenty Guineas is entitled to recommend four Applicants; a Donor of Thirty Guineas, six Applicants, and so on.

A Donor of Ten Guineas, or a Donor of Five Guineas being an Annual Subscriber of One Guinea or more, is eligible to become a Member of the Council.
